Modual-4

Digital Marketing Assignment

Session-1

Q-1.

Pick any two apps you use daily (like Instagram, Zomato, or Flipkart) and write a short paragraph on how each uses social media marketing to grow its user base.

Ans:

1. Instagram:
Instagram uses social media marketing to grow its user base by encouraging users to create and share photos, Reels, Stories, and other short-form videos. It uses influencers, trending content, hashtags, recommendations, and personalized feeds to attract new users and keep existing users active. Instagram also promotes new features through creators and advertising campaigns.

2. Zomato:
Zomato uses social media marketing to attract customers through food-related posts, Reels, offers, memes, and festival campaigns. It collaborates with influencers and uses creative and humorous content to increase engagement. Zomato also promotes discounts, restaurant offers, and new services through social media advertising.

Q-2.

**Create a table comparing Facebook, Instagram, and LinkedIn for business marketing. Include columns for target audience, main content types, and best business use case.

Hint: Think about which platform is best for B2B, B2C, or D2C brands.**

Ans:

Platform	Target Audience	Main Content Types	Best Business Use Case
Facebook	Broad audience, adults, families, local customers	Images, videos, Reels, posts, Stories, ads	B2C, local businesses, community building and advertising

Instagram	Younger audience, creators, shoppers, lifestyle users	Reels, Stories, photos, carousels, influencer content	B2C and D2C, fashion, beauty, food and lifestyle brands
LinkedIn	Professionals, business owners, employees, decision-makers	Professional posts, articles, videos, company updates	B2B marketing, lead generation, recruitment and professional branding

Conclusion: Instagram is especially useful for **D2C and visual brands**, Facebook is useful for **broad B2C marketing**, and LinkedIn is the strongest choice for **B2B marketing**.

Q-3.

Imagine you are launching a new D2C fashion brand in 2026. Choose one social media platform you would prioritize and explain your choice based on the digital trends you expect in 2026.

Hint: Consider factors like video content, influencer marketing, and platform growth.

Ans:

My choice: Instagram

If I launch a new D2C fashion brand in 2026, I would prioritize **Instagram** because fashion is a highly visual industry. Instagram provides strong opportunities to promote products through Reels, Stories, photos, influencer collaborations, and user-generated content.

In 2026, short-form video and creator/influencer marketing are expected to remain important for discovering products and building brand awareness. Instagram can also help a fashion brand showcase new collections, styling ideas, customer reviews, and limited-time offers. Therefore, Instagram would be my first choice for reaching fashion-conscious customers and increasing brand awareness and sales.

Q-4.

List three differences between B2B and B2C social media marketing strategies, using real examples from brands or companies you follow online.

Ans:

Difference	**B2B Marketing**	**B2C Marketing**
1. Target Audience	Targets businesses, professionals and decision-makers. Example: **Microsoft** uses LinkedIn to communicate with businesses and professionals.	Targets individual consumers. Example: **Nike** uses Instagram to reach customers through fashion, sports and lifestyle content.
2. Content Style	Focuses more on professional, educational and industry-related content such as case studies, reports and business insights.	Focuses more on entertaining, emotional and visually attractive content such as Reels, offers and influencer posts.
3. Buying Decision	Usually has a longer buying process because multiple people may be involved in the decision.	Usually has a shorter buying process and can be influenced by trends, discounts, influencers and emotional appeal.

Season-2

Q-1.

Create a comparison table listing the key differences between Static, Video, Carousel, and Collection ads on Facebook, including format, ideal use case, and one example brand or campaign for each.

Ans:

Ad Type	Format	Ideal Use Case	Example Brand/Campaign
Static Ad	Single image + text + CTA	Promoting one product, offer, or announcement	**Myntra Sale Ad** – promoting a discount offer
Video Ad	Short video + text + CTA	Product demonstrations, storytelling, brand awareness	**Zomato Food Delivery Ad** – showing food and delivery experience
Carousel Ad	2–10 images/videos that users can swipe	Showing multiple products, features, or benefits	**Amazon Product Carousel** – showing different products
Collection Ad	Cover image/video + multiple product images	E-commerce product discovery and shopping	**Myntra Fashion Collection** – showing a fashion collection

Conclusion: Static ads are simple and quick, Video ads are useful for storytelling, Carousel ads are best for multiple products, and Collection ads are useful for creating a shopping experience.

Q-3.

**Using Facebook Ads Manager (or Meta Ads Library for research), find a real ad campaign targeting a specific audience segment (e.g., students, foodies, cricket fans). Describe the campaign objective you think was chosen (e.g., Traffic, Engagement, App Installs) and explain your reasoning.

Hint: Look for clues in the ad text, call-to-action, and visuals.**

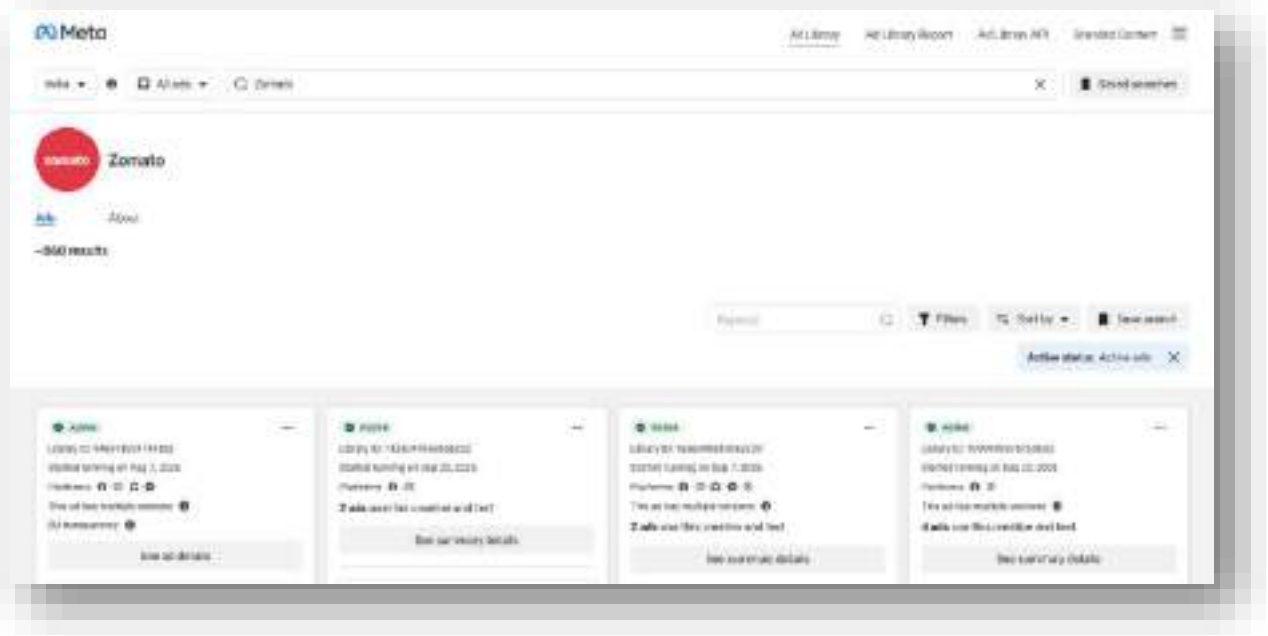

Ans:

Brand: Zomato
Target Audience: Food lovers / people interested in food delivery

Ad Type: Video Ad, Image Ad
Campaign Objective: App Installs / App Promotion

Example Campaign:
A Zomato ad promoting food delivery with attractive food visuals and a CTA such as **"Order Now"** or **"Install No**

Ad Library Overview:

Active Ads

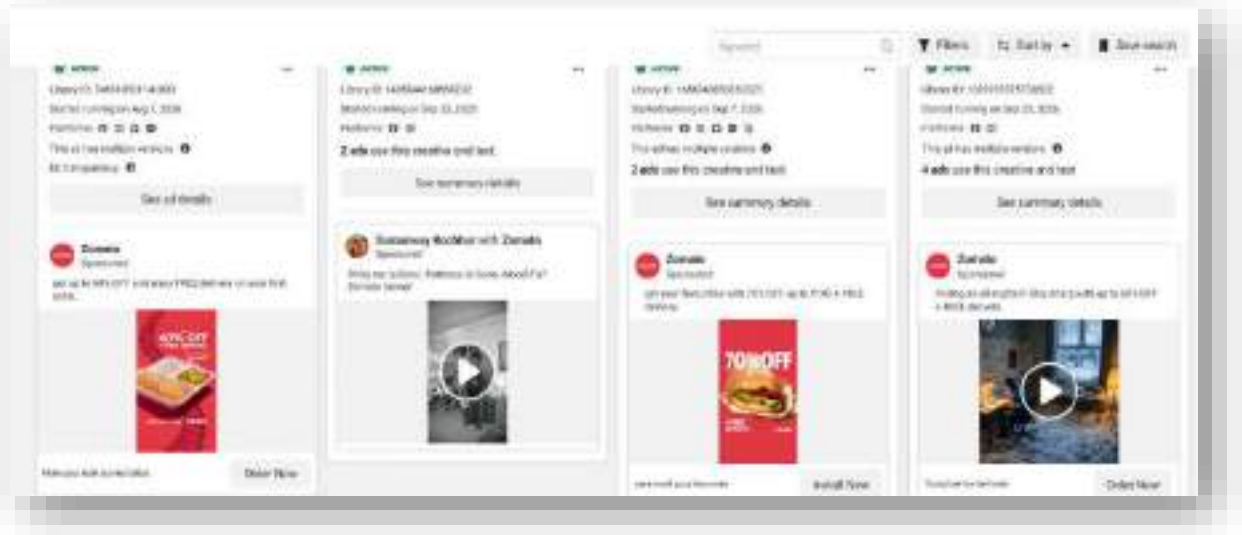

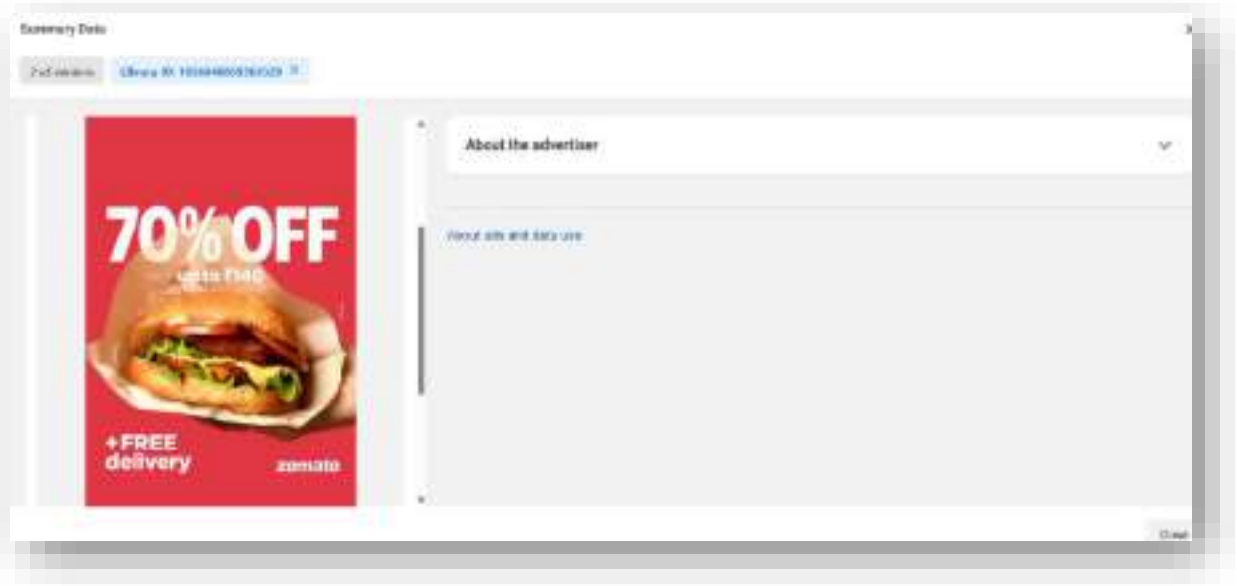

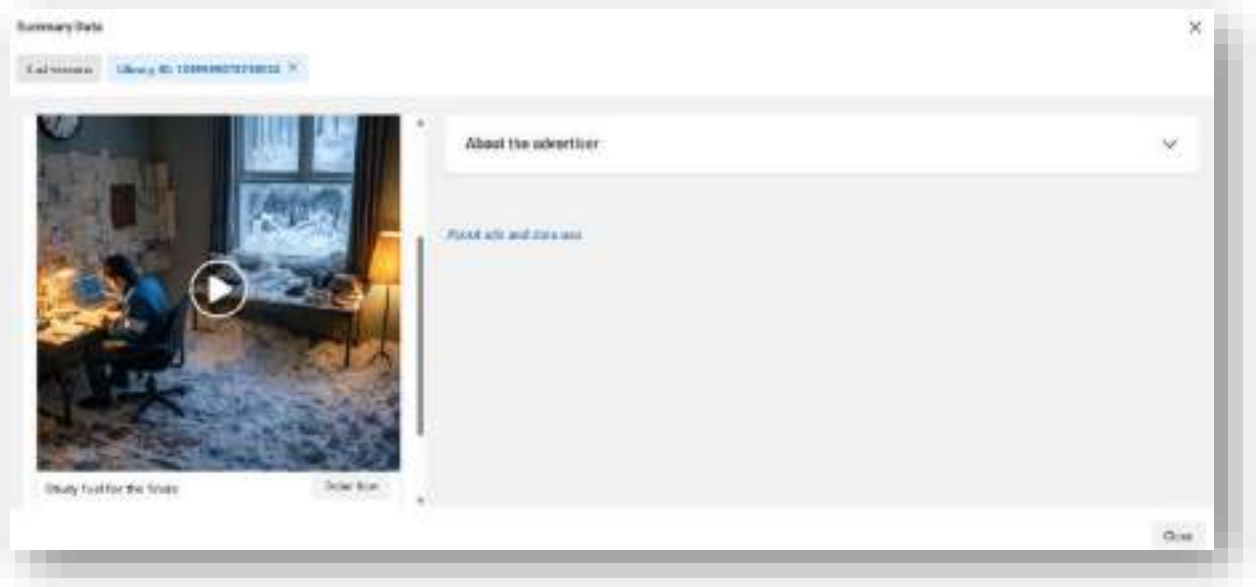

Image Ad:

Video Ad:

Reasoning:

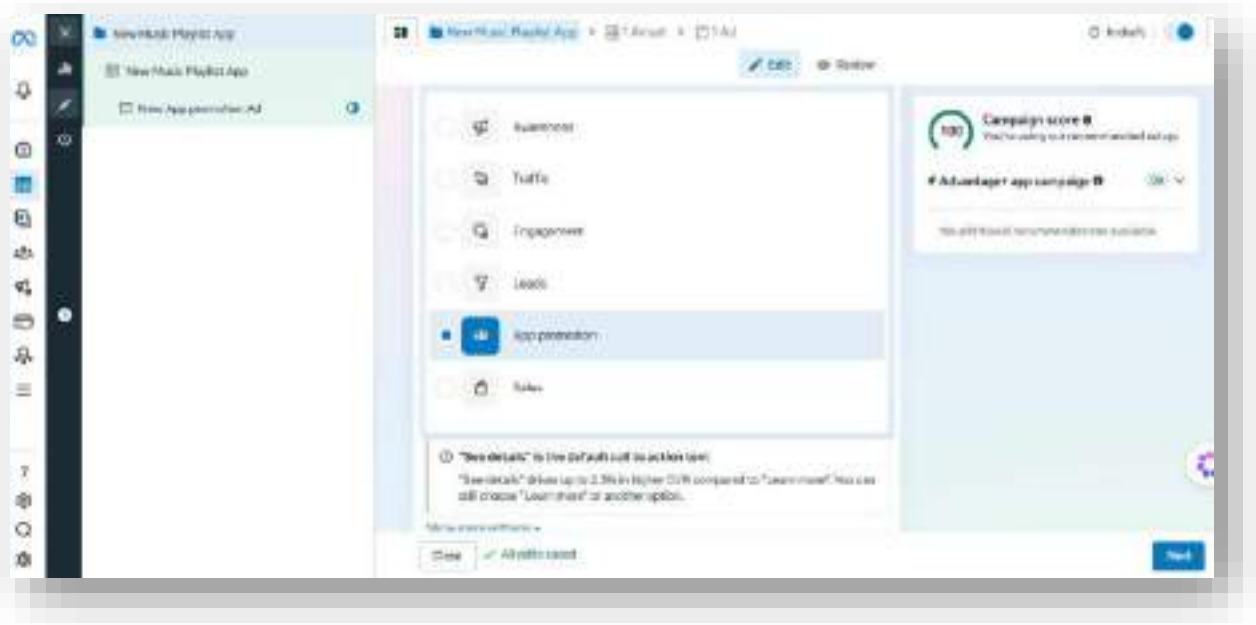

1. **Ad Text:** The message focuses on ordering food online.
2. **Visuals:** Food images/videos attract people who are interested in eating and food delivery.
3. **CTA:** A CTA such as **"Order Now"** encourages users to take immediate action.
4. **Audience:** Foodies and frequent online food-ordering users are the most relevant audience.

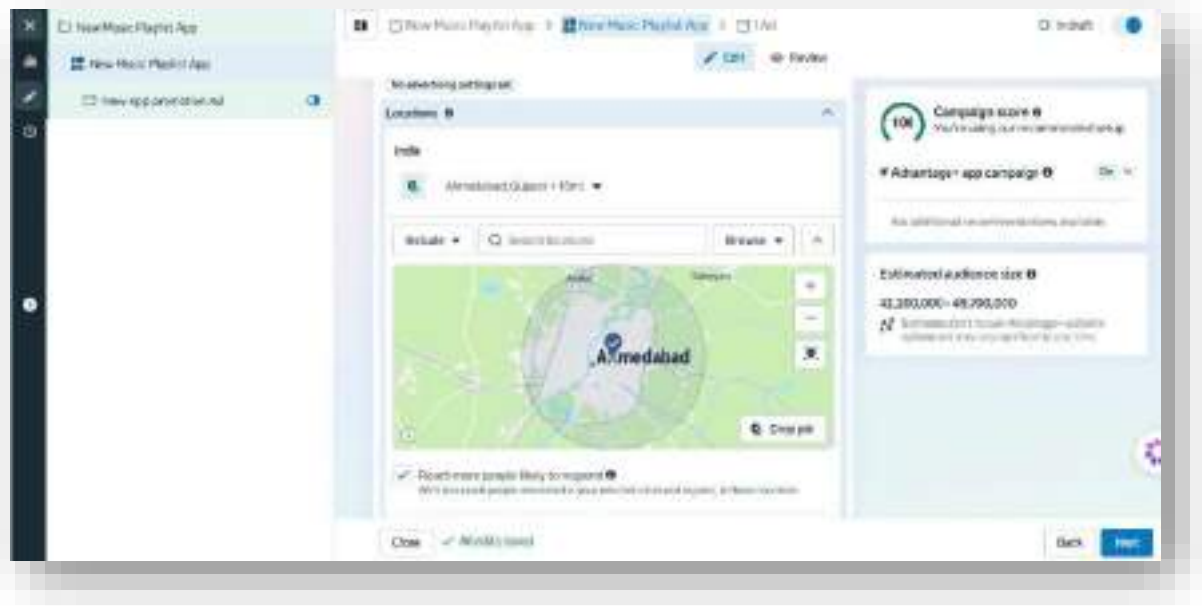

Conclusion:
I think the campaign objective would be **App Promotion/App Installs** because the main purpose is to encourage users to use or download the Zomato app and place an order.

Q-4.

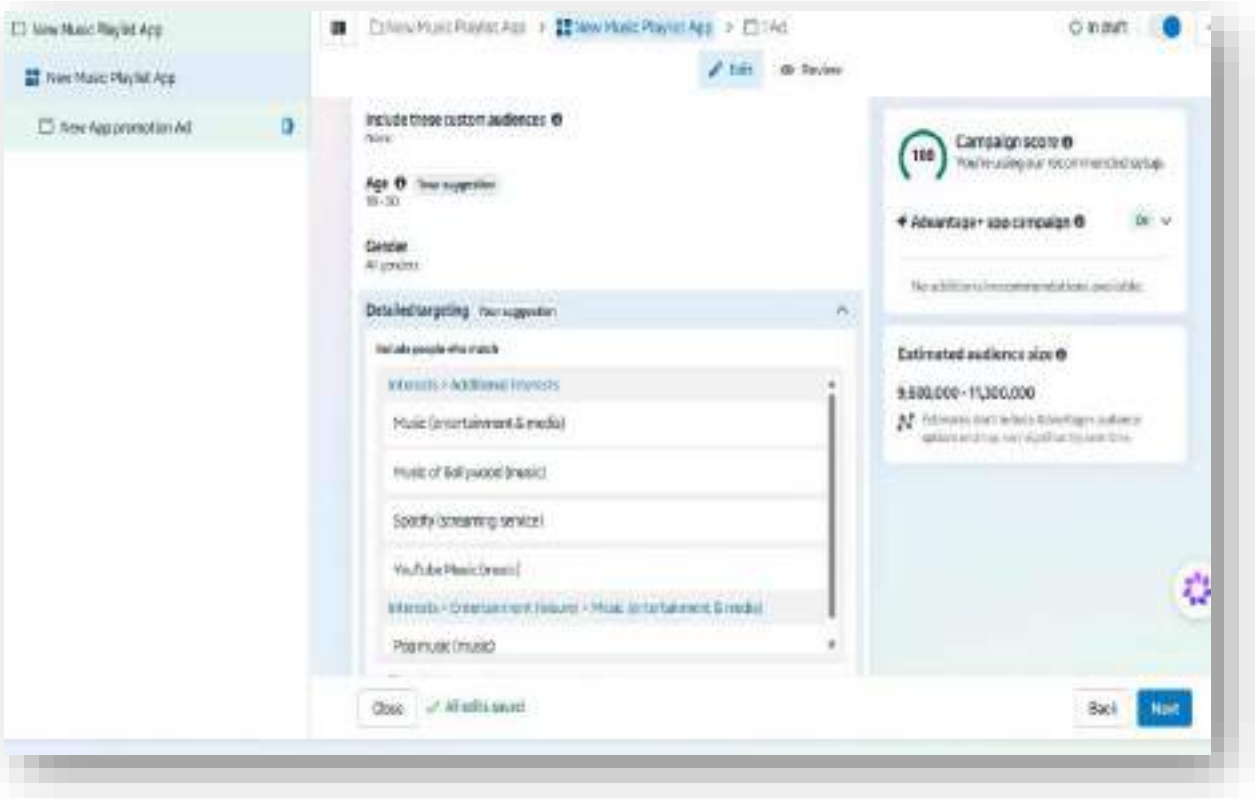

Design a sample audience for a Facebook ad campaign promoting a new music playlist app, detailing at least 3 targeting criteria (such as age, interests, and location) and explain how each would help optimize the campaign.

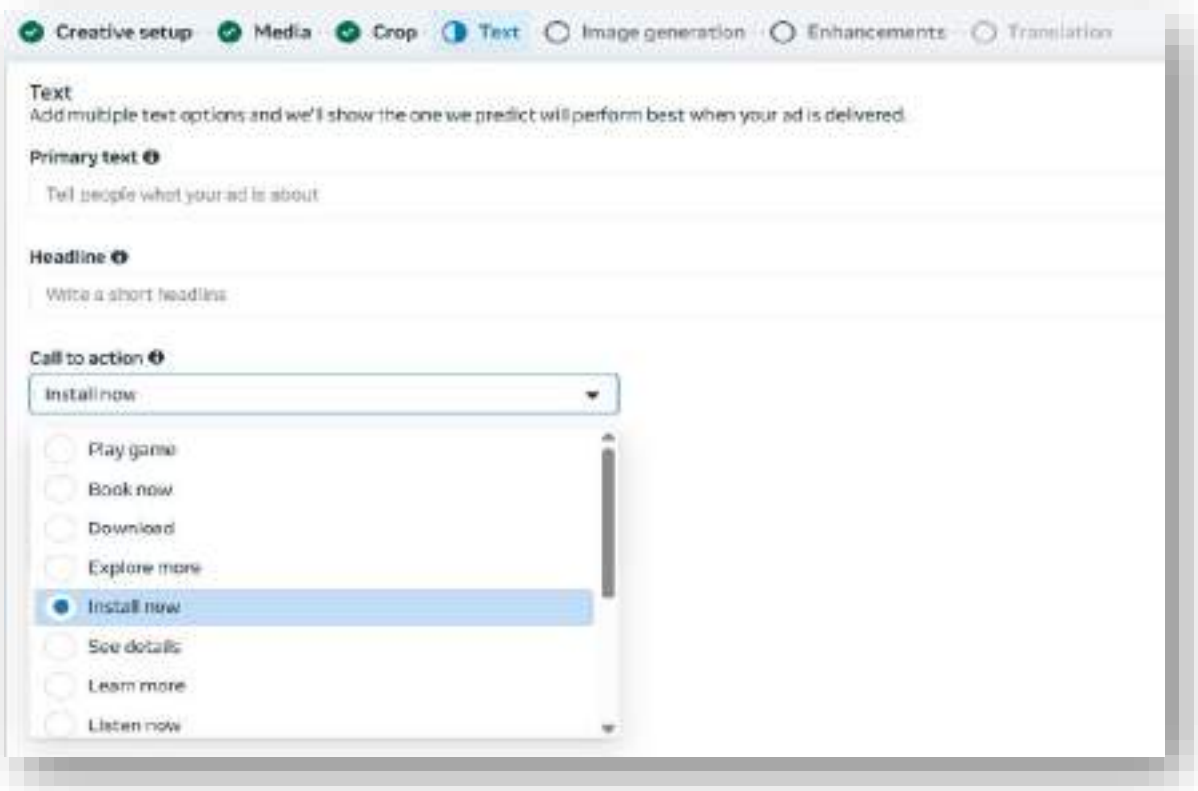

Ans:

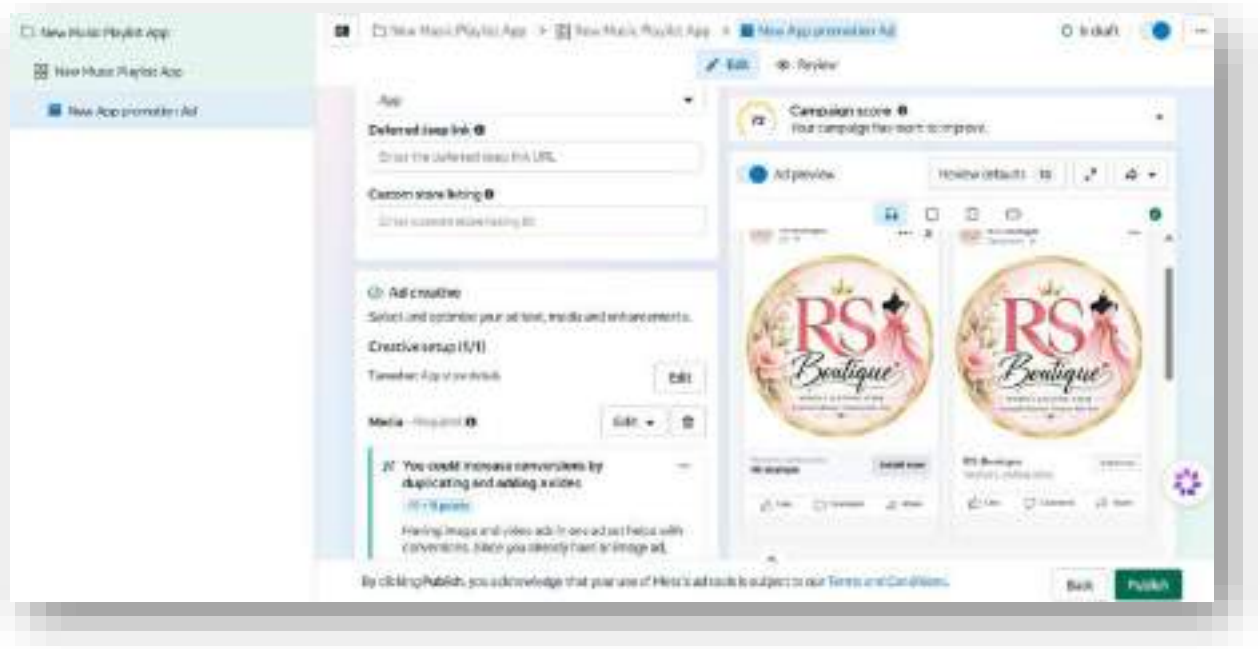

Age & Interests:

Q-5.

**Explain in your own words how the Facebook Ads auction works by creating a simple example: imagine 3 brands (a food delivery app, a fashion store, and a cricket streaming service) are all bidding to show ads to 18-21 year olds in Ahmedabad. Describe what factors determine whose ad is shown and why.

Hint: Consider bid amount, ad quality, and relevance.**

Ans:

Imagine **three brands** want to show ads to **18–21-year-olds in Ahmedabad**:

- 🍔 **Food Delivery App**
- 👗 **Fashion Store**
- 🏏 **Cricket Streaming Service**

Meta does **not simply show the ad from the brand that offers the highest bid**. The auction considers several factors.

Brand	**Bid**	**Ad Quality**	**Relevance**	**Result**
Food Delivery App	₹100	High	High	🏆 Likely to win
Fashion Store	₹120	Medium	Medium	Could lose
Cricket Streaming	₹90	Very High	Very High	Could win

Main factors:

1. Bid amount
A higher bid can increase the chance of winning, but it is not the only factor.

2. Ad quality
Meta considers how useful and engaging the advertisement is. A high-quality ad can perform better than a poorly designed ad with a higher bid.

3. Relevance
The ad should match the interests of the person seeing it. For example, a cricket streaming ad is highly relevant to a person interested in cricket.

Example:
Suppose a 19-year-old in Ahmedabad frequently watches cricket content. The cricket streaming service may have a strong advantage because its ad is highly relevant to that person—even if its bid is lower than the fashion store's bid.

Conclusion:
The winning ad is generally the one that provides the best overall value to Meta and the user, considering **bid, estimated action rate, and ad quality/relevance**, rather than simply the highest bidder.

Season-3

Q-1.

Create a comparison table showing the differences in audience behavior and ad format between Instagram Feed, Instagram Stories, and Reels placements for a new sneaker launch campaign.

Ans:

Placement	Audience Behavior	Ad Format	Best Use for Sneaker Launch
Instagram Feed	Users scroll through posts and may stop when the product looks attractive or relevant.	Single image, carousel, or video ad	Product details, sneaker photos, price and features
Instagram Stories	Users watch quickly and tap through Stories, so attention needs to be captured immediately.	Vertical image/video, usually full-screen	Limited-time offers, discounts, countdowns and quick CTAs
Instagram Reels	Users actively watch short, entertaining videos and discover new trends/content.	Short vertical video	Sneaker launches, styling videos, unboxing, transitions and influencer-style content

Q-2.

**Write three different ad copy hooks (each 15 words or less) for a Zomato-style food delivery app, targeting hungry college students scrolling Instagram Stories.

Hint: Try using urgency, curiosity, or a question to grab attention in each hook.**

Ans:

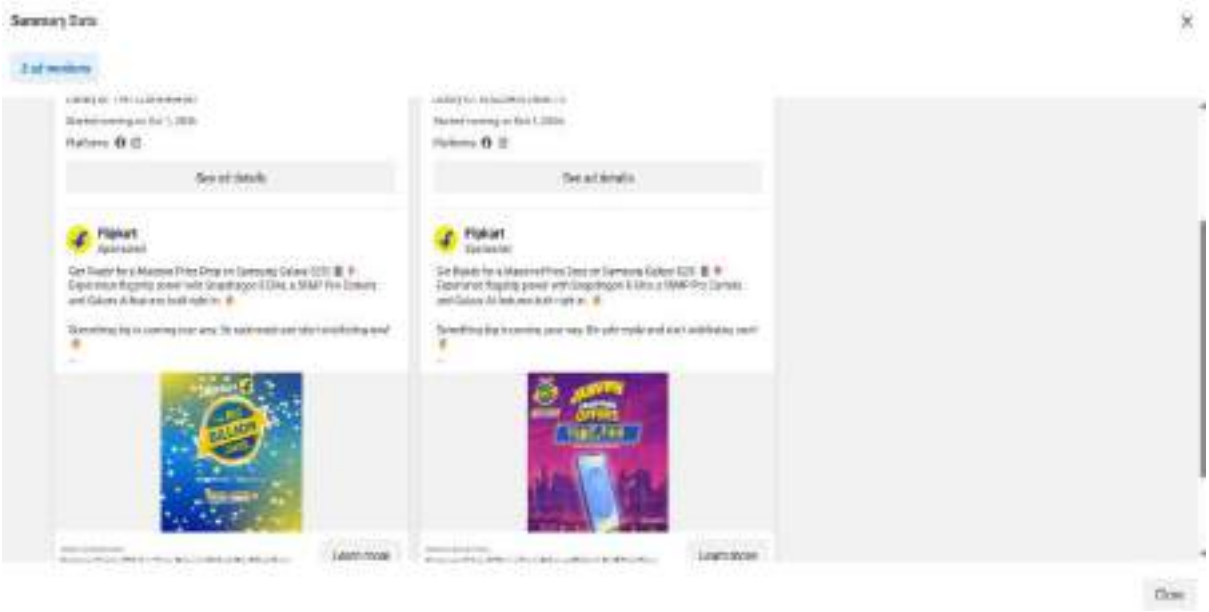

Each hook is **15 words or less** and is suitable for **Instagram Stories targeting hungry college students**.

1. **Urgency:** “Hungry after class? 🍔 Order now before your favorite food sells out!”
2. **Curiosity:** “Guess what’s waiting for you? 👀 Your favorite meal is just one tap away!”
3. **Question:** “Skipped lunch? 😋 Why wait? Get your favorite food delivered to campus now!”

Q-3.

Analyze the landing page of any Flipkart product you recently browsed and list 3 elements that help convert visitors into buyers, and 2 elements that could be improved for better conversion.

Ans:

Example product: Smartphone product page on Flipkart.

3 Elements That Help Convert Visitors into Buyers

1. **Product Images & Videos** – Multiple product images help customers understand the product before purchasing.
2. **Price, Discounts & Offers** – Clear pricing, discounts, bank offers and exchange options make the purchase more attractive.
3. **Ratings & Customer Reviews** – Reviews and ratings build trust and help customers make a buying decision.

2 Elements That Could Be Improved

1. **Too Much Information** – The page can contain a lot of information, which may make it difficult for new buyers to quickly identify the most important features.
2. **Stronger Product Comparison** – A simple comparison with similar products could help customers decide faster.

Q-4.

Create a detailed buyer persona for a Spotify Premium subscription campaign targeting Indian Gen Z users. Include demographics, interests, pain points, and preferred social platforms.

Ans:

Buyer Persona Name: Aarav
Age: 18–24 years
Location: India
Occupation: College Student / Young Professional

Category	Details
Demographics	Age 18–24, Indian Gen Z, college students and young professionals
Education	College / University students
Income	Low to moderate income; may receive pocket money or earn part-time
Interests	Music, Bollywood, Hollywood, gaming, movies, fashion, memes, podcasts and entertainment
Music Habits	Listens to music while studying, travelling, exercising, gaming and relaxing
Pain Points	Frequent ads, limited skips, internet/data issues and difficulty listening offline
Needs	Ad-free music, unlimited skips, offline listening and personalized playlists
Motivations	Better music experience, affordable plans, personalized recommendations and convenience
Preferred Social Platforms	Instagram, YouTube, Snapchat and WhatsApp
Preferred Content	Reels, short videos, memes, music trends, influencer content and relatable college content
Buying Motivation	Affordable subscription, student offers and an uninterrupted music experience

Q-5.

Pick any trending IPL cricket app and draft a short Messenger ad copy (max 30 words) that would appeal to its most active user persona. Explain in 2 lines why you chose that angle.

Ans:

Example: IPL fantasy cricket app

Messenger Ad Copy (under 30 words):

"IPL is on! 🏏 Pick your dream team, join exciting contests and prove your cricket knowledge. Start playing before the next match begins!"

Why this angle:
It uses the excitement of live IPL matches and appeals to active cricket fans who enjoy competition.
The urgency of the **next match** encourages users to take action quickly.

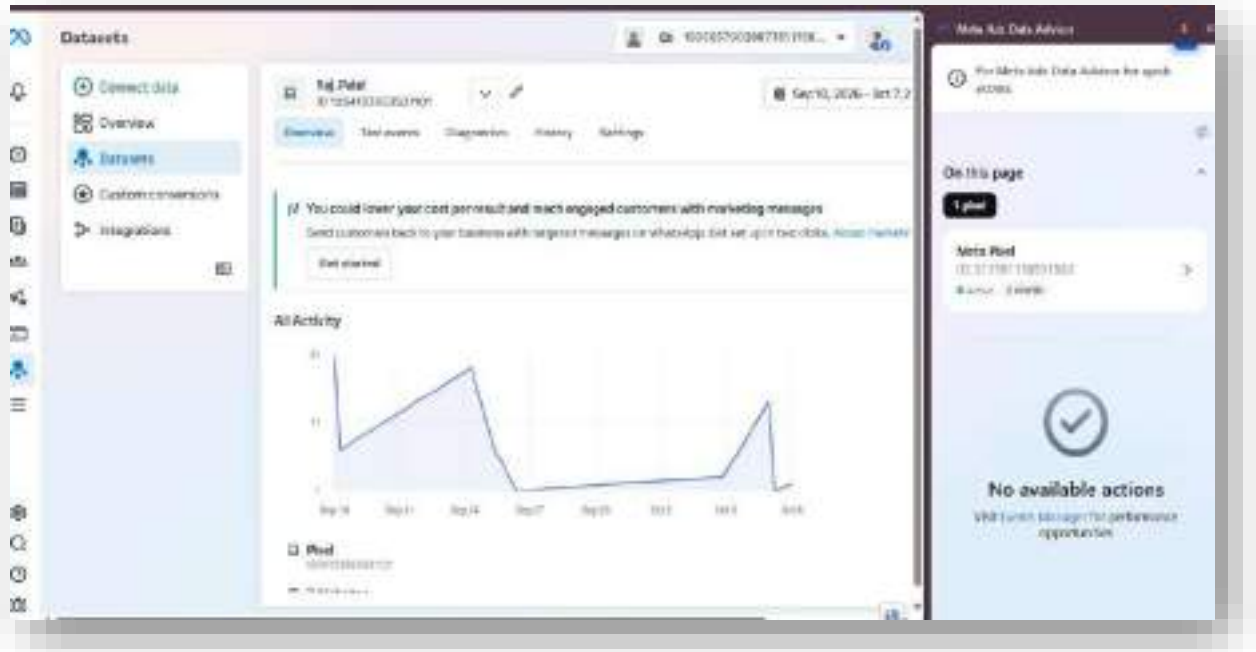

Serason-4

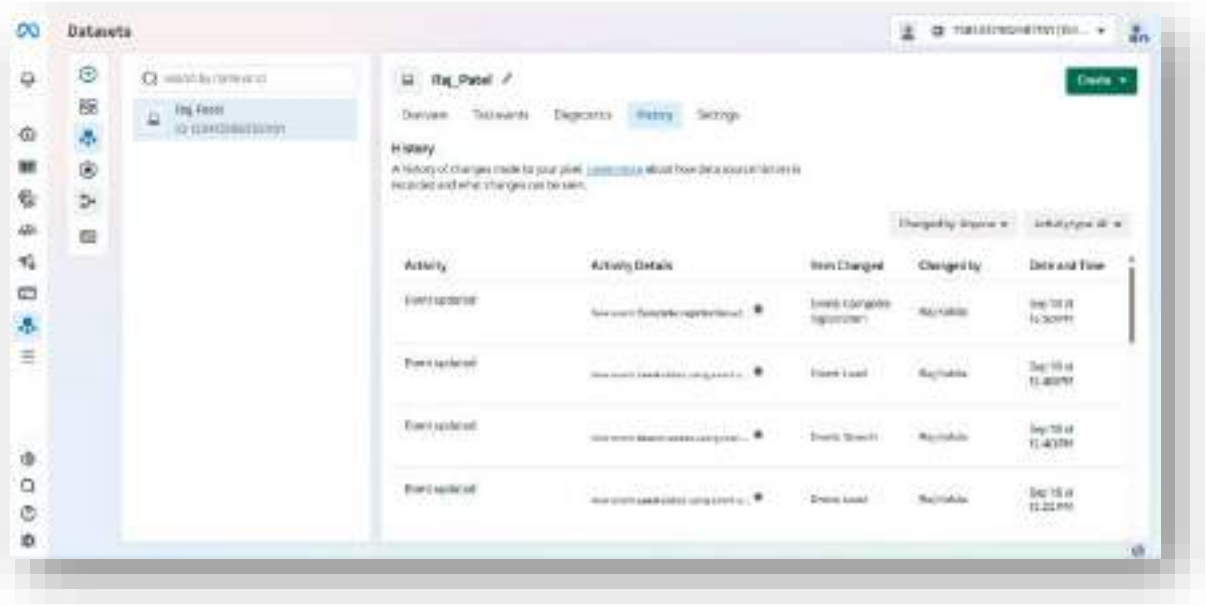

Q-1.

Set up a Facebook Pixel on a demo e-commerce website (like a sample Flipkart-style product page) and verify that page view events are firing correctly using the Facebook Pixel Helper browser extension.

Ans:

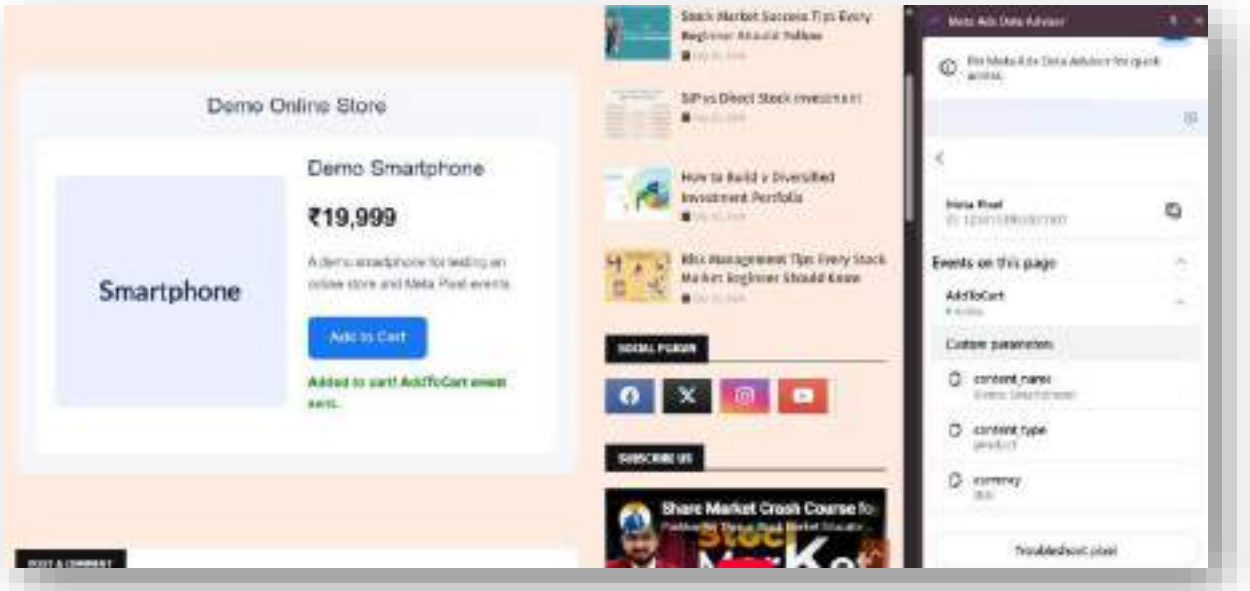

2.

Configure a custom event in Facebook Pixel to track when a user adds an item to cart on your demo site, and test the event by simulating the action.

Ans:

Q-3.

Implement a basic Conversion API (CAPI) server-side event using Facebook's Test Events tool—send a 'Purchase' event with sample data (order value, currency) and confirm it appears in Facebook Events Manager.

Hint: You can use Postman or any HTTP client to send the test event to the CAPI endpoint.

Ans:

Objective: To send a test Purchase event using Meta Conversion API and verify it in Events Manager.

Procedure:

1. Open Meta Events Manager and select the demo dataset.
2. Open the Test Events tab and copy the test event code.
3. Open Graph API Explorer or Postman to send a server-side event.
4. Configure a Purchase event with sample order value and currency.
5. Add the test event code to the request.
6. Send the request to the Meta Conversions API endpoint.
7. Return to Events Manager and check whether the Purchase event appears in Test Events.

Sample Event Data:

- Event Name: Purchase
- Order Value: ₹999
- Currency: INR
- Event ID: test_purchase_001

Sample JSON Payload:

```
{
  "data": [
    {
      "event_name": "Purchase",
      "event_time": 1791570000,
      "action_source": "website",
      "event_id": "test_purchase_001",
```

```
    "user_data": {
      "client_ip_address": "127.0.0.1"
    },
    "custom_data": {
      "currency": "INR",
      "value": 999
    }
   }
 ],
 "test_event_code": "TEST35495"
}
```

Result:

The Purchase event can be verified in Meta Events Manager after sending a valid Conversion API request with the correct access token, current event timestamp, and test event code. The event details should show the sample purchase value of ₹999 and currency INR.

Conclusion:

Meta Conversion API helps businesses track server-side events such as purchases. Testing these events in Events Manager helps verify that the event data is received correctly.

4.

Use Facebook Analytics to generate a report showing the number of 'Add to Cart' and 'Purchase' events over the last 7 days for your demo site, and export the report as a CSV file.

Ans:

Important: Meta's old standalone **Facebook Analytics** product has been discontinued. For this assignment, use **Meta Events Manager** and its event/activity reporting features instead.

Practical steps:

1. Events Manager open કરો.
2. Demo Dataset/Pixel select કરો.
3. Event activity/overview sectionમાં જાઓ.

4. Date range **Last 7 Days** select કરો.
5. AddToCart event find કરો.
6. Purchase event find કરો.
7. બંનેના event counts note કરો.
8. Available reporting/export option હોય તો CSV export કરો.

જો તમારા demo site પર ખરેખર 7 દિવસના events generate થયા નથી, તો report માં actual data ઓછો અથવા zero હોઈ શકે છે. Fake data ને real event તરીકે બતાવવું નહીં.

CSV example:

Date Range	Event Name	Event Count
Last 7 Days	AddToCart	25
Last 7 Days	Purchase	8

Submission answer:

I generated an event report for the last 7 days using Meta Events Manager. I checked the AddToCart and Purchase events and recorded their event counts. I exported the available report data as a CSV file for analysis.

Q-5.

Design a simple A/B test plan for a Zomato-style landing page: describe how you would use Facebook Pixel to track conversions for two different banner images, and explain which attribution model you would choose to measure the test results.

Ans:

Objective:

A/B Test Setup

Version A – Banner A

“Get 50% OFF on Your First Food Order”

Version B – Banner B

“Fast Food Delivery at Great Prices”

- Product/service
- CTA
- Offer
- Page layout
- Target audience

Pixel tracking

Track these events:

PageView

ViewContent

AddToCart

Purchase

Example test data

Metric	**Banner A**	**Banner B**
Visitors	1,000	1,000
Add to Cart	120	150
Purchases	40	55
Conversion Rate	4%	5.5%

Season-5

Q-1.

Visit the Meta Ad Library and search for a popular food delivery app (like Zomato or Swiggy). List 3 different ad creatives you find, and note down the main message, format (image, video, carousel), and any call-to-action used.

Ans:

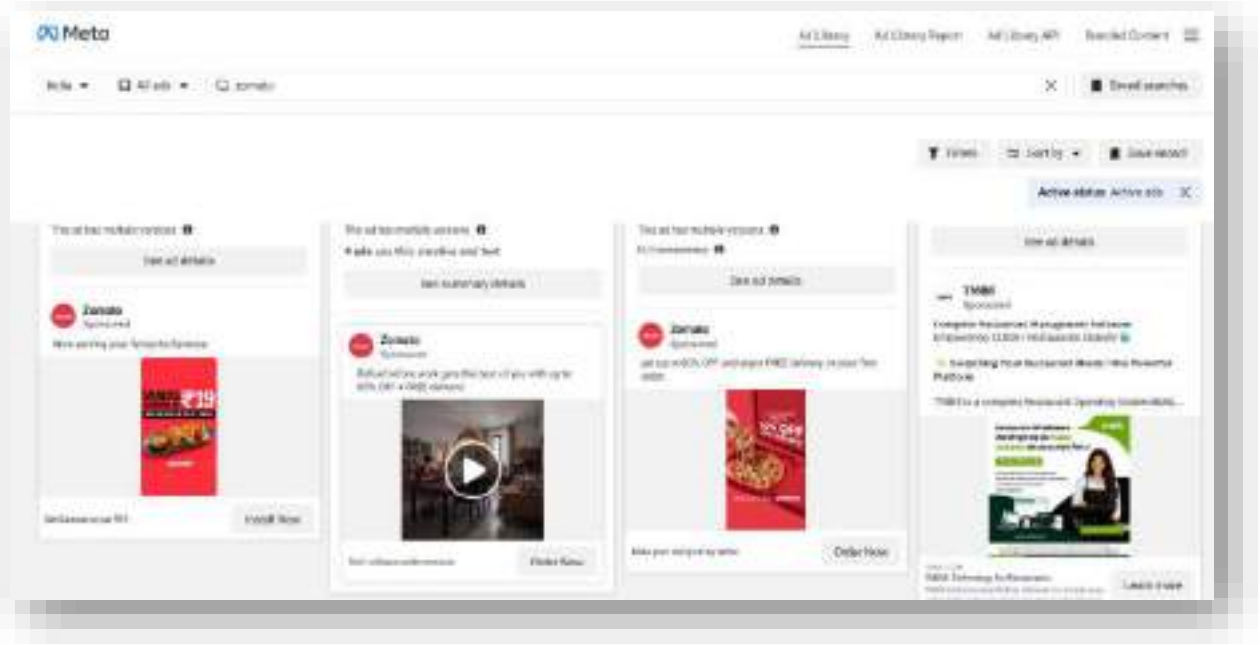

Brand selected: Zomato

Tool used: Meta Ad Library

Objective: To study different ad creatives used by a popular food delivery app.

No.	Main message	Ad format	Call-to-action (CTA)
1	Order your favourite food online and enjoy it at home.	Image ad	Order Now
2	Enjoy exciting discounts and special offers on food orders.	Video ad	Shop Now
3	Discover different restaurants and food options in your area.	Carousel ad	Learn More

Conclusion: Zomato can use different ad formats to attract customers, promote offers, and encourage people to order food online. Images communicate offers quickly, videos capture attention, and carousel ads showcase multiple food options.

Q-2.

Use a free competitor analysis tool such as SimilarWeb or SEMrush to research a major e-commerce brand (like Myntra or Flipkart). Identify and write down the top 2 social media platforms where they run the most paid ads, and mention one type of campaign objective they seem to focus on (e.g., traffic, conversions, app installs).

Ans:

Brand selected: Flipkart

Tool used: Similarweb and Semrush

Objective: To understand how an e-commerce brand uses digital channels to promote its products.

Item	**Observation**
Brand	Flipkart
Industry	E-commerce
Social media platforms to investigate	Facebook and Instagram
Possible campaign objective	Conversions and sales
Example campaign	Promoting a festive sale with discounts on smartphones, electronics, and fashion products

Target audience	Online shoppers, young adults, and deal seekers

Conclusion: Facebook and Instagram are useful platforms for e-commerce advertising because brands can showcase products, promote special offers, and reach potential customers. Conversion-focused campaigns aim to encourage purchases.

Q-3.

Create a table listing at least 4 different Facebook campaign objective types (e.g., Awareness, Traffic, Engagement, Conversions). For each, give a real-life example of how a music streaming app like Spotify India could use that objective for a campaign.

Ans:

Brand selected: Spotify

Campaign objective	**Meaning**	**Real-life example for Spotify India**
Awareness	Make more people aware of a brand or service.	Run a video ad introducing Spotify to students and young music lovers.
Traffic	Send people to a website or landing page.	Run an ad encouraging users to visit Spotify's website to explore playlists.
Engagement	Encourage people to interact with content.	Promote a popular playlist and encourage users to like, comment, or share it.
Leads	Collect information from interested people.	Promote a music fan contest and invite users to register with their contact details.
App promotion	Encourage people to install or use an app.	Show an ad highlighting Spotify playlists and encourage people to install the app.

Conclusion: Different campaign objectives help Spotify reach different marketing goals, such as increasing brand awareness, driving website traffic, improving engagement, collecting leads, and encouraging app installs.

Q-4.

**Record a short 15-30 second video ad promoting a fictional IPL cricket fan club, using your mobile phone. Write a caption and a call-to-action you would use if this was a real Instagram or Facebook ad.

Hint: Focus on energy, clear messaging, and a strong reason to join or follow.**

Ans:

Fan club name: IPL Super Fans Club

Video duration: 20–25 seconds

Platform: Instagram Reels and Facebook Reels

Video storyboard:

Scene 1: 0–5 seconds — Cricket excitement

Show a packed cricket stadium, cheering fans, and bright stadium lights.

On-screen text: “Are You Ready for IPL?”

Scene 2: 5–15 seconds — Join the community

Show friends cheering, celebrating boundaries, and discussing match predictions.

On-screen text: “Match Updates • Fan Polls • Cricket Fun”

Scene 3: 15–25 seconds — Call to action

End with energetic cricket visuals and the IPL Super Fans Club name.

On-screen text: **“Join the Club Today!”**

Caption for Instagram or Facebook:

🏏🔥 IPL Fever Is Here! 🔥🏏

Are you a true cricket fan? Join the **IPL Super Fans Club** and enjoy match discussions, exciting fan polls, cricket updates, and unforgettable cricket moments! 💥

🙌 Cheer louder. Share the passion. Live the game!

👉 **Join Now & Be Part of the Cricket Madness!**

#IPL #CricketFans #IPLFever #CricketLovers #FanClub

Call-to-action (CTA): Join Now

Practical submission: Record the video on your mobile phone using these three scenes. Add energetic background music, on-screen text, and transitions using Canva or CapCut. Keep the final video between 15 and 30 seconds and attach a screenshot of the completed video to your assignment.

Q-5.

Use ChatGPT or another AI video tool (such as Veo 3, if available) to generate a script or storyboard for a video ad promoting a new feature in a digital wallet app (like Paytm or PhonePe). Paste your AI-generated script/storyboard and explain in 2-3 lines how you would visualize it as a video ad.

Ans:

App name: SmartPay Wallet (fictional concept)

New feature: Split Bills — lets users divide a shared expense among friends.

Video duration: 25 seconds

AI-generated script/storyboard

Scene 1: 0–5 seconds — The problem

Visual: Friends finish eating at a café and look at the bill.

Voice-over: “Out with friends? Splitting the bill doesn't have to be confusing!”

Scene 2: 5–15 seconds — Introduce the feature

Visual: A user opens SmartPay Wallet and selects the fictional Split Bills feature.

Voice-over: “Meet Split Bills by SmartPay Wallet. Divide shared expenses and see everyone's share in one place!”

Scene 3: 15–25 seconds — Show the benefit

Visual: Friends smile and continue enjoying their time together.

Voice-over: “Less bill confusion, more time with friends. Try Split Bills today!”

Final ad text

Headline: Split Bills. Not Friendships!

Description: Make sharing expenses with friends simpler with SmartPay Wallet's new Split Bills feature.

Call-to-action: Explore Now

How I would visualize this video ad

I would use a relatable café scene, close-up smartphone shots, and clear animations showing how a bill is divided between friends. I would add upbeat background music, simple text overlays, and a final screen with the SmartPay Wallet name and CTA.

AI tools: ChatGPT for the script and storyboard, and Canva or an available AI video generator for creating the scenes and editing the final video.

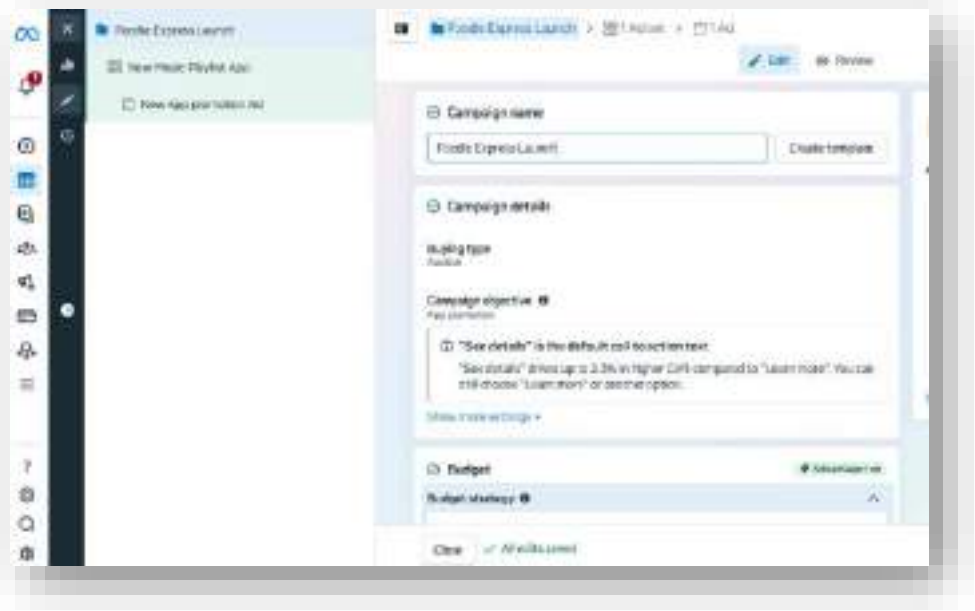

Conclusion: This ad uses a common problem, introduces a useful digital wallet feature, and ends with a clear call-to-action. SmartPay Wallet and its Split Bills feature are fictional examples created for this assignment.

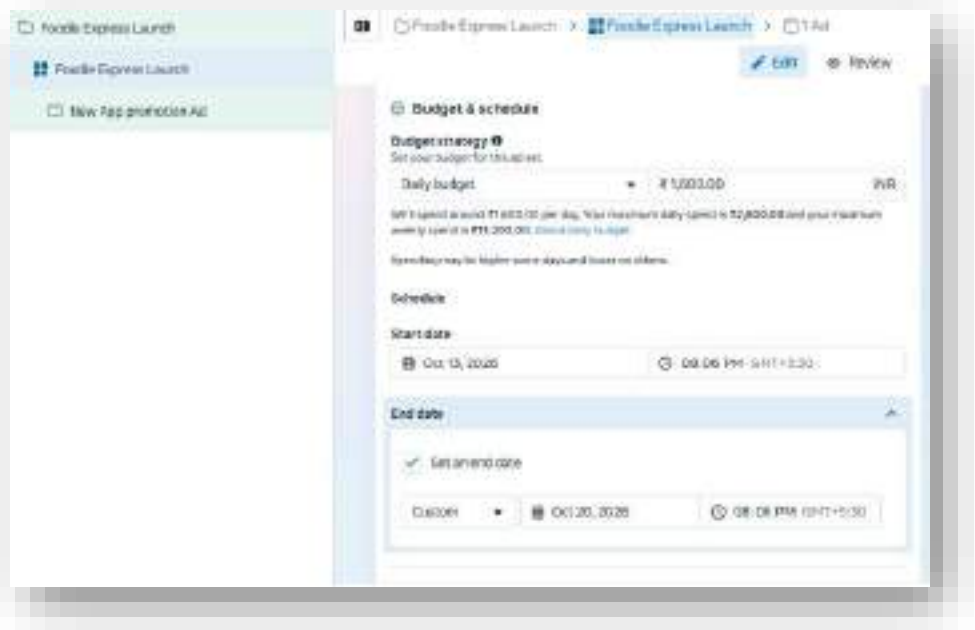

Season-6

Q-1.

Create a Meta Ads campaign draft for a new online food delivery app targeting users aged 18-25 in Ahmedabad, using at least two advanced targeting options such as Lookalike Audiences and Detailed Interest Targeting.

Ans:

Advanced Targeting Options:

1. Detailed Interest Targeting: Target users interested in street food, fast food, pizza, burgers, online food ordering, restaurants, and food delivery apps.
2. Lookalike Audience: Create a Lookalike Audience based on existing app users or customers to reach new people with similar characteristics. This option requires a suitable source audience.
3. Custom Audience: Retarget people who have already interacted with the app or its social media pages, where eligible.

Sample Ad Copy:

- Primary Text: Hungry? Discover your favourite food in Ahmedabad! Order delicious meals, explore local restaurants, and enjoy exciting launch offers with Foodie Express.
- Headline: Your Favourite Food, Delivered Fast!
- Description: Discover great food and exciting offers near you.
- CTA: Install Now

Q-2.

Design a retargeting strategy for an e-commerce fashion store using Meta Ads — outline how you would retarget users who added items to cart but did not purchase, and describe which 2-3 ad creatives or offers you would use for this audience.

Ans:

Store Name: Urban Threads

Objective: To encourage customers who added products to their shopping carts but did not complete their purchases.

Target Audience: People who added products to their carts in the last 7 days but did not purchase.

Campaign Setup:

1. Install and configure the Meta Pixel or Conversions API to track website activity.
2. Create a Custom Audience of users who added items to their carts.
3. Exclude users who completed a purchase.
4. Show retargeting ads on Facebook and Instagram.
5. Track purchases, cost per purchase, and return on ad spend.

Three Retargeting Ad Creatives:

Creative 1: Cart Reminder

- Message: “Your favourite style is waiting for you!”
- Format: Single image ad showing the clothing item.
- CTA: Shop Now

Creative 2: Special Discount Offer

- Message: “Complete your order and enjoy 10% off with a valid offer code.”
- Format: Promotional image or short video.
- CTA: Get Offer

Creative 3: Dynamic Product Ad

- Message: “Still thinking about it? Take another look at your selected styles.”
- Format: Dynamic product carousel featuring items viewed or added to the cart.
- CTA: Complete Purchase

Q-3.

Set up a sample Lead Generation Funnel for a mock event (like a college fest or IPL screening) using Meta’s Instant Forms — specify what fields you would include in the form and what follow-up action you would automate after a lead is captured.

Hint: Think about what info you actually need to collect for a real event registration and how you’ll use it.

Ans:

Event Name: College Fest 2026 – Ahmedabad

Objective: Collect registrations from interested college students using Facebook and Instagram Lead Ads.

Lead Generation Funnel

Step 1: Awareness

Show event ads to college students in Ahmedabad.

Step 2: Lead Ad

Students click “Register Now” on Facebook or Instagram.

Step 3: Instant Form

Students enter their details and submit the registration form.

Step 4: Automated Follow-up

Send a confirmation message and event details.

Fields to Include in the Instant Form:

Field	**Purpose**
Full Name	Identify the participant
Email Address	Send event information
Mobile Number	Send event updates
College Name	Understand the participant's college
Number of Tickets	Estimate attendance

Automated Follow-up Action:

After a student submits the form:

1. Save the lead details in Google Sheets or a CRM using an approved integration.
2. Send an automated confirmation email with the event date, venue, and registration details.
3. Send an SMS or WhatsApp confirmation if the required integration and user consent are available.
4. Send a reminder one day before the event.

Sample Ad Copy:

- Primary Text: “Get ready for the biggest College Fest 2026 in Ahmedabad! Enjoy music, games, food, and entertainment. Register today!”
- Headline: Register for College Fest 2026
- CTA: Sign Up

Q-4.

Download a free Meta Ads reporting template (or use Google Sheets) and customize it to track key metrics for a Zomato-style campaign: impressions, clicks, leads, cost per lead, and conversion rate. Fill in mock data for one week and highlight any trends you notice.

Ans:

Campaign Name: Foodie Express – Ahmedabad

Campaign Duration: 7 days

The following is a sample reporting sheet with fictional data for practice.

Day	Impressions	Clicks	Leads	Spend(₹)	Cost per Lead (₹)	Conversion Rate
Monday	5,000	150	15	750	50.00	10.00%
Tuesday	5,500	165	18	825	45.83	10.91%
Wednesday	6,000	180	20	900	45.00	11.11%
Thursday	6,500	195	22	975	44.32	11.28%
Friday	7,000	210	25	1,050	42.00	11.90%
Saturday	8,000	280	35	1,400	40.00	12.50%
Sunday	9,000	315	40	1,575	39.38	12.70%
Total	47,000	1,495	175	7,475	42.71	11.71%

Formulas for Google Sheets or Excel:

- Cost per Lead = Spend ÷ Leads
- Conversion Rate = Leads ÷ Clicks × 100
- Total Impressions = SUM(B2:B8)
- Total Clicks = SUM(C2:C8)
- Total Leads = SUM(D2:D8)
- Total Spend = SUM(E2:E8)

Trend Analysis:

1. Impressions increased from 5,000 on Monday to 9,000 on Sunday.
2. Leads increased from 15 to 40 during the week.
3. Cost per lead decreased from ₹50 to ₹39.38, indicating improved efficiency.

4. Conversion rate increased from 10% to 12.70%.
5. Sunday generated the highest number of leads in this sample.

Conclusion: The campaign performed better toward the weekend. The business should investigate which audience, placement, and creative performed best before increasing the budget.

Q-5.

Use ChatGPT or another AI tool to generate 3 retargeting ad copy ideas for a mobile app that helps users find the best street food in their city. Paste the prompts you used and the AI's outputs, then pick your favorite and explain why.

Ans:

App Name: Street Food Finder

Objective: Encourage people who previously visited the app or viewed food listings but did not take the desired action to return and explore street food.

Prompt Used

Generate 3 creative Meta retargeting ad copy ideas for a mobile app called Street Food Finder that helps users discover the best street food in their city. Target people who previously visited the app but did not explore or save any food places. Include primary text, headline, and call-to-action for each ad. Use simple, catchy language.

AI Outputs

Ad Idea 1: Discover Your Next Favourite

Primary Text

“Craving something delicious? Discover popular street food spots near you and find your next favourite bite!”

Headline

Find the Best Street Food Near You

CTA

Explore Now

Ad Idea 2: Your Food Adventure Awaits

Primary Text

“Your next food adventure is waiting! Explore local food favourites, discover hidden gems, and plan your next street food outing.”

Headline

Explore Local Food Gems

CTA

Download

Ad Idea 3: Don't Miss the Flavours

Primary Text

“From spicy chaat to tasty dabeli, amazing flavours are waiting to be discovered. Open Street Food Finder and explore your city's food scene!”

Headline

Your City. Your Street Food.

CTA

Open App

My Favourite Ad

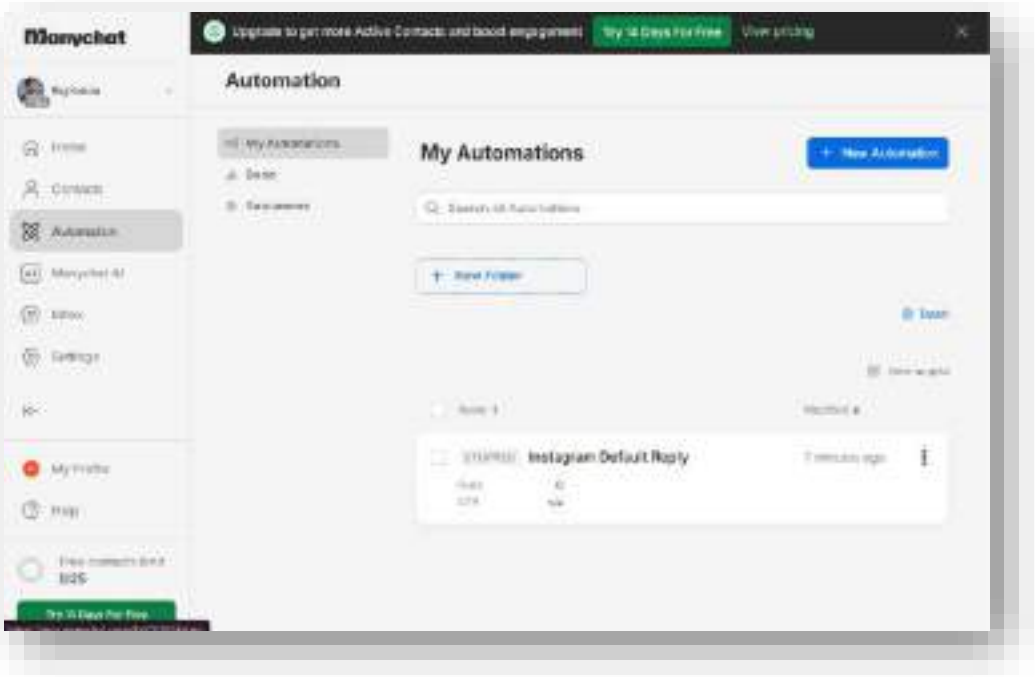

I choose Ad Idea 3: Don't Miss the Flavours.

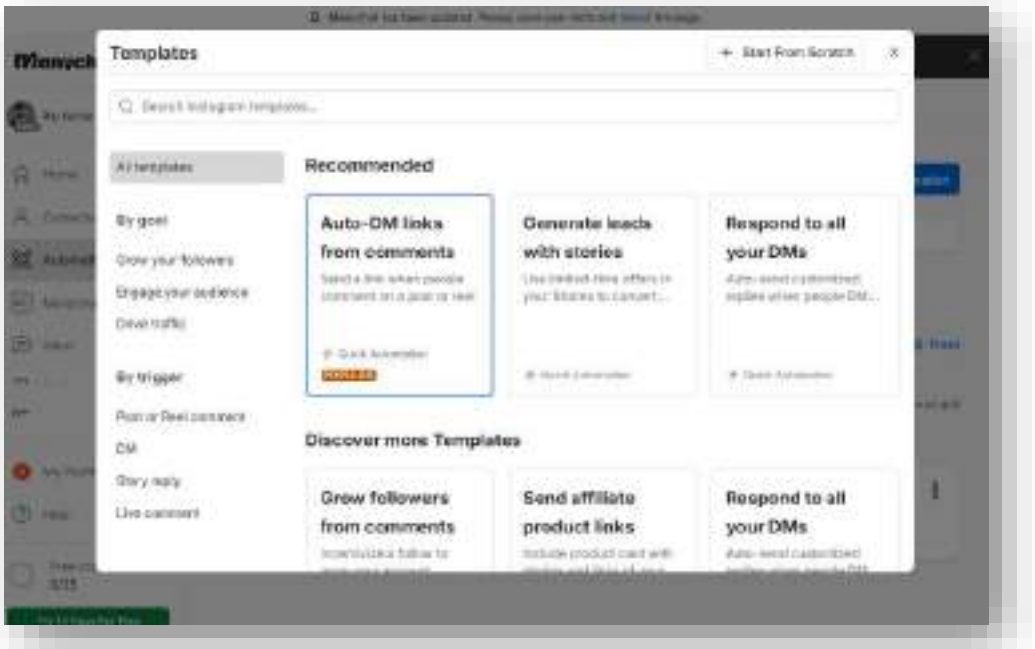

Reason: This ad uses familiar Indian street food items such as chaat and dabeli, making the message relatable to local users. It creates curiosity and encourages people to reopen the app and discover nearby food places. It is suitable for a retargeting campaign because it reminds previous visitors about the app's value.

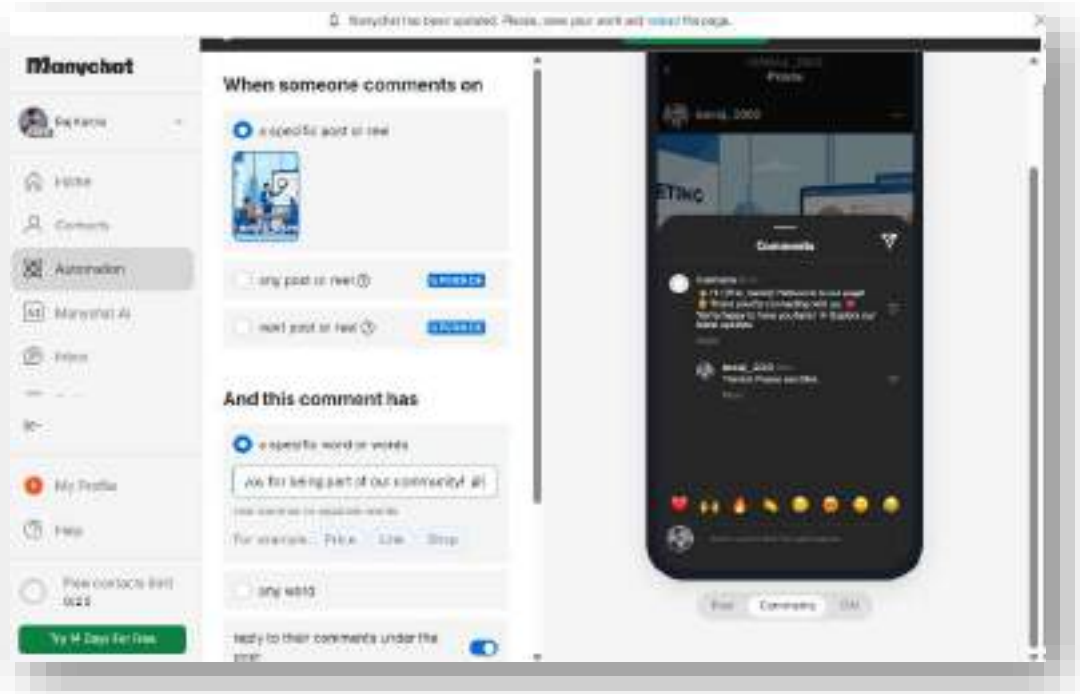

Season-7

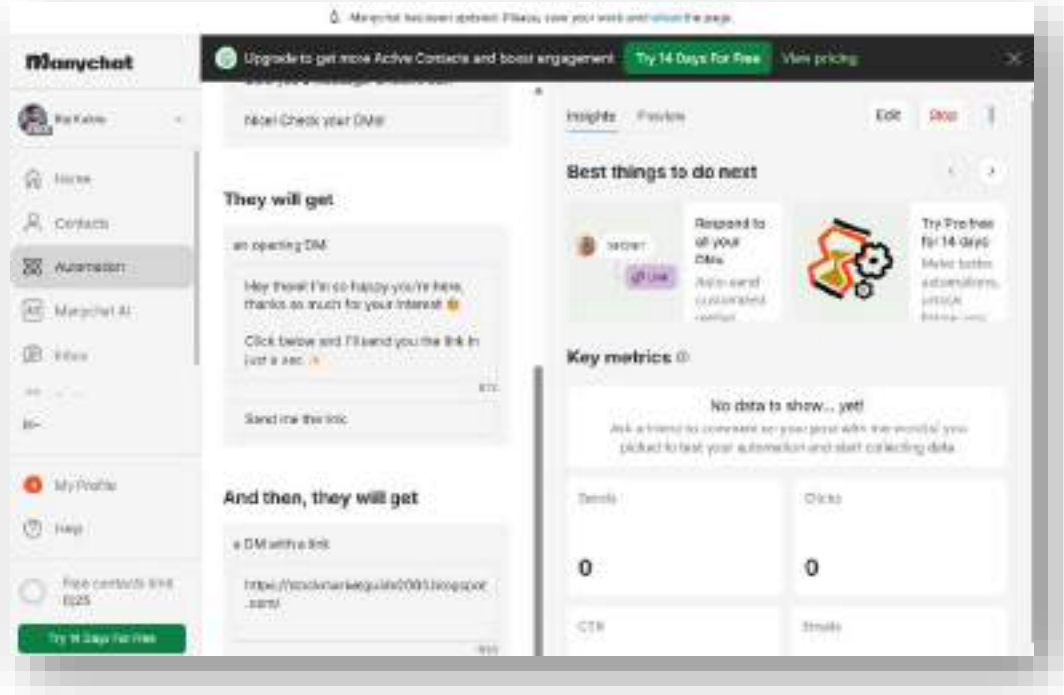

Q-1.
Set up a free ManyChat account and create a basic Messenger welcome message that greets users by their first name when they start a new chat.

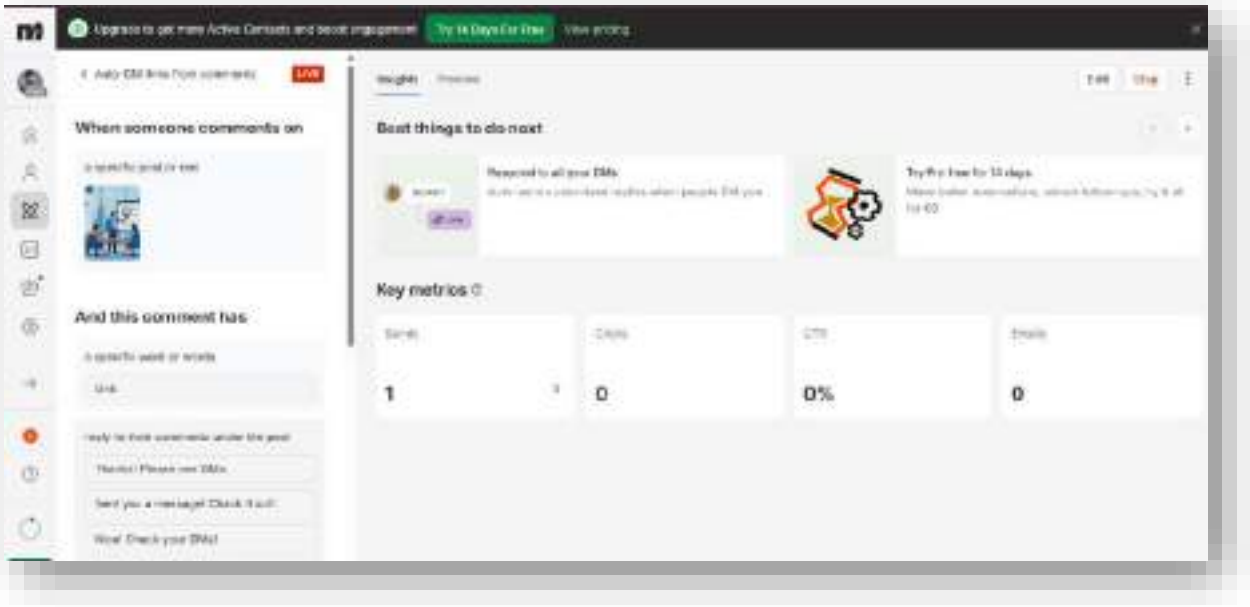

Ans:

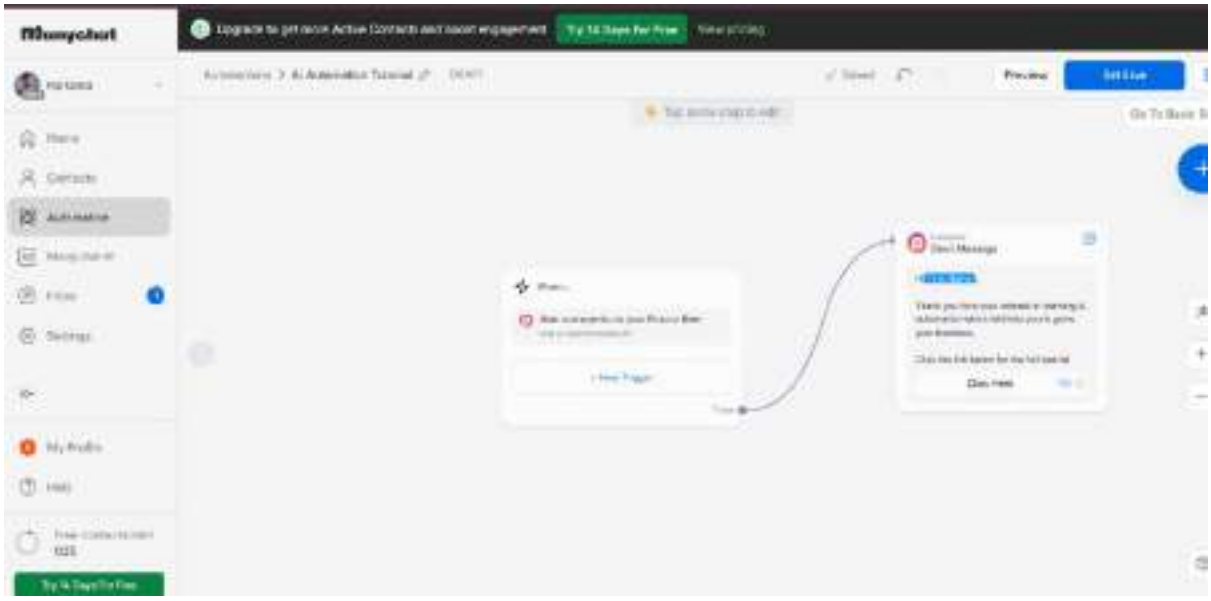

Manychat

Q-3.

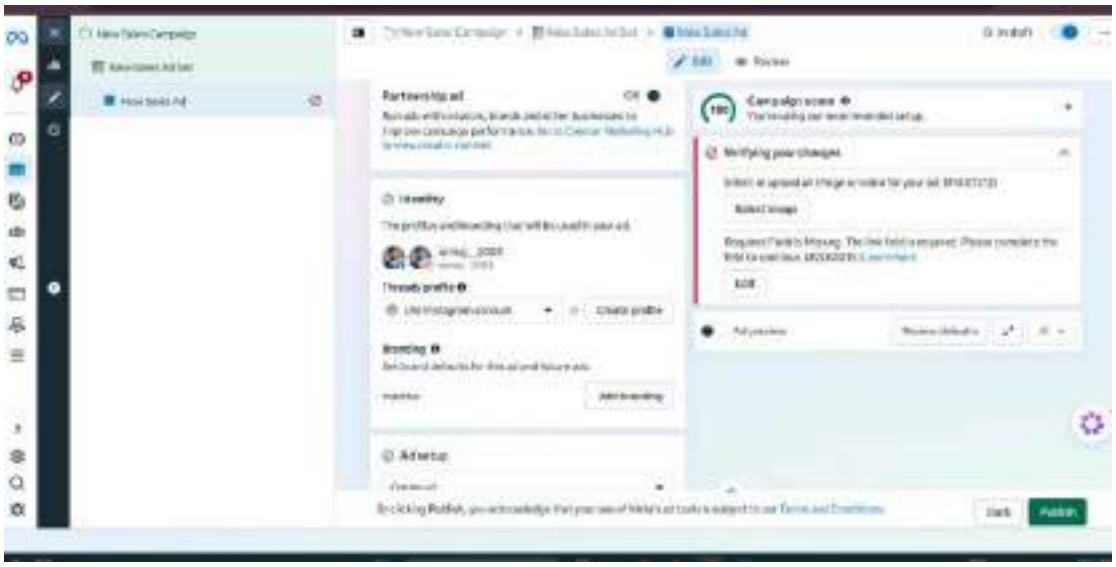

Create a simple Facebook Ads campaign draft and compare the ABO (Ad Set Budget Optimization) and CBO (Campaign Budget Optimization) settings. Write a short note on which model you would use for a new e-commerce product launch and why.

Ans:

Feature	ABO	CBO
Full form	Ad Set Budget Optimization	Campaign Budget Optimization
Budget setting	At ad set level	At campaign level
Budget control	More control over each ad set	Meta distributes the budget across ad sets
Best use	Testing different audiences	Scaling successful campaigns
Example	₹250 for each of two ad sets	₹500 campaign budget shared across ad sets

Q-4.

Research Lookalike Audiences (LLA) in Meta Ads Manager and outline the steps to create a 1% LLA based on your Instagram followers. List two scenarios where using LLA would help scale campaigns for a music event ticketing app like BookMyShow.

Ans:

A Lookalike Audience (LLA) helps advertisers reach new people who share characteristics with an existing audience, such as customers or social media engagers.

Steps to create a 1% Lookalike Audience

1. Open Meta Ads Manager.
2. Go to Audiences.
3. Create a suitable Custom Audience source from eligible Instagram account engagement or followers, where available.
4. Select Create Lookalike Audience.
5. Choose the source audience.
6. Select the target country, such as India.
7. Set the audience size to 1%.
8. Create and save the audience.
9. Select the audience in an eligible ad set when setting up the campaign.

Note: Instagram followers may not be available as a direct source in every account or setup. If that option is unavailable, use an eligible Instagram engagement Custom Audience or another permitted source. A 1% Lookalike represents people most similar to the source audience within the selected country; it does not mean that 1% of followers are selected.

5.

Use ChatGPT to draft a cold outreach message for pitching your Facebook Ads services to a local business (e.g., a new cafe or clothing store). Paste your prompt and the generated message, then edit it to make it more personal and relevant to the business.

Hint: Focus on how Messenger automation and targeted ads can help the business get more customers.

Ans:

Prompt:

Write a professional and friendly cold outreach message to pitch my Facebook Ads services to a local clothing store. Explain how targeted Facebook and Instagram ads and Messenger automation can help the store reach more customers, promote products, and generate sales. Keep the message short and personalized.

Generated Message:

Hello! 👋

I came across your clothing store and really liked your collection.

I wanted to share how Facebook and Instagram Ads could help your business reach more local customers, promote new arrivals, and increase sales.

I can also help you set up Messenger automation to answer common customer questions and share product details automatically.

Would you be interested in discussing a few marketing ideas for your store?

Thank you!

Edited and Personalized Message:

Hi RS Boutique Team! 👋

I came across RS Boutique and noticed your clothing collection. I believe targeted Facebook and Instagram Ads could help you showcase your latest arrivals to more potential customers in your area.

I can also help set up Messenger automation to answer product inquiries, share offers, and make it easier for customers to discover your products.

I'd love to share a few simple marketing ideas tailored to RS Boutique. Would you be open to a quick discussion?

Thank you! 😊

Season-8

Q-1.

Create a new Instagram account (or use a secondary account), set a profile photo, and write a bio that clearly describes your main interest or theme in under 150 characters.

Ans:

Account Theme: Digital Marketing

Username: @digitalmarketer_raj

Name: Digital Marketer | SEO & Ads

Profile Photo: A simple digital marketing logo created using ChatGPT with the Professional Photo.

Instagram Bio (under 150 characters):

☑ Digital Marketing Learner
🔍 SEO | Social Media | Google Ads
💡 Learning, Creating & Growing
🚀 Follow for Marketing Tips

Explanation: My Instagram account focuses on digital marketing, SEO, social media marketing, and online advertising. I will share useful tips, learning experiences, and marketing content to connect with people interested in digital marketing.

Q-2.

**Design and upload 3 Instagram Story Highlights with custom covers — one for 'Food', one for 'Travel', and one for 'Music' — and add at least 2 stories to each highlight.

Hint: Use Canva or any free online tool to create simple highlight covers if needed.**

Ans:

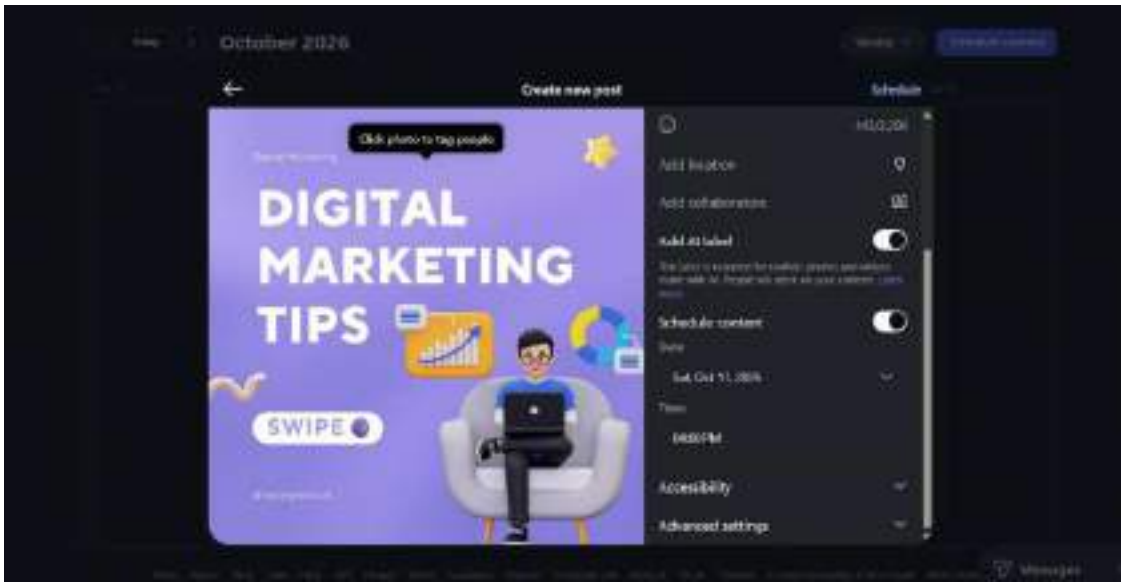

Stories to add to each highlight:

Highlight	Story 1	Story 2
Food	My favourite food	A delicious meal or restaurant
Travel	A favourite travel destination	A beautiful place or travel memory
Music	My favourite song	A favourite singer or playlist

Q-3.

Write and schedule an Instagram post and a Reel (can be drafts if you prefer) following best practices: include a catchy caption, 3-5 relevant hashtags, and a call-to-action like 'Save for later' or 'Tag a friend'.

Ans:

Q-4.

Research and list 10 trending hashtags and 10 high-search keywords relevant to your chosen theme (e.g., food, travel, or music). For each, explain why you think it will help your post reach more people.

Hint: Use Instagram search and explore page to spot trending tags and keywords.

Ans:

Chosen theme: Digital Marketing

Hashtags help categorise content, while keywords help Instagram understand the topic of a post. The following are relevant hashtags and keyword ideas; their popularity and search volume can change, so I would verify them using Instagram Search and Explore before posting.

A. Ten relevant hashtags

No.	Hashtag	Why it may help
1	#DigitalMarketing	Reaches people interested in online marketing.
2	#DigitalMarketingTips	Targets users looking for practical advice.
3	#SEO	Connects content with search engine optimisation topics.
4	#SocialMediaMarketing	Reaches social media marketers and business owners.
5	#GoogleAds	Targets people interested in paid search advertising.
6	#ContentMarketing	Attracts users interested in content creation.
7	#MarketingStrategy	Connects posts with marketing planning topics.
8	#InstagramMarketing	Reaches people learning to grow Instagram accounts.
9	#LearnDigitalMarketing	Targets beginners and students.
10	#PPC	Reaches people interested in pay-per-click advertising.

B. Ten high-search keyword ideas

No.	Keyword	Why it may help
1	Digital marketing	Matches the overall topic and audience interest.
2	Digital marketing for beginners	Targets people starting their learning journey.
3	SEO tips	Matches users looking for SEO advice.
4	Social media marketing	Connects content with social media strategies.

5	Google Ads tutorial	Targets people learning paid advertising.
6	Instagram growth tips	Attracts creators and businesses seeking growth.
7	Content marketing strategy	Matches users interested in content planning.
8	Keyword research	Targets SEO learners and website owners.
9	Meta Ads tutorial	Reaches people learning Facebook and Instagram advertising.
10	Digital marketing course	Targets students looking for digital marketing education.

5.

Summarize in your own words how the 2026 Instagram algorithm prioritizes content for the Explore page and Reels feed. List 3 specific strategies you would use to grow your account based on this knowledge.

Ans:

How the Instagram algorithm works in 2026

Instagram does not use just one algorithm. It uses different ranking systems for the Feed, Explore page, and Reels. These systems try to recommend content that matches each user's interests and behaviour.

Explore page: Instagram recommends content based on users' interests and past interactions. Posts that attract likes, saves, and shares may have a better chance of reaching people who do not follow the creator.

Reels feed: Important signals include watch time, likes, and sends (sharing a Reel with someone). Original, engaging videos that hold viewers' attention can improve their chances of being recommended.

Three strategies I would use to grow my account

1. Create engaging and original content

I would publish useful digital marketing tips, SEO tutorials, and short educational Reels. I would start videos with an interesting hook to encourage viewers to keep watching.

2. Post consistently and use relevant keywords

I would follow a weekly content schedule, write clear captions, and use three to five relevant hashtags. I would include keywords such as “SEO tips” and “digital marketing for beginners.”

3. Encourage engagement and analyse performance

I would encourage people to save and share posts, reply to comments, and review Instagram Insights. I would use watch time, likes per reach, and shares per reach to identify successful content and improve future posts.

Season-9

Q-1.

Open your Instagram account and analyze your last 10 posts — for each, note the number of Sends (shares via DM), Likes, Comments, and Saves. Identify which post had the highest Sends and suggest two reasons why it might have performed better in the algorithm.

Ans:

Objective: To analyze Instagram engagement metrics and identify which post received the highest number of Sends.

The following is a sample analysis for an Instagram account. Replace the sample numbers with the actual data from your last 10 posts.

Post	Sends	Likes	Comments	Saves
Post 1	12	120	8	15
Post 2	25	180	12	30
Post 3	8	95	5	10
Post 4	40	250	20	55
Post 5	15	140	10	18
Post 6	18	160	9	22
Post 7	10	110	6	12
Post 8	32	210	16	40
Post 9	6	80	4	8
Post 10	22	175	11	28

Post with the highest Sends: Post 4, with 40 Sends.

Two reasons why it might have performed better:

1. Relatable and shareable content: The post may have included useful information, humor, or an interesting idea that people wanted to share with friends through direct messages.

2. Better audience engagement: More people sharing the post may help Instagram identify it as relevant content and recommend it to other users. Sends are one of the signals that can contribute to content ranking, although performance depends on several factors.

Q-2.

Create a mock Instagram ad for a new Zomato restaurant launch — design the ad image and write a catchy caption. Specify whether you would place it in Reels, Stories, or Explore, and explain your choice in 2-3 lines.

Ans:

Mock ad caption:

🍽️ **New Vibes, New Flavours!** 🍕

The Spice Haven is now LIVE on Zomato! ♡

From aromatic biryanis to mouth-watering starters, discover your new favourite food destination.

🔥 Fresh flavours. Delicious food. Happy moments.

🛵 Order now on Zomato and enjoy a feast at home!

#Zomato #RestaurantLaunch #FoodLovers #FoodieLife #NewRestaurant

Reason for choosing Reels:

- Short food videos showing sizzling dishes and delicious food can capture attention quickly.
- Reels can help reach new audiences through engaging video content and encourage people to share the ad with friends.

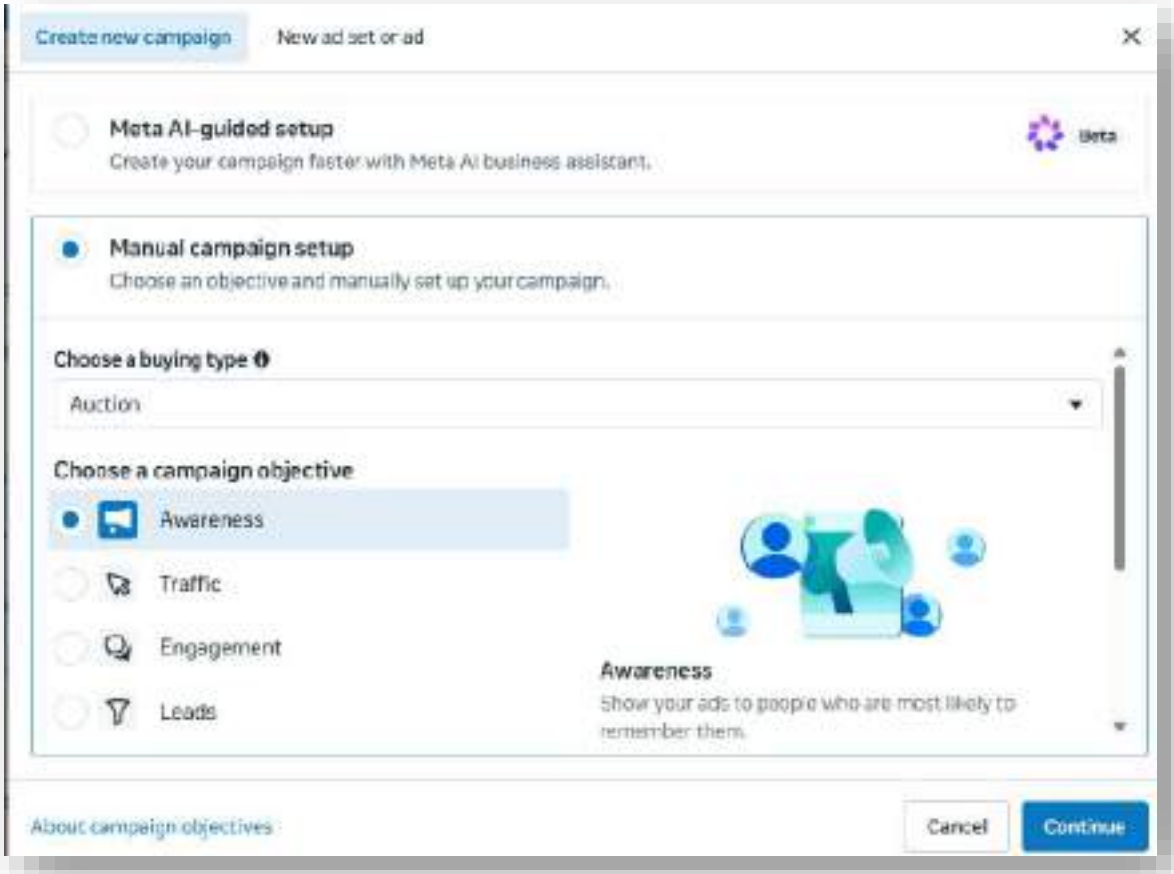

Q-3.

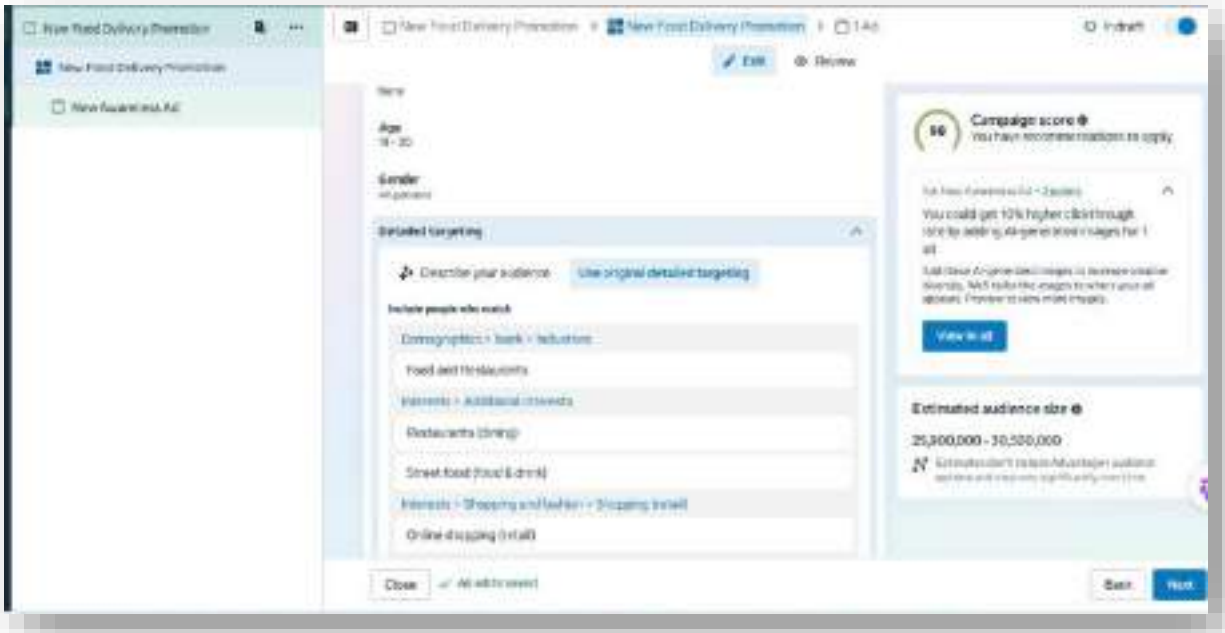

Use Meta Ads Manager to simulate setting up an Instagram ad campaign: choose your objective, audience, placement (Reels, Stories, or Explore), and budget. Take screenshots of each step and submit them.

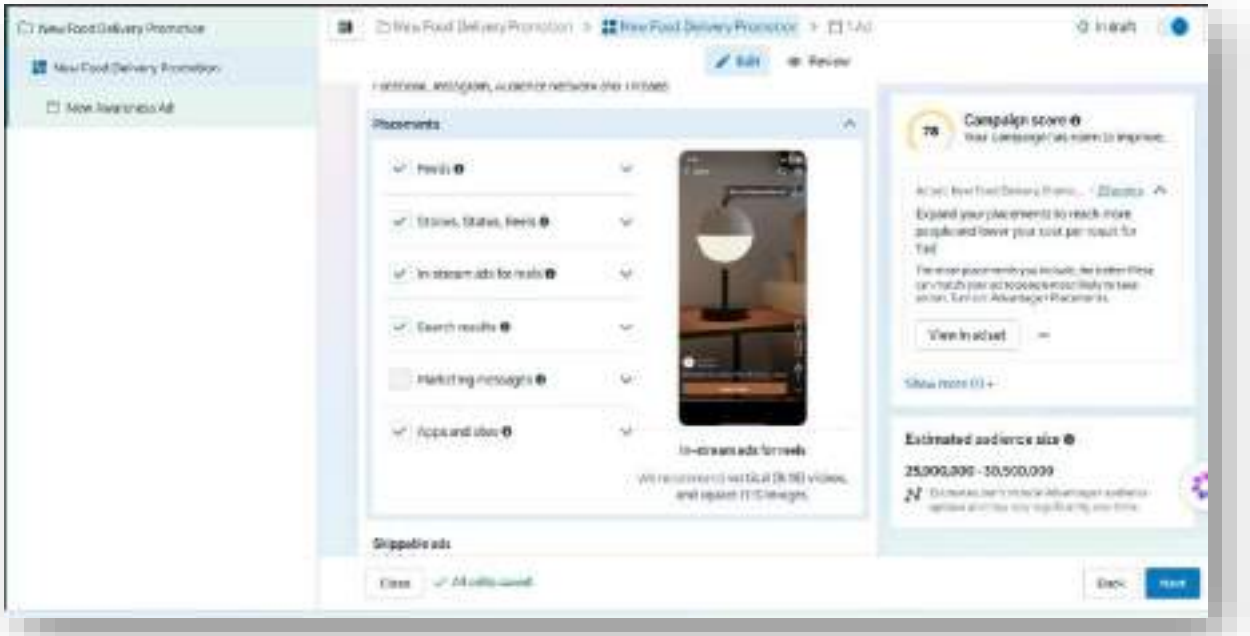

Hint: You can use the 'Preview' mode without actually running the ad or spending money.

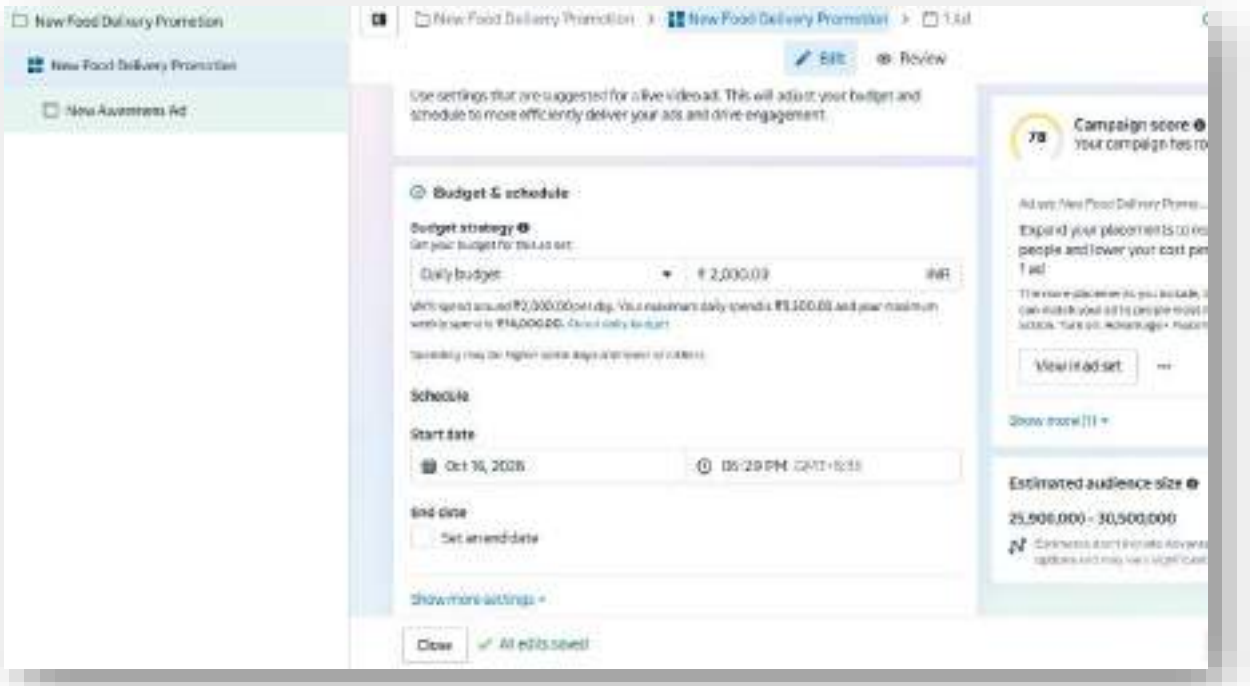

Ans:

Q-4.

Pick a brand (not discussed in class) that you follow on Instagram and research how they use Reels or Stories to boost engagement. List 3 specific tactics they use and explain how each one might influence the algorithm or ad performance.

Ans:

Brand: Nike

Nike uses athlete stories, sports videos and creative campaigns to connect with audiences. Its June 2026 “Rip the Script” football campaign features athletes, entertainment figures and football culture in a storytelling-led campaign

Three Instagram engagement tactics

1. Short-form sports storytelling: Nike uses exciting sports moments and athlete-focused storytelling. Strong opening visuals can encourage viewers to watch longer and share videos with friends.

2. Behind-the-scenes content: Showing athletes, training sessions and campaign production can make content feel more personal. This may encourage viewers to comment, share and engage with the brand. Nike also publishes behind-the-scenes campaign stories.

3. Cultural collaborations and community stories: Nike connects sports with music, fashion and local football communities. This can attract different audience groups and encourage discussions, shares and repeat engagement.

Q-5.

Imagine you are consulting for a new indie music artist. Using ChatGPT, generate 3 creative Instagram Reel ideas to maximize Sends and Saves. Paste your prompt and the AI's response, then pick your favorite and explain why it would work well for the algorithm.

Ans:

Idea 1: Behind the Song

- Concept: Show how the artist creates a song in a home studio.
- Visuals: Record a short clip of writing lyrics, recording vocals and playing an instrument.
- Caption: “Every song has a story. 🎶 Send this to someone who loves indie music!”
- Why it works: Personal storytelling may create an emotional connection and encourage viewers to share the Reel.

Idea 2: Aesthetic Lyric Reel

- Concept: Highlight the most meaningful lyrics from an original song.
- Visuals: Use sunset footage, city lights or rain with animated lyrics on the screen.
- Caption: “Save this Reel for the days when you need these words. 🤍”
- Why it works: Relatable lyrics and attractive visuals may encourage people to save the Reel and revisit it later.

Idea 3: Finish the Chorus Challenge

- Concept: Sing the first half of a catchy chorus and invite followers to finish it.
- Visuals: Record a short performance with lyrics on screen and leave a pause for audience participation.
- Caption: “Can you finish this chorus? 🎤 Tag a friend and duet your version!”
- Why it works: An easy participation challenge can encourage comments, shares, remixes and user-generated content.

My favorite idea: Idea 2 — Aesthetic Lyric Reel

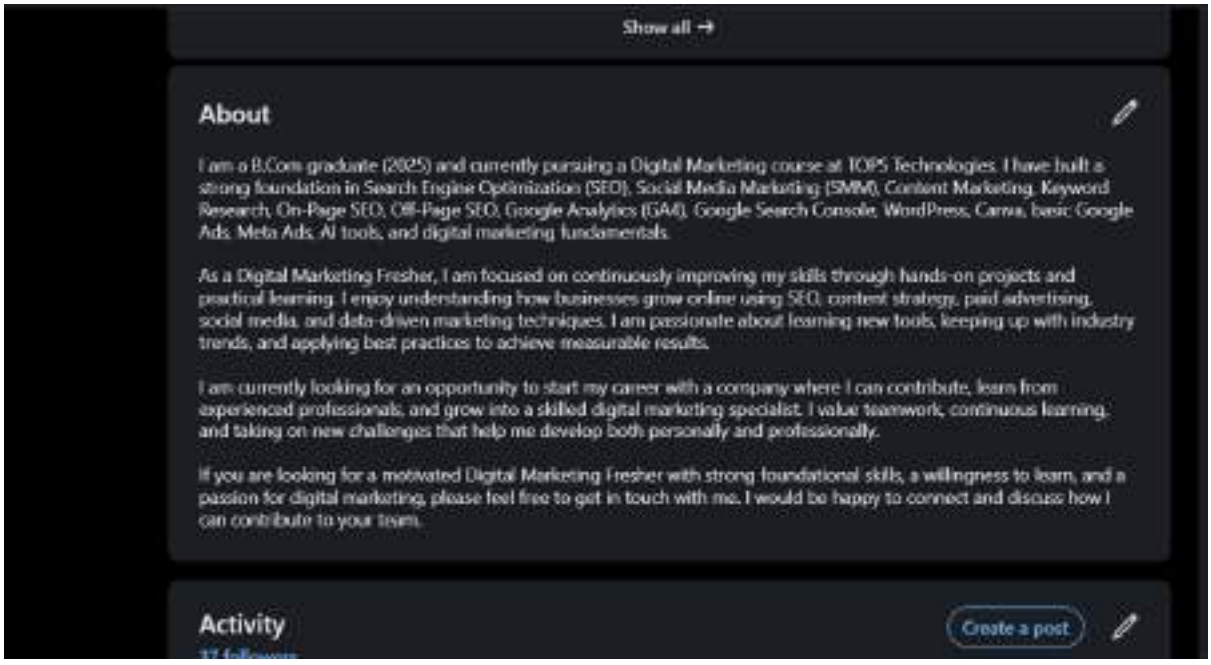

I would choose the Aesthetic Lyric Reel because music often connects with people's emotions. Viewers may save the Reel to listen to again or send it to someone who relates to the lyrics. These actions can help the artist build awareness and reach new listeners, although results depend on the content and audience.

Season-10

Q-1.
Update your LinkedIn profile headline and summary to clearly highlight your skills and career goals, using at least two keywords relevant to your target industry.

Ans:

Q-2.

**Write and publish a LinkedIn post that shares a recent achievement or project (real or hypothetical), using a relevant hashtag and a call-to-action to encourage engagement.

Hint: Use a question or invite opinions at the end of your post to boost comments.**

Ans:

Note: This is my actual post in LinkedIn profile.

Q-3.

Research and list 3 best practices for optimizing a LinkedIn business page for lead generation, and explain how each practice increases visibility or attracts potential clients.

Ans:

Best practice	**Explanation**	**How it helps generate leads**
1. Complete the company profile	Add a professional logo, cover image, company description, website, industry, and contact details.	Builds trust and helps potential clients understand the business.
2. Publish valuable and relevant content	Share industry tips, case studies, project updates, videos, and useful articles regularly.	Increases engagement, improves visibility, and attracts the right audience.
3. Use clear calls-to-action (CTAs)	Include actions such as “Visit Our Website,” “Contact Us,” or “Request a Demo” where appropriate.	Encourages interested visitors to take the next step and become potential leads.

Conclusion: A complete LinkedIn business page, valuable content, and clear CTAs can help a business build credibility, increase visibility, and attract potential customers.

Q-4.

Create a comparison table with at least 5 points showing the differences between Facebook and LinkedIn for business marketing, focusing on audience, content style, ad formats, engagement, and analytics.

Ans:

Comparison point	**Facebook**	**LinkedIn**
1. Audience	General consumers, communities, and people with diverse interests.	Professionals, recruiters, business owners, and decision-makers.
2. Content style	Entertaining videos, reels, images, offers, and lifestyle content.	Professional posts, industry news, business insights, and case studies.

3. Ad formats	Image ads, video ads, carousel ads, Stories ads, and lead ads.	Sponsored Content, video ads, document ads, message-based ads, and lead generation forms.
4. Engagement	Likes, comments, shares, reactions, and community interactions.	Professional discussions, comments, reposts, and industry networking.
5. Main marketing goals	Brand awareness, online sales, website traffic, and consumer engagement.	B2B marketing, professional networking, recruitment, and lead generation.
6. Targeting options	Age, location, interests, behaviors, and custom audiences.	Job title, job function, industry, company size, seniority, and professional skills.
7. Analytics	Meta Business Suite and Ads Manager provide reach, engagement, clicks, and conversion metrics.	LinkedIn Page analytics and Campaign Manager provide impressions, clicks, engagement, and conversion metrics.

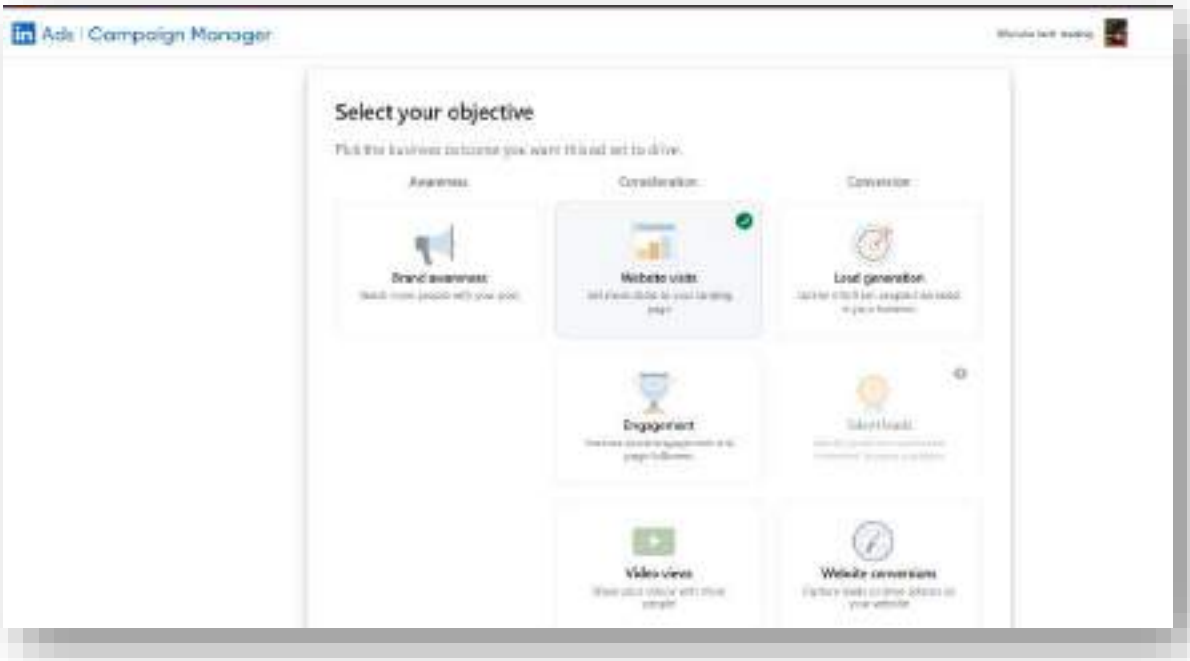

Conclusion: Facebook is particularly useful for reaching consumers and promoting products, while LinkedIn is especially useful for professional networking, B2B marketing, and reaching business decision-makers. The best platform depends on the target audience and business goals.

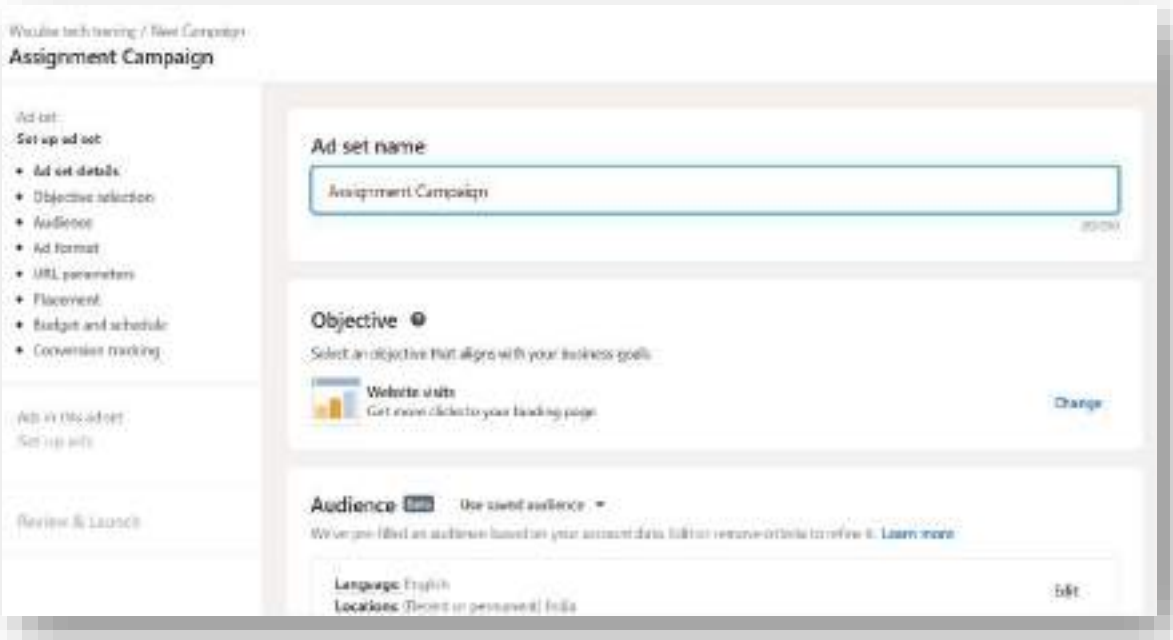

Q-5.

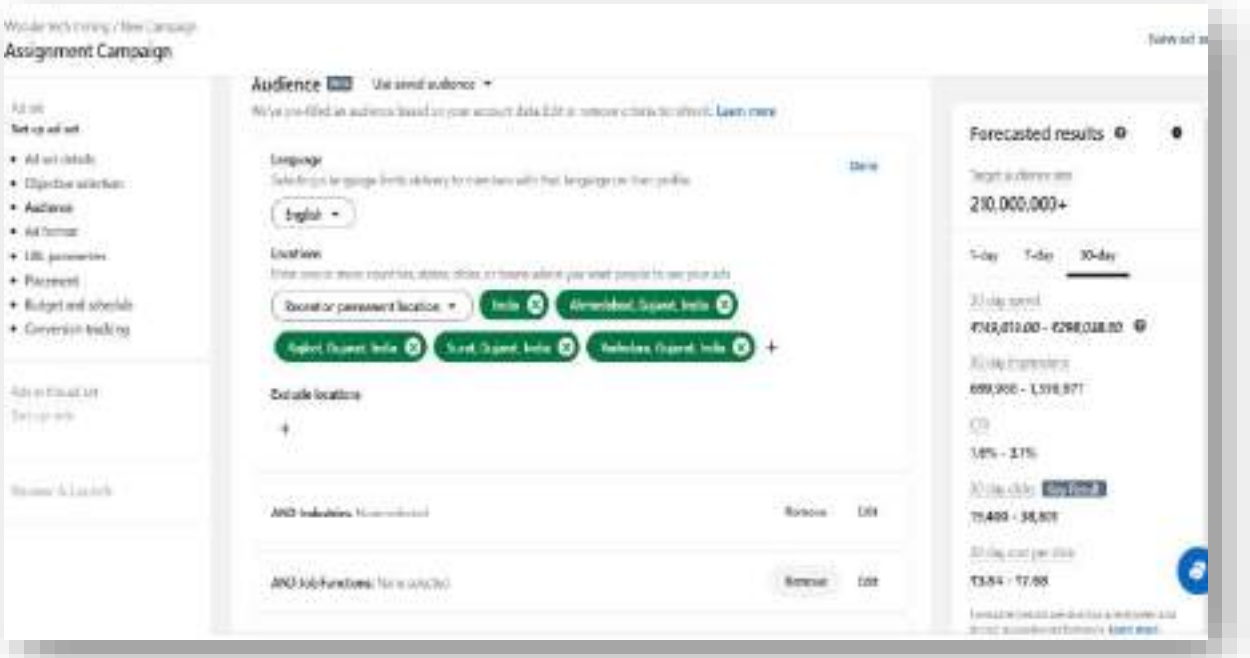

**Explore LinkedIn Campaign Manager and describe the steps to set up a simple sponsored content ad for a business page, including choosing audience targeting options.

Hint: You do not need to actually publish the ad, just outline the process and options you would select.**

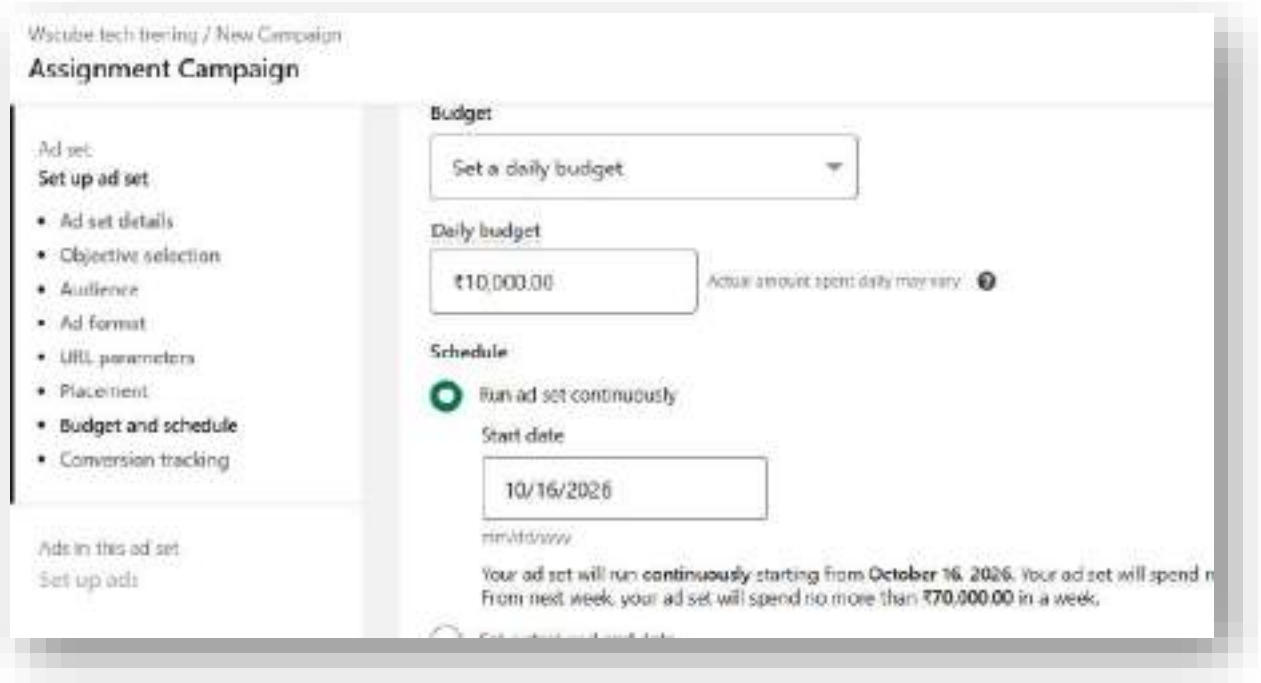

Ans:

Assignment Campaign
Audience
Forecasted results
210,000,000+

Assignment Campaign
Forecasted results
51,000,000+
URL tracking parameters (optional)

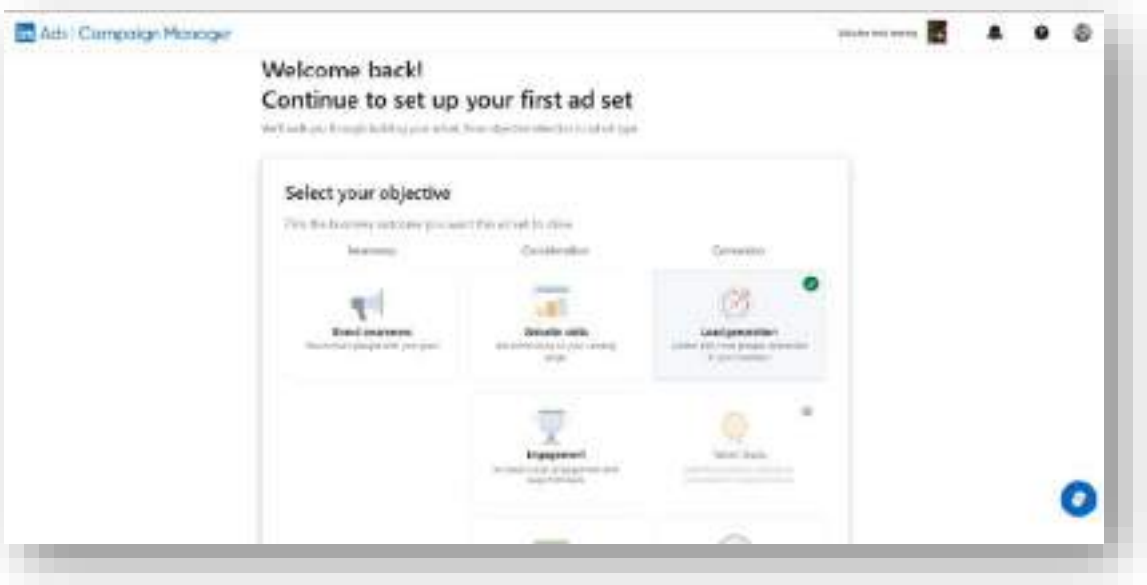

Expected result: A draft LinkedIn sponsored content campaign targeting relevant business professionals in Ahmedabad, designed to drive website visits and attract potential clients.

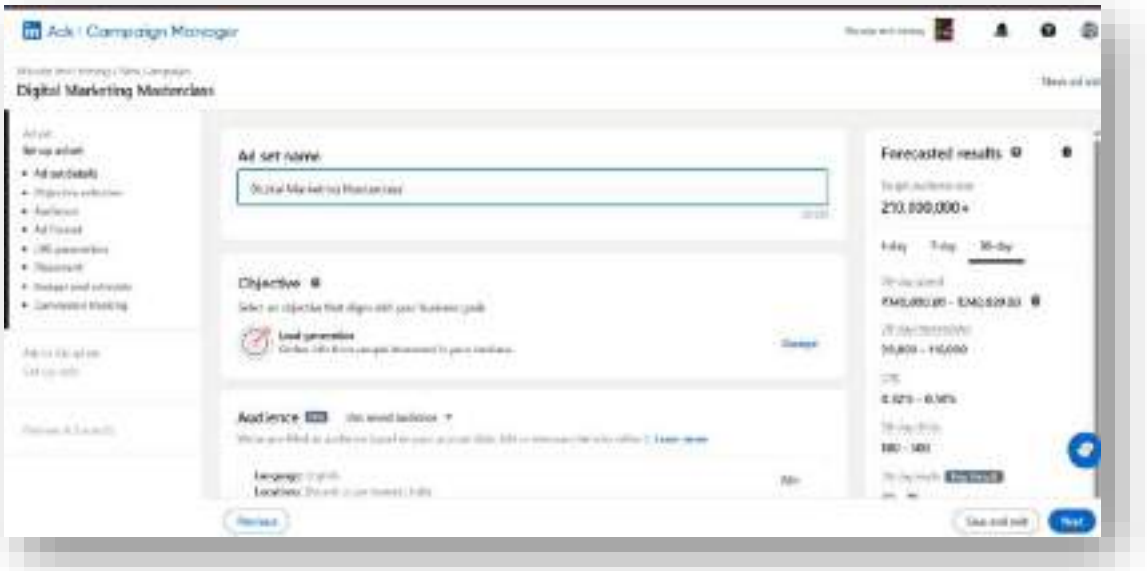

Conclusion: LinkedIn Campaign Manager allows businesses to create targeted advertisements by selecting campaign objectives, professional audience attributes, ad formats, budgets, and schedules. Careful targeting and relevant ad content can help improve campaign performance and generate business leads.

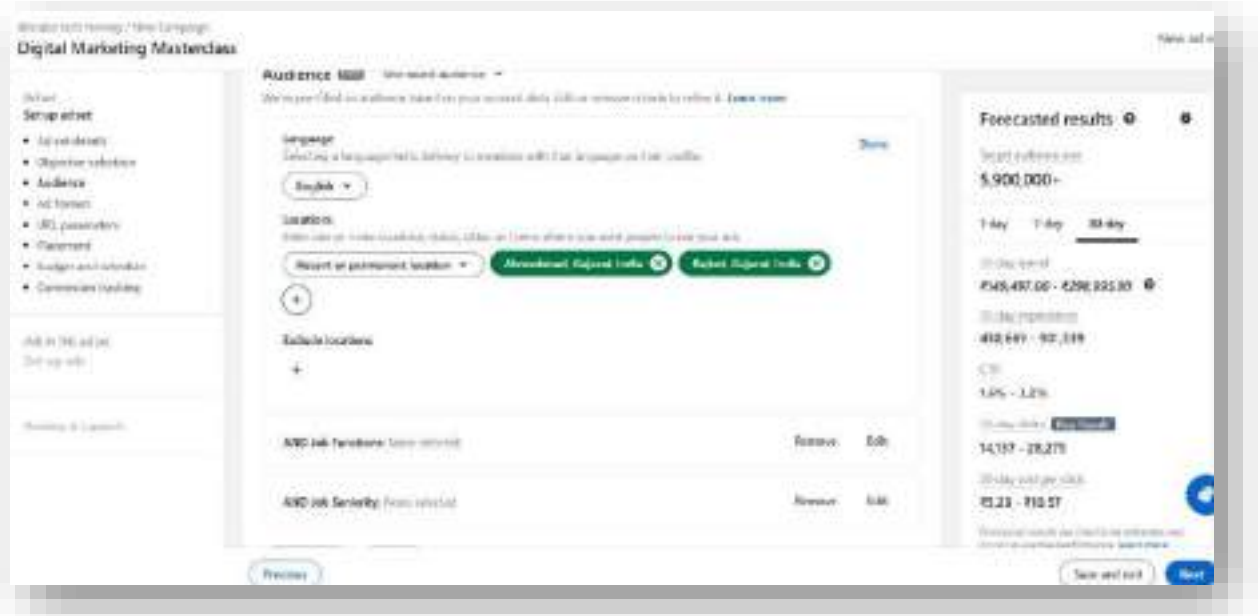

Season-11

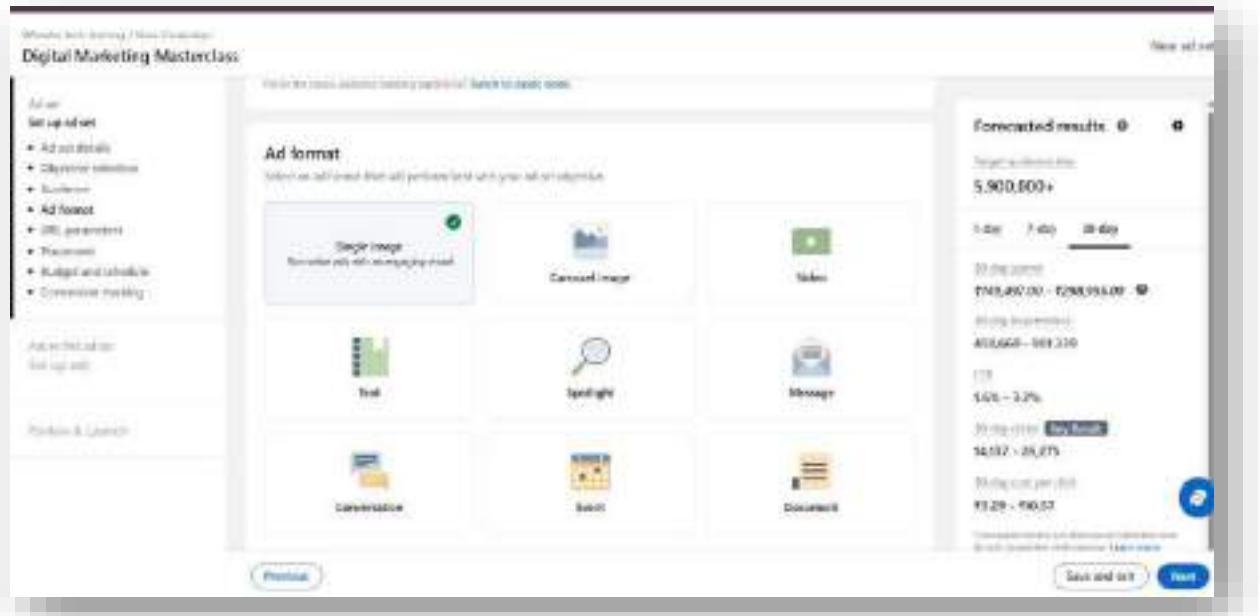

Q-1.
Create a LinkedIn ad campaign draft for a fictional online course using the LinkedIn Campaign Manager demo tool — select an ad objective (e.g., Website Visits), and list which Sponsored Content format you would choose and why.

Ans:

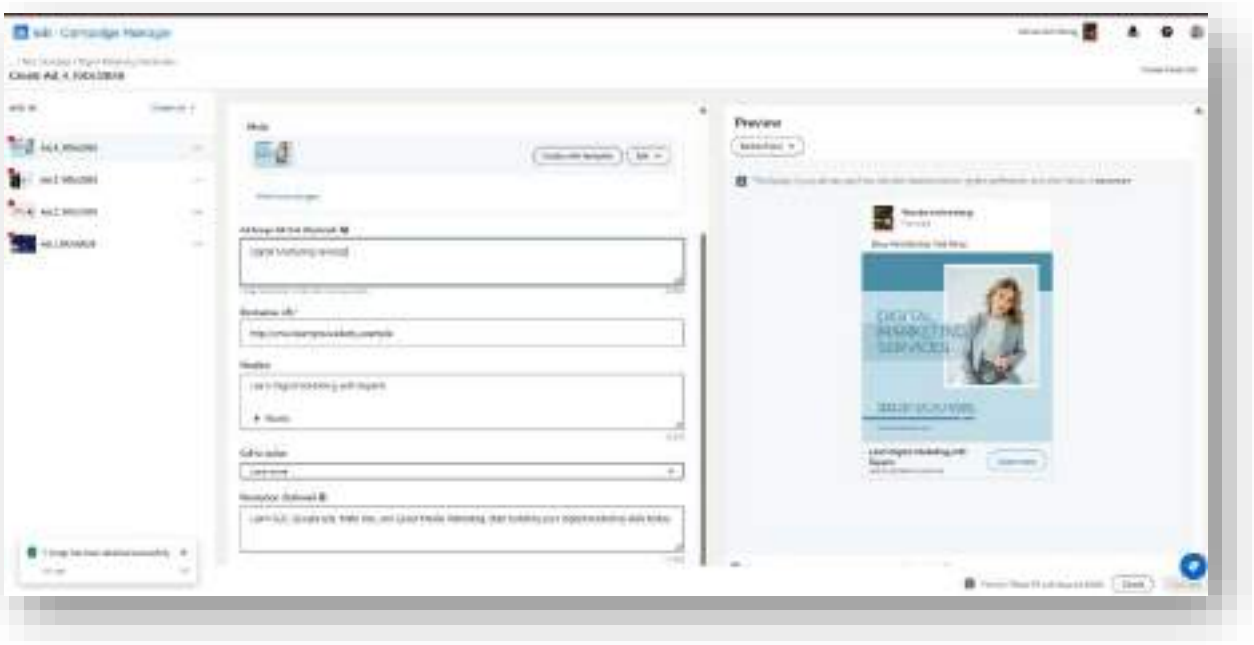

Why I Chose This Format:

I would choose a Single Image Ad because it is simple, attractive, and easy to understand. It allows me to highlight the course benefits and encourage users to visit the website. The Website Visits objective helps attract relevant users to the course landing page.

Q-2.

**Design a LinkedIn Dynamic Ad mockup for a new music app, showing how you would personalize the ad with the user's profile photo and name.

Hint: Use placeholders like {FirstName} and {ProfileImage} in your design to simulate LinkedIn's personalization.**

Ans:

App Name: MelodyBeat

Campaign Goal: Increase music app downloads and brand awareness.

Ad Format: LinkedIn Dynamic Ad mockup with personalized user details.

Dynamic Ad mockup details

MelodyBeat — Your Music, Your Mood

Personalized LinkedIn Dynamic Ad

Hi, {FirstName}!

Profile photo: {ProfileImage}

Discover new music based on your taste. Enjoy personalized playlists, offline listening, and discover new artists with MelodyBeat.

MelodyBeat

Your music. Your vibe.

Personalized playlists • New artists

Install Now

Personalization: The placeholders {FirstName} and {ProfileImage} represent the user's first name and profile photo. In a real LinkedIn ad, the platform controls which profile details can be displayed, based on its ad format and eligibility rules.

Why I chose this design: Personalized ads can attract attention by making the message feel relevant to each user. The music-themed visuals and clear “Install Now” CTA encourage users to explore the app.

Q-3.

Set up a sample billing scenario: research and list the steps required to add a payment method and set a daily budget for a LinkedIn ad account, including any minimum spend requirements.

Ans:

Sample billing scenario

Item	**Sample setting**
Campaign name	LearnPro Course Promotion
Payment method	Credit/debit card, if supported
Daily budget	₹1,000

Campaign duration	7 days
Planned budget	₹7,000
Billing check	Review charges and payment status

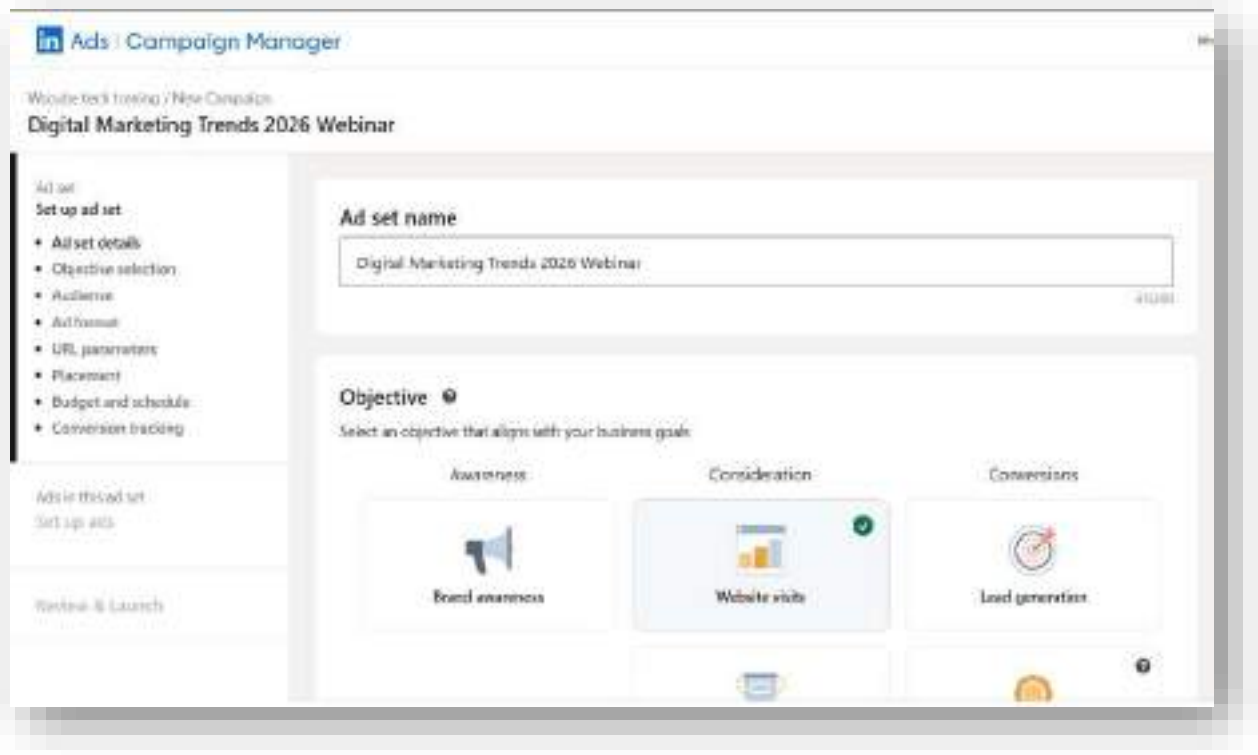

Minimum spend requirements: LinkedIn's published guidance lists a minimum daily budget of and a minimum lifetime budget of ₹10,000 for new, inactive campaigns. Once a campaign launches, the minimum lifetime budget is based on the daily minimum multiplied by the scheduled days. The exact amount and available payment methods may vary by currency, account, and campaign setup. Check the amounts shown in your own Campaign Manager account.

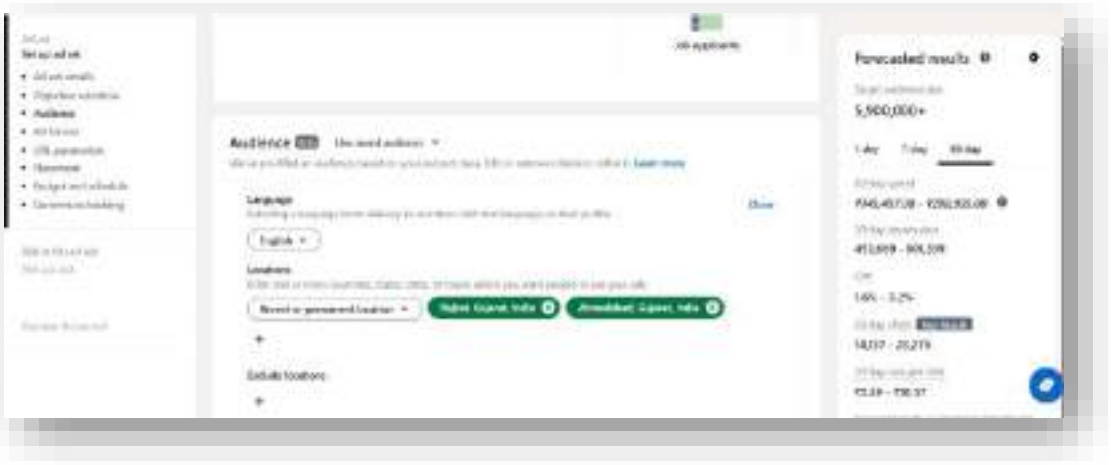

Q-4.

**Write a short plan for scheduling a Message Ad campaign on LinkedIn to promote an upcoming webinar, specifying the ideal days/times to send messages and how you would avoid spamming users.

Hint: Consider LinkedIn user activity patterns and frequency caps.**

Ans:

Campaign Name: Digital Marketing Trends 2026 Webinar

Campaign Objective: Generate webinar registrations.

Target Audience: Digital marketing students, marketing professionals, business owners, and job seekers interested in digital marketing.

Ad Format: Sponsored Messaging, using an eligible Message Ad format.

Sample message

Subject: Join Our Digital Marketing Trends 2026 Webinar

Hi {FirstName},

Would you like to learn about the latest digital marketing trends?

Join our free webinar, **Digital Marketing Trends 2026**, to discover useful insights about SEO, social media marketing, and paid advertising.

Date: 25 October 2026
Time: 11:00 AM–12:00 PM IST

Register today to reserve your spot!

CTA: Register Now

We hope to see you there!

Ideal scheduling plan

Day and time (IST)	**Plan**
Tuesday, 10 AM–12 PM	Test the first message
Wednesday, 2 PM–4 PM	Test an alternative time
Thursday, 10 AM–12 PM	Use the better-performing time for future campaigns

These are suggested testing windows, not guaranteed peak times. Audience behavior may differ, so I would compare delivery, clicks, and registrations before deciding.

How to avoid spamming users

- Target only relevant professional audiences.
- Send one useful invitation instead of repeated promotional messages.
- Avoid sending multiple reminders to the same person.
- Exclude people who have already registered.
- Provide a clear registration link and respect user preferences.
- Monitor campaign performance and stop ineffective messaging.

Q-5.

Use an AI tool like ChatGPT to find and summarize two safe LinkedIn automation tools for ad reporting or campaign management, including one key feature and a safety tip for each.

Ans:

I would choose tools focused on authorized advertising data and reporting rather than automated connection requests, scraping, or bulk unsolicited messages.

1. LinkedIn Campaign Manager

Official LinkedIn advertising platform

Key feature: Tracks ad performance, including impressions, clicks, spending, and conversions, and lets advertisers manage campaign budgets and schedules.

Safety tip: Use authorized account access, set budget limits, and review targeting and campaign performance regularly.

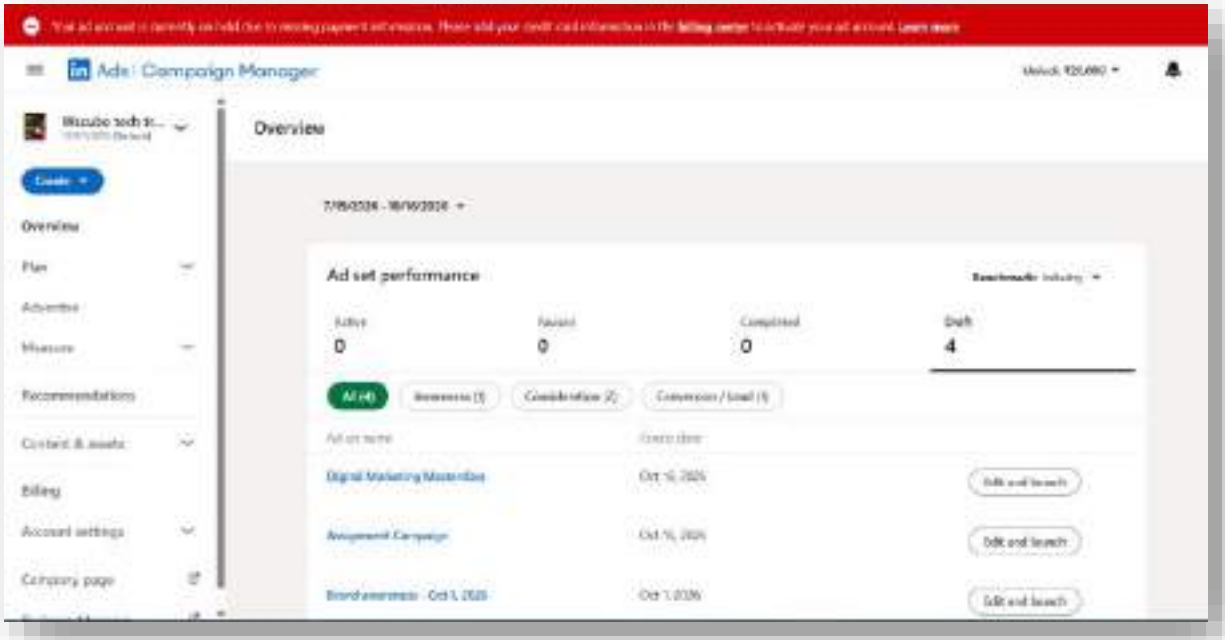

2. Supermetrics

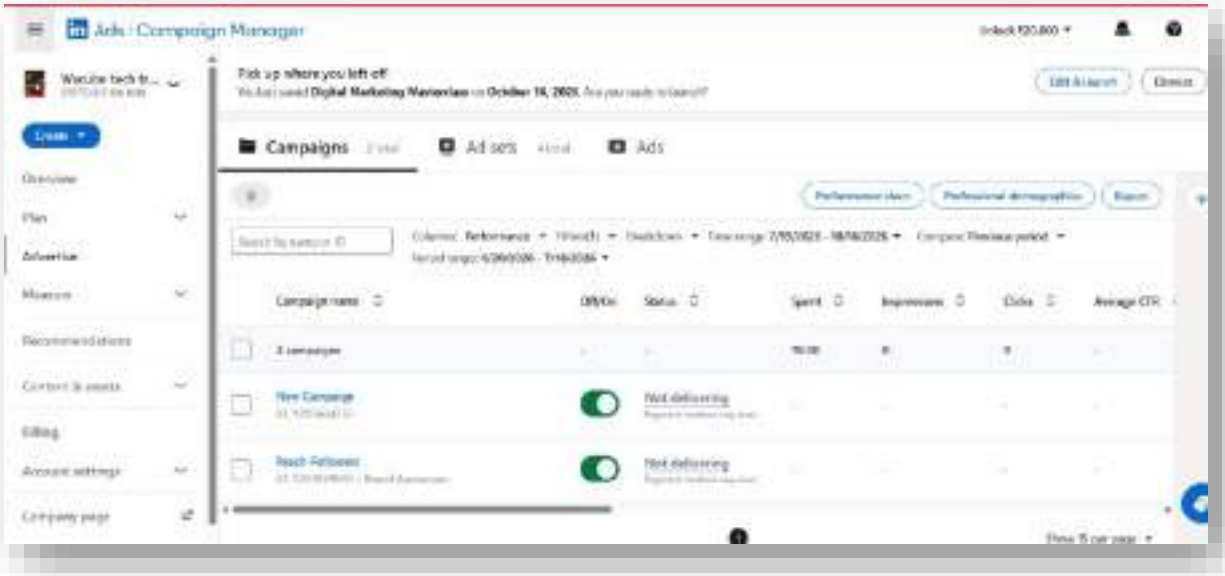

LinkedIn Marketing Partner for reporting

Key feature: Automatically transfers LinkedIn Ads data into reporting tools such as Google Sheets, Looker Studio, and Power BI to create dashboards and reports.

Safety tip: Connect only authorized advertising accounts, review requested permissions, and protect account credentials and exported campaign data.

Conclusion: LinkedIn Campaign Manager is suitable for directly managing campaigns, while Supermetrics helps automate reporting. Both support a more policy-conscious workflow than tools that automate personal-profile engagement. I would verify any third-party tool in the LinkedIn Marketing Partner Directory before using it.

Season-12

Q-1.
Create a new X (Twitter) account or use an existing one, then update your bio and profile picture to clearly reflect a personal brand or interest (e.g., tech enthusiast, foodie, cricket fan) relevant to your career goals.

Ans:

Q-2.

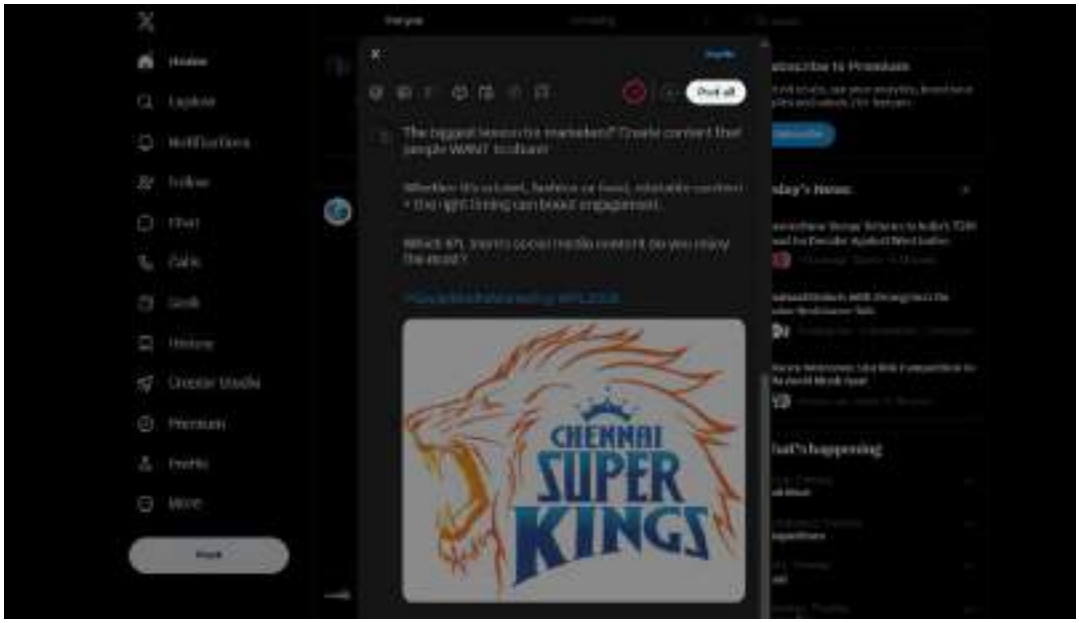

**Write and post a tweet thread (minimum 3 tweets) designed to generate engagement on a trending topic in India (such as IPL, a new movie release, or a tech event), using relevant hashtags and tagging at least one popular account.

Hint: Observe how popular accounts structure their threads and use hooks in the first tweet.**

Ans:

Q-3.

Analyze your X (Twitter) feed and identify 3 signals or behaviors that seem to influence which tweets appear at the top (such as recency, engagement, or who you follow). Write a short note explaining how the X algorithm might be ranking your feed.

Ans:

Objective: Understand how X may decide which posts appear near the top of the feed.

Ranking signal	**Explanation**
1. Recency	Recent posts may appear in the feed, depending on the feed setting and ranking system.
2. Engagement	Likes, replies, reposts, and other interactions can help indicate that a post is interesting.
3. Following and interests	Posts from followed accounts and accounts or topics related to a user's interests may be recommended.

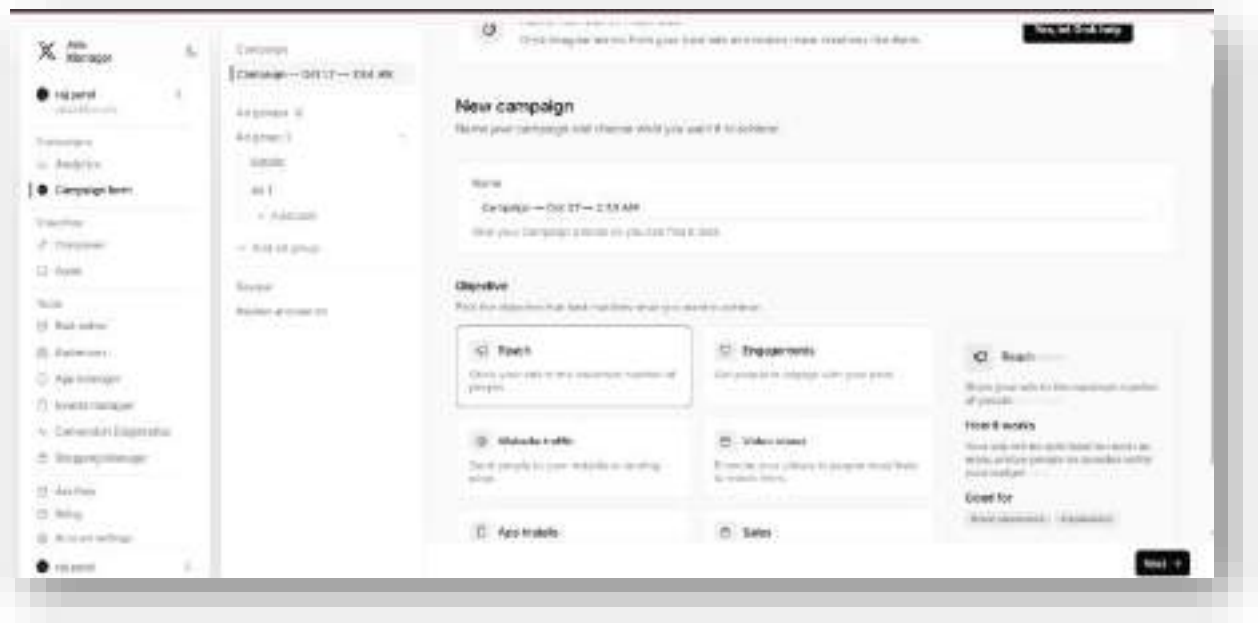

Short analysis note for the assignment:

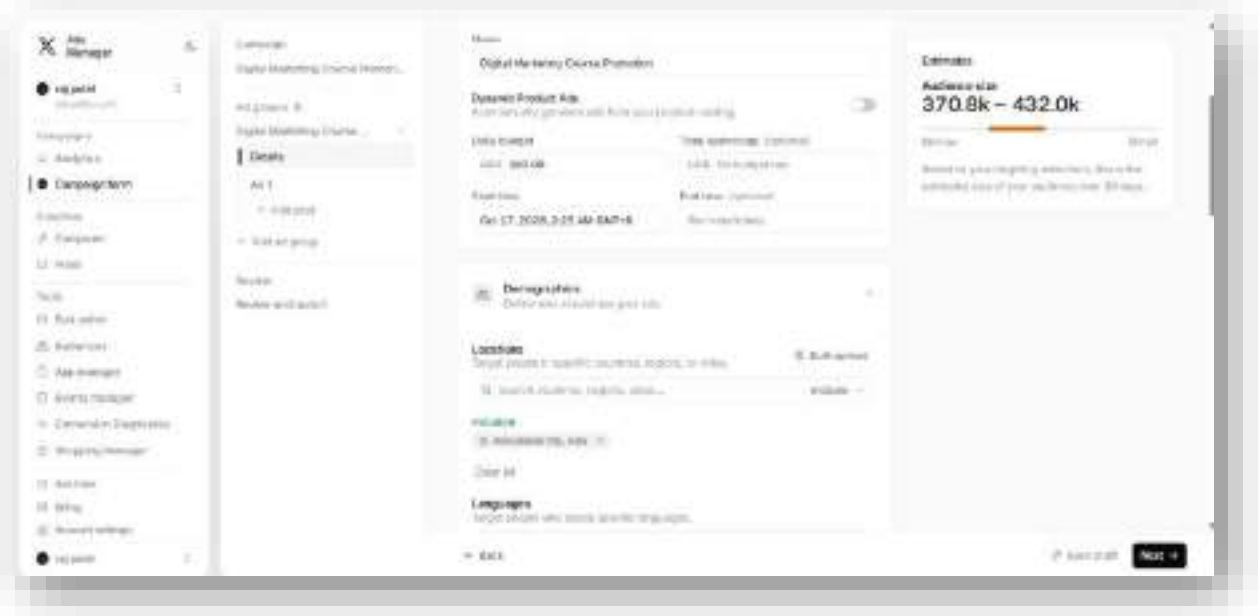

The X algorithm uses different signals to personalize the For You feed. It may consider the user's interests, followed accounts, post freshness, engagement, and previous interactions. Posts that appear relevant and interesting to the user may receive higher ranking. However, the exact order can vary because X uses multiple ranking signals, and the feed may also contain recommended and promoted posts.

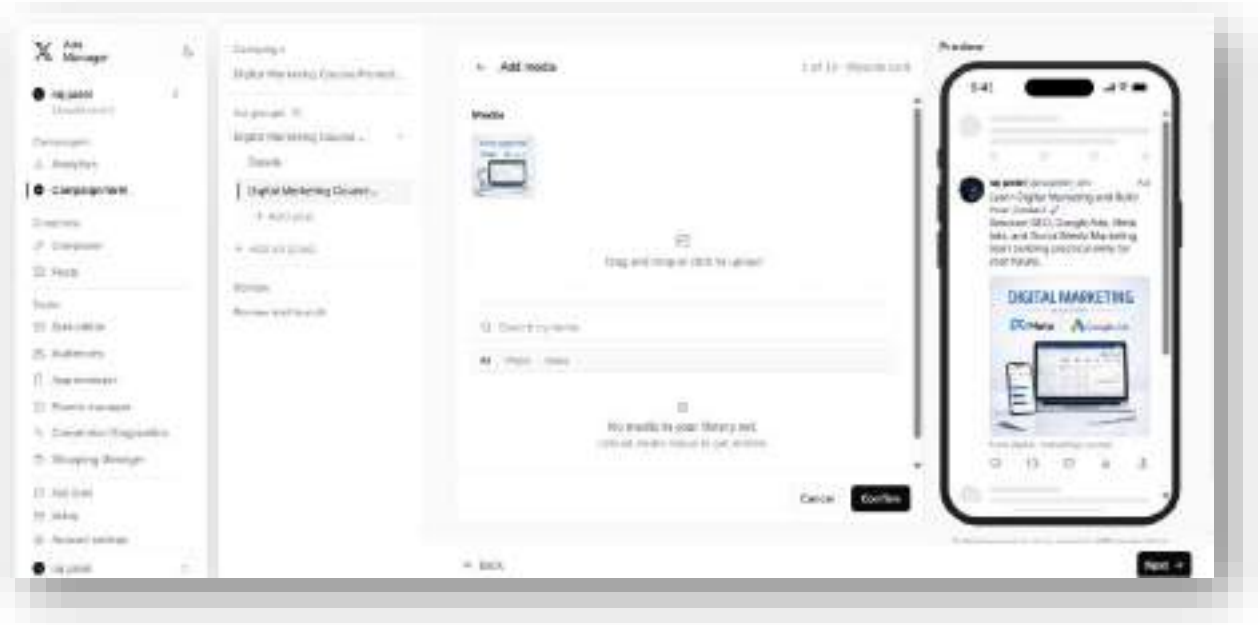

Q-4.

Set up a mock X Ads campaign using the X Ads Manager (ads.twitter.com): choose a campaign objective (like website visits or app installs), select your target audience, and draft the ad copy and creative. Take screenshots of each step but do not launch the campaign.

Ans:

Q-5.

**Research the billing and payment options for X Ads in India and list the steps required to add a payment method to your X Ads account.

Hint: Check the official X Ads Help Center for up-to-date information on supported payment methods and billing cycles.**

Ans:

According to the official X Ads Help Center, self-service advertisers generally add an eligible credit or debit card through the Billing section. Supported card networks include Visa, Mastercard, and American Express, with other networks accepted under specified conditions. Availability depends on the account and country.

Payment options:

Payment option	**Details**
Credit card	Eligible cards such as Visa, Mastercard, and American Express.
Debit card	Visa, Mastercard, and American Express debit cards are listed as accepted options.
Insertion Order (IO)	An alternative billing arrangement that eligible advertisers can apply for; it is not a standard option for every account.

Season-13

Q-1.

Create a comparison table showing the differences between Promoted Tweets, Followers Ads, and App Install Ads on X (formerly Twitter), including their main objective, placement, and ideal use case.

Ans:

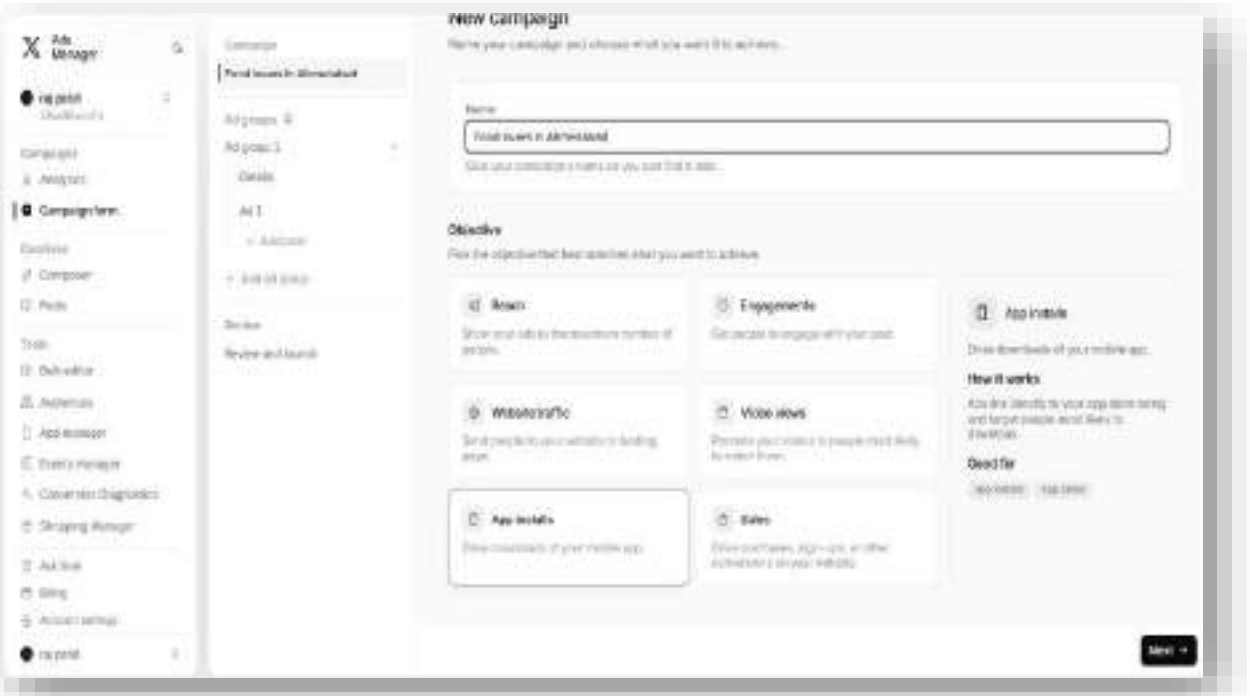

Feature	Promoted Tweets	Followers Ads	App Install Ads
Main Objective	Increase engagement, reach, and website traffic.	Increase followers and grow a brand's audience.	Encourage users to install a mobile application.
Placement	X Home Timeline and other eligible ad placements.	Timeline and eligible account recommendation placements.	Timeline and eligible placements with an app-install button.
Ideal Use Case	Promoting offers, news, products, or events.	Growing a brand's or creator's X account.	Promoting a new food delivery, gaming, or music app.
Call-to-Action (CTA)	Learn More, Shop Now, or Visit Website.	Follow the account.	Install or Download the App.
Example	Promoting a Swiggy discount offer.	Growing a cricket news account's followers.	Encouraging users to download the Zomato app.

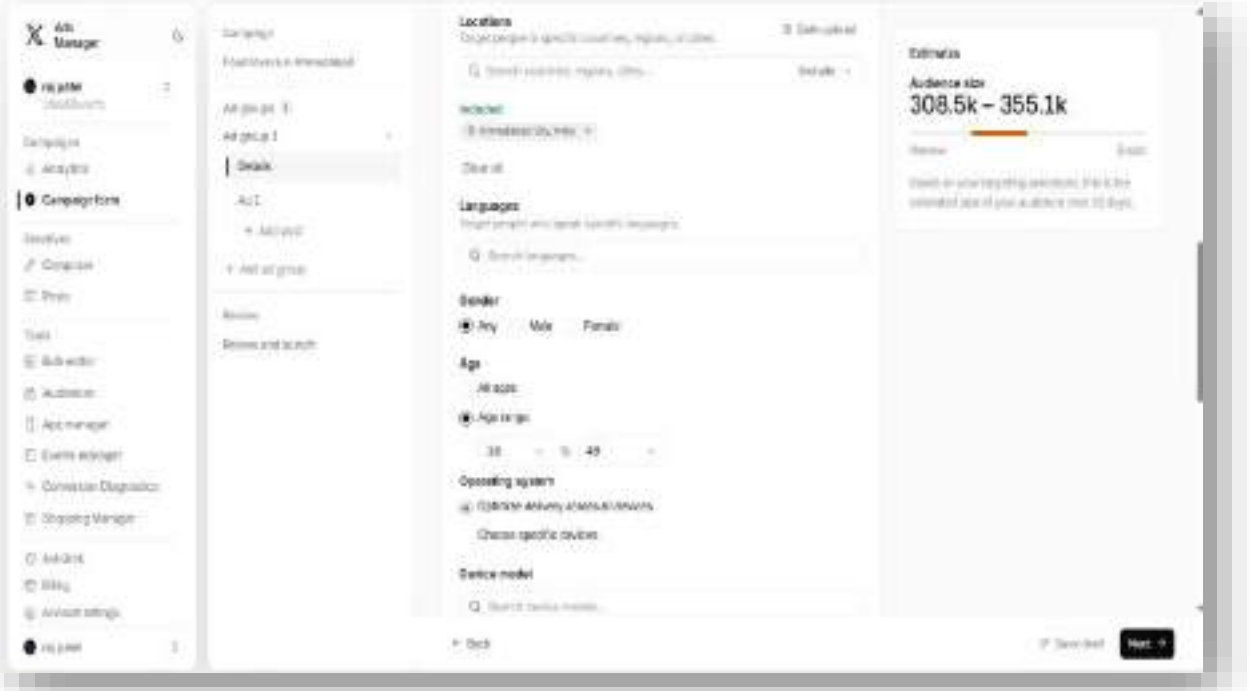

Q-2.

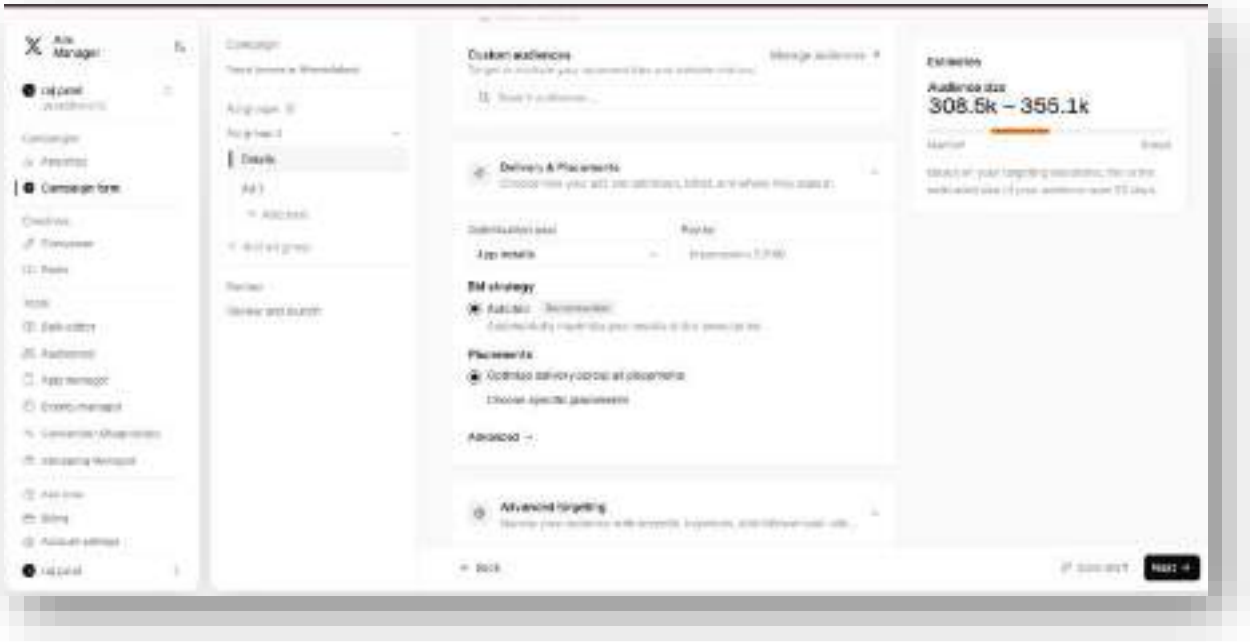

**Draft a sample ad copy and creative (text and image description) for a Zomato App Install Ad campaign targeting foodies in Ahmedabad. Explain why your creative choices follow best practices for X Ads.

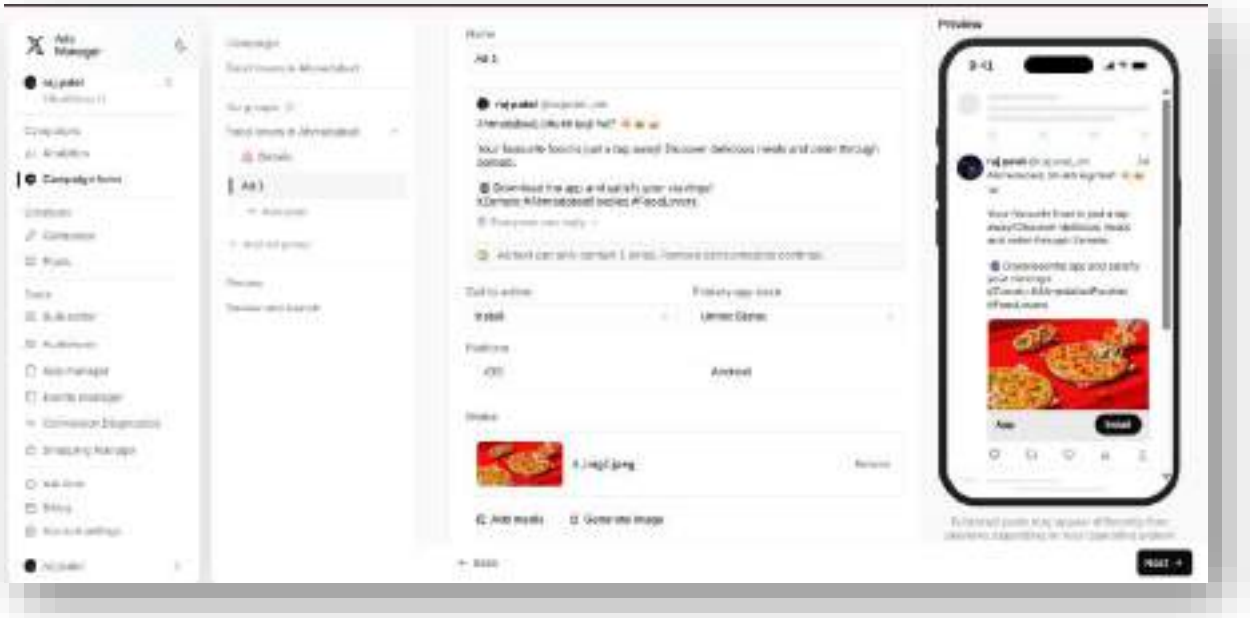

Hint: Consider short, catchy text, a clear call-to-action, and an image that stands out in the feed.**

Q-3.

Given a scenario: You have a budget of ₹10,000 to promote a new music playlist app on X. Decide how you would split the budget between Audience Bidding and setting daily limits for maximum reach. Justify your choices.

Ans:

I would use audience targeting and bidding controls to reach people interested in music, playlists, singers, and entertainment.

Budget Activity	Amount	Percentage	Purpose
Audience targeting and bidding tests	₹3,000	30%	Test different music interests and audience segments.
Main campaign with daily spending limits	₹5,000	50%	Reach more relevant users consistently throughout the campaign.
Creative testing and optimization	₹2,000	20%	Compare ad copies and creatives to identify better performers.
Total	₹10,000	100%	

Daily budget plan: Run the campaign for 10 days with an average budget of ₹1,000 per day.

Justification:

- Audience bidding: I would test relevant audience segments and adjust bids based on campaign performance and the selected campaign objective.
- Daily limits: I would set a spending limit to control costs and prevent the campaign from using the entire budget too quickly.
- Creative testing: I would test different headlines and music visuals to discover which attracts more app installs.
- Performance monitoring: I would track impressions, clicks, cost per install (CPI), and app installs.

Q-4.

Pick any Indian brand (e.g., Myntra, Swiggy, or Paytm) and find a real or hypothetical X Ad campaign they ran or could run. Write a short case study (5-6 lines) describing the campaign objective, ad type used, and one reason it was (or could be) successful.

Ans:

Brand: Swiggy

Campaign: Hypothetical IPL Food Delivery Campaign

Proposed campaign

1. Objective: Increase food orders during IPL cricket matches and reach cricket fans across India.

2. Ad type: Promoted Posts featuring match-time food offers and meal combinations.
3. Target audience: Cricket fans, young adults, and food lovers interested in IPL content.
4. Creative idea: Use a catchy message such as “Big Match. Bigger Hunger. Order with Swiggy!”
5. CTA: Encourage users to tap through to the app and explore available food offers.
6. Reason for potential success: IPL creates excitement and shared viewing occasions, making food delivery offers relevant to cricket fans.

Conclusion: This hypothetical campaign could improve engagement and generate orders by combining cricket-related content, timely promotions, and a clear call-to-action.

Q-5.

Use ChatGPT to generate three creative headline ideas for a Followers Ad campaign for a cricket news handle during IPL season. Paste the AI's suggestions and explain which one you would pick and why.

Ans:

Idea 1

“Every IPL Ball. Every Big Update. Follow Us!”

Focus: Live updates and comprehensive cricket coverage.

Idea 2

“IPL Fever Is Here! Follow for Non-Stop Cricket Buzz 🏏”

Focus: Excitement, entertainment, and IPL discussions.

Idea 3

“Match Results, Breaking News & Player Stats — All in One Follow!”

Focus: Useful cricket information in one place.

My choice: Idea 1 — “Every IPL Ball. Every Big Update. Follow Us!”

Reason for choosing it:

- It is short, memorable, and easy to understand.
- It communicates the value of following the cricket news handle.
- It creates a sense of excitement during IPL season.
- The word “Follow” provides a clear call-to-action.
- It can appeal to fans who want regular cricket updates.

Season-14

Q-1.

Create a Quora profile optimized for authority in a niche you are genuinely interested in (such as IPL cricket, travel, or digital payments), including a professional bio, relevant credentials, and a clear profile picture.

Ans:

I created a Quora profile focused on Digital Marketing, SEO, Social Media Marketing, and Online Advertising. The purpose of my profile is to share useful knowledge, answer questions, and build credibility in the digital marketing industry.

Profile details:

- Profile Name: Rajkumar Kalola
- Niche: Digital Marketing and SEO
- Profile Headline: Digital Marketing Learner | SEO | Social Media Marketing | Google Ads
- Credentials: B.Com Graduate (2025) and Digital Marketing Student at TOPS Technologies
- Profile Picture: A clear, professional headshot.
- Topics to Follow: SEO, Google Ads, Social Media Marketing, Content Marketing, WordPress, and Digital Marketing.

Professional Bio For Quora Profile:

I am a B.Com graduate and a digital marketing student at TOPS Technologies. I am learning SEO, social media marketing, content marketing, Google Ads, Meta Ads, and website optimization. I enjoy exploring digital marketing strategies, online business growth, and new marketing tools. I share practical knowledge and beginner-friendly tips to help people understand digital marketing and grow their online presence.

Q-2.

Research and answer two recent questions on Quora related to your chosen niche, ensuring your answers are detailed, reference real apps or trends (like Zomato, Flipkart, or Paytm), and include a call-to-action that could drive traffic to a blog or portfolio.

Ans:

I selected two relevant questions related to digital marketing and online shopping. My answers provide practical information, mention real platforms, and include a call-to-action to encourage readers to explore my digital marketing blog or portfolio.

Question 1: How can a beginner learn SEO and improve a website's Google ranking?

Sample Quora Answer:

SEO (Search Engine Optimization) helps websites improve their visibility in search engines like Google. Beginners can learn SEO by following these steps:

1. Keyword Research: Use tools such as Google Keyword Planner to identify keywords that people search for.
2. On-Page SEO: Optimize page titles, meta descriptions, headings, URLs, and image alt text.
3. Quality Content: Publish useful, original content that answers users' questions.
4. Technical SEO: Improve website speed, mobile usability, indexing, and XML sitemaps.
5. Performance Tracking: Use Google Search Console to monitor clicks, impressions, and keyword performance.

For example, a beginner who runs a Blogger website about the stock market can publish a detailed article about stock market basics for beginners. The article should answer common questions, use relevant keywords naturally, and link to related articles.

SEO takes time, and rankings are not guaranteed. Consistent improvements and useful content can help a website grow organically.

Call-to-action: If you want to learn more about SEO and digital marketing, visit my blog, Stock Market Guide, to explore educational content and see how a blog can be structured.

Question 2: How can Flipkart and Zomato use digital marketing to attract more customers?

Sample Quora Answer:

Digital marketing helps businesses reach the right audience, increase brand awareness, and encourage customers to take action. Platforms such as Flipkart and Zomato can use several digital marketing strategies.

1. Search Engine Optimization: Optimize website pages for relevant searches so customers can discover products and services through search engines.
2. Social Media Marketing: Share engaging posts, videos, offers, and customer-focused content on Instagram and other social platforms.
3. Paid Advertising: Use Google Ads and Meta Ads to reach relevant audiences and promote special offers.

4. Personalized Offers: Recommend relevant products or food options based on customer interests and permitted usage of customer data.
5. Email and Push Notifications: Inform customers about sales, discounts, new products, and useful updates, while respecting their communication preferences.
6. Analytics: Measure clicks, conversions, and return on ad spend to understand which campaigns perform best.

For example, Flipkart can promote seasonal shopping offers, while Zomato can advertise restaurant deals to relevant local audiences. The effectiveness of these strategies depends on targeting, offer quality, and the customer experience.

Call-to-action: Want to learn more about SEO, paid advertising, and social media marketing? Explore my digital marketing learning project for related educational content.

Q-3.

Analyze the top 5 answers for a trending Quora question in your niche and list three strategies those authors use to build trust and authority in their responses.

Hint: Look for use of data, storytelling, and profile credibility cues.

Ans:

Example trending question: “What are the best digital marketing strategies for a small business?”

The following is a sample analysis framework for five high-quality answers. It demonstrates what to look for when reviewing actual Quora answers; it does not claim to be a verified ranking of current Quora posts.

Answer	**Trust-building technique**	**Example**
Answer 1	Data and evidence	Uses statistics, analytics, or measurable campaign results.
Answer 2	Personal experience	Shares a real marketing challenge and how it was solved.
Answer 3	Practical steps	Provides a clear, actionable SEO or advertising guide.
Answer 4	Credibility	Shows relevant experience, qualifications, or useful portfolio examples.
Answer 5	References and examples	Mentions tools such as Google Analytics, Search Console, or Meta Ads Manager.

Three strategies authors use to build trust and authority:

1. Using data and evidence: Strong answers explain results with relevant metrics, credible sources, or specific examples instead of making unsupported claims.
2. Sharing stories and practical experience: Personal experiences, real challenges, and lessons learned make answers relatable and useful.
3. Demonstrating credibility: A relevant profile bio, demonstrated expertise, transparent sources, and step-by-step explanations help readers judge the answer's reliability.

Q-4.

Design a Quora Ad campaign outline for a new app or service (for example, a food delivery app or a student deals platform), specifying the ad type you would choose, your target audience, and the key message you want to convey.

Ans:

I designed a sample Quora advertising campaign for a fictional food delivery app called FoodieGo, targeting people who are interested in ordering food online.

FoodieGo

Fictional food delivery app

Discover delicious meals near you.

Sample advertising campaign

Ad headline

Hungry? Discover Your Next Favorite Meal!

Ad description

Explore local food options, discover new dishes, and find meals that suit your taste. Check out FoodieGo today!

Call-to-action

Download the App

Campaign outline:

Element	**Campaign details**
Campaign objective	App installs and awareness
Ad type	Image ad or promoted content, depending on available Quora ad formats
Target audience	People aged 18–35 in Ahmedabad interested in food, restaurants, and online ordering
Interests/topics	Food delivery, cooking, restaurants, food reviews
Key message	Discover delicious food options conveniently.
Landing page	FoodieGo app download page
Success metrics	Impressions, clicks, click-through rate, installs, and cost per install

Why this campaign could work:

- The headline directly addresses the user's need for food.
- The food image attracts attention and communicates the app's purpose.
- Topic-based targeting helps reach people reading about food and restaurants.
- The call-to-action clearly tells users what to do next.

Q-5.

Use ChatGPT to generate three alternative headlines or answer hooks for a Quora answer promoting a Spotify playlist or a YouTube channel, and select the one you think would get the most clicks. Paste your prompt and the outputs.

Ans:

I used ChatGPT to generate three alternative headlines for a Quora answer promoting a Spotify playlist. The goal was to attract music lovers and encourage them to listen to the playlist.

Headline 1

Need Music to Focus? Try This Spotify Playlist for Study and Work

Why it works: It addresses a common need and clearly explains the playlist's benefit.

Headline 2

Discover Your Next Favorite Playlist for Motivation and Relaxation

Why it works: It creates curiosity and appeals to people looking for different moods.

Headline 3

Studying Today? These Music Picks Could Make Your Session More Enjoyable

Why it works: It speaks directly to students and offers a relatable benefit.

My selected headline: Headline 1 — "Need Music to Focus? Try This Spotify Playlist for Study and Work."

Reason for selection:

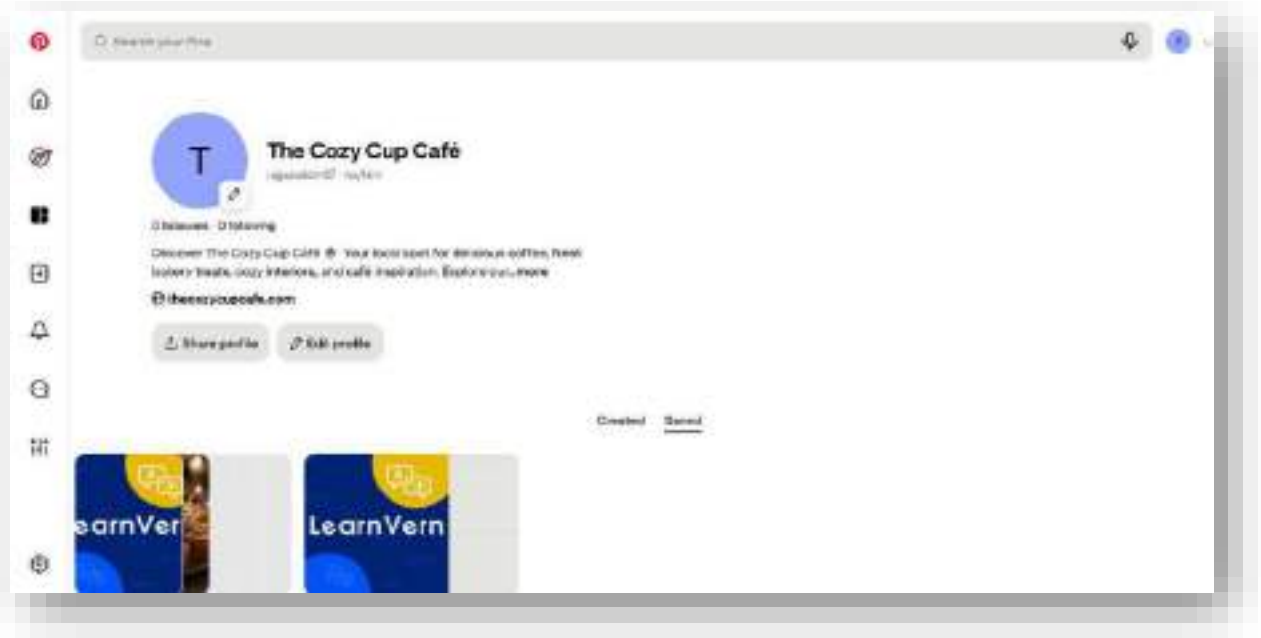

I selected the first headline because it targets a specific audience, identifies a common problem, and offers a clear solution. Readers can quickly understand what the playlist is for, which may encourage relevant clicks.

Conclusion: ChatGPT can help marketers generate and compare different headline ideas. However, the best-performing headline should be determined through actual testing, such as comparing click-through rates, rather than assuming that one headline will always receive the most clicks.

Season-15

Q-1.
Create a new Pinterest business profile for a fictional local café and optimize the profile by adding a branded profile picture, keyword-rich bio, and a website link.

Ans:

Q-2.

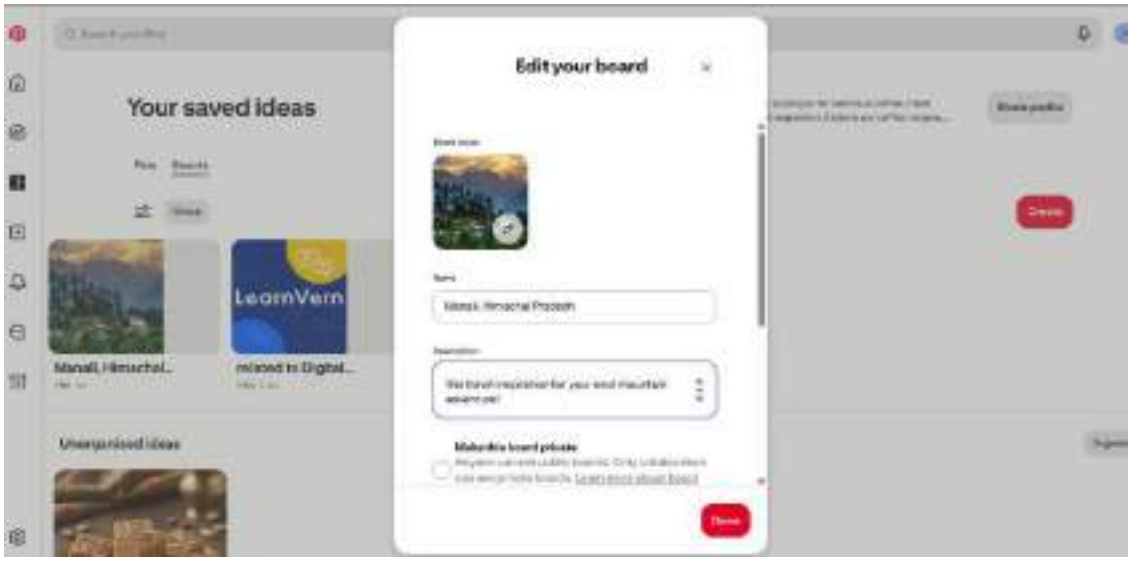

**Design and upload 3 Idea Pins for a travel inspiration account, each showcasing a different travel destination with engaging images, titles, and descriptions.

Hint: Use vertical images and include at least one call-to-action in each Idea Pin.**

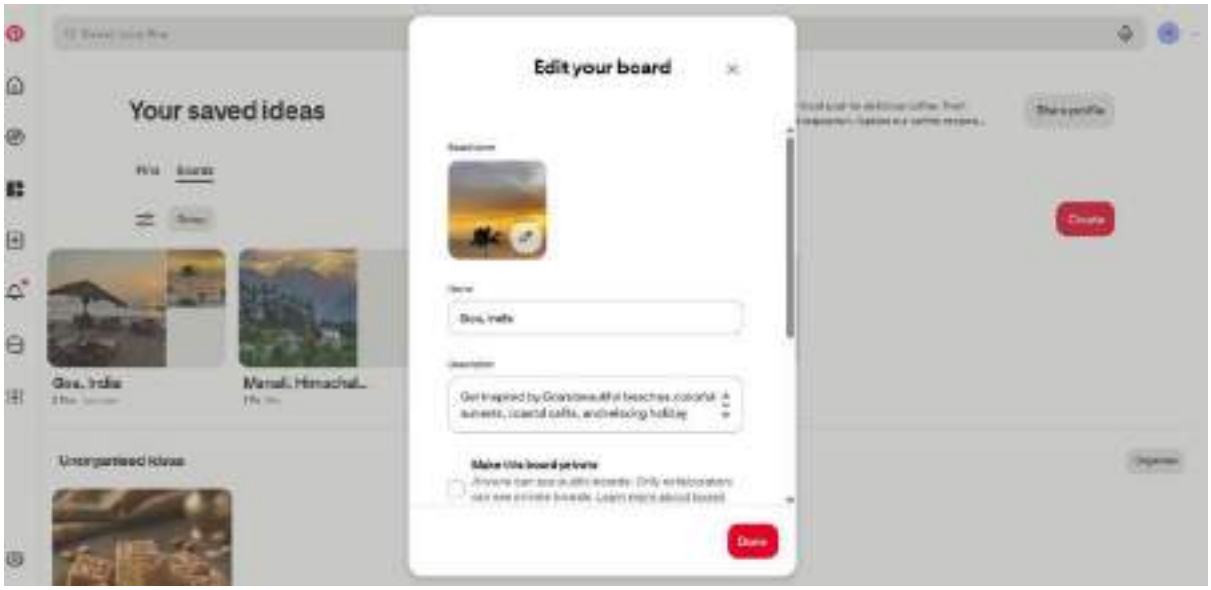

Ans:

Create three vertical travel pins using Canva. A vertical design in a 2:3 ratio, such as 1000 × 1500 pixels, works well for standard Pinterest Pins. Pinterest's publishing options may vary by account, so use the available video or multi-page Pin format if the separate Idea Pin option is unavailable.

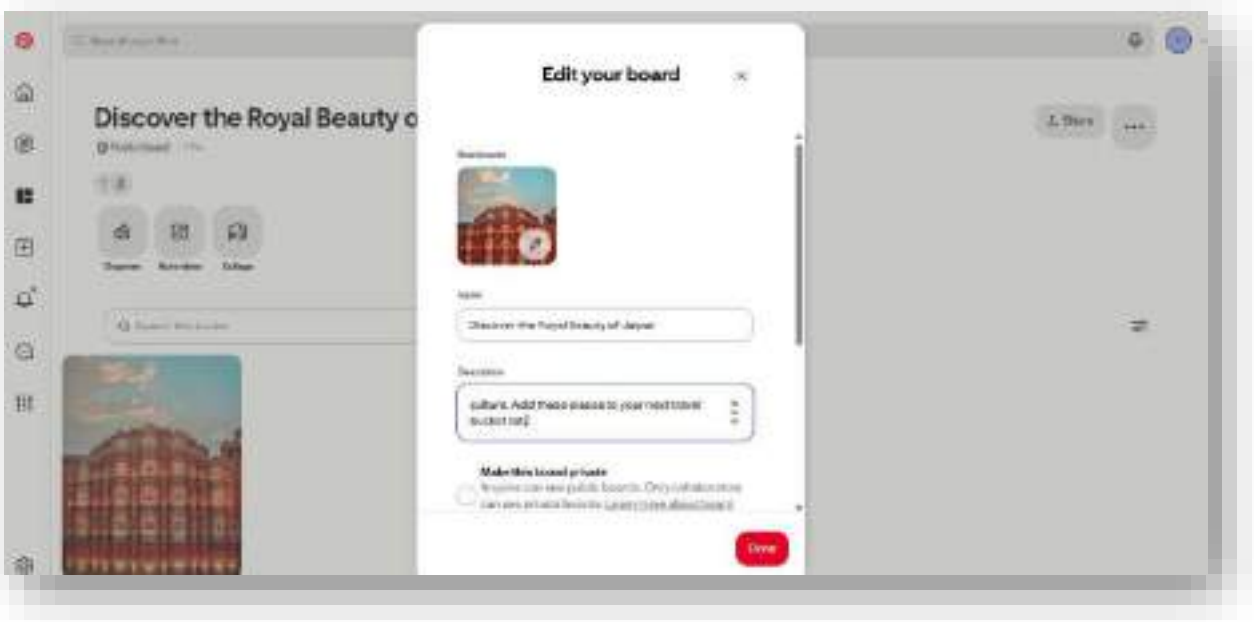

Pin 1 — Manali, Himachal Pradesh

Pin 2 — Goa, India

Pin 3 — Jaipur, Rajasthan

Q-3.

Develop a content calendar for one week for a fashion brand on Pinterest, listing daily pin topics, types (standard pin, idea pin, video pin), and target keywords.

Ans:

Brand name: Urban Threads

Goal: Increase brand awareness, saves, website traffic, and interest in fashion products.

Day	Pin topic	Pin type	Target keywords
Monday	Trending outfit ideas for women	Standard Pin	women fashion trends, outfit ideas
Tuesday	5 ways to style a kurti	Idea-style multi-page Pin	kurti styling, ethnic wear ideas
Wednesday	New arrivals collection	Video Pin	new fashion collection, latest outfits
Thursday	Casual outfits for college students	Standard Pin	college outfits, casual fashion
Friday	Festive and Navratri fashion looks	Idea-style multi-page Pin	Navratri outfits, festive fashion

Saturday	Behind the scenes of a clothing shoot	Video Pin	fashion photoshoot, clothing brand
Sunday	Best outfits of the week	Standard Pin	weekly outfit inspiration, fashion ideas

Note: Use the standard Pin, video Pin, and available multi-page Pin formats offered by your Pinterest account. Features and publishing options can change.

Content calendar strategy:

- Monday–Tuesday: Share useful styling inspiration that people may save.
- Wednesday–Friday: Promote new products and seasonal fashion.
- Saturday–Sunday: Share engaging videos and outfit collections.
- Use clear vertical images, readable text, relevant keywords, and a website link where appropriate.
- Review Pinterest Analytics weekly to identify the topics that generate the most saves and outbound clicks.

Q-4.

Analyze the Pinterest Analytics dashboard for your business profile (or use a sample analytics screenshot from the web) and list 3 insights about which content performed best and why.

Hint: Look at metrics like impressions, saves, and outbound clicks.

Ans:

Business profile: Urban Threads (fictional example)

For this assignment, the following is a sample analytics report. These numbers are illustrative, not actual Pinterest account data.

Sample performance for the last 30 days

Impressions

12,500

Saves

420

Outbound clicks

185

Illustrative account-level totals; not live analytics.

Three key insights

Insight 1: Outfit inspiration received the most impressions.

- Sample result: 5,000 impressions on the college outfit Pin.
- Reason: The topic is relevant to a broad audience and may match popular fashion searches.
- Action: Create more college outfit ideas and seasonal styling content.

Insight 2: Kurti styling generated the most saves.

- Sample result: 210 saves on the kurti styling Pin.
- Reason: People may save practical styling ideas to use when planning future outfits.
- Action: Publish more step-by-step styling guides and outfit combinations.

Insight 3: The new arrivals Pin generated the most outbound clicks.

- Sample result: 120 outbound clicks on the new arrivals Pin.
- Reason: Product images and a clear shopping link can encourage people to explore the collection.
- Action: Use high-quality product images, keyword-rich descriptions, and a direct link to the relevant product page.

Q-5.

Set up a basic Pinterest Ad campaign to promote a DIY project pin, choosing your campaign objective, audience targeting, and budget settings. Take screenshots of each setup step.

Constraint: You can use the Pinterest Ads demo tool if you don't want to run a real ad.

Ans:

Practical: Pinterest Ads Campaign Setup

Campaign example: Promote a DIY home decoration Pin for a fictional brand called DIY Creative Corner.

Campaign name: DIY Home Decor Traffic Campaign

Promoted Pin: Easy DIY Fairy Light Jar

Objective: Consideration / Traffic, if available

Target audience: DIY lovers and home décor enthusiasts

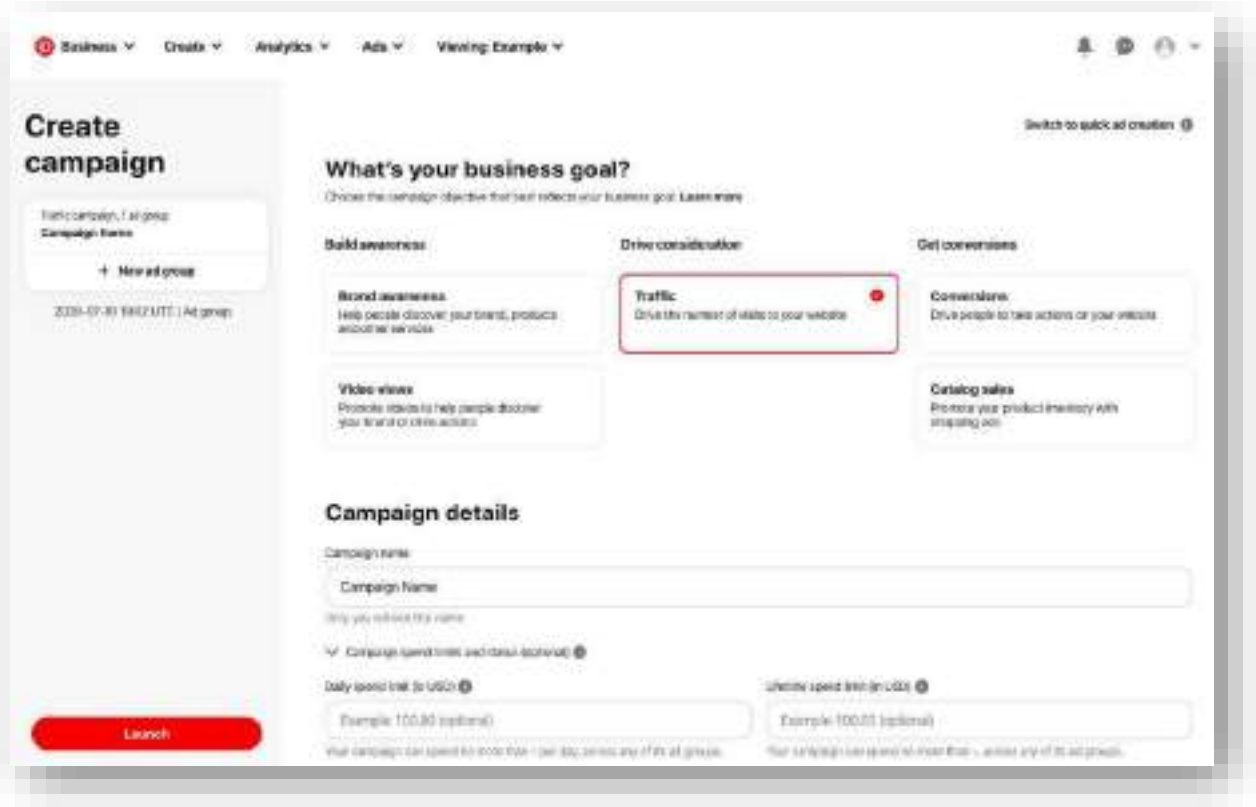

Location: India

Daily budget: ₹300

Campaign duration: 7 days

Sample settings for the assignment, not a live campaign.

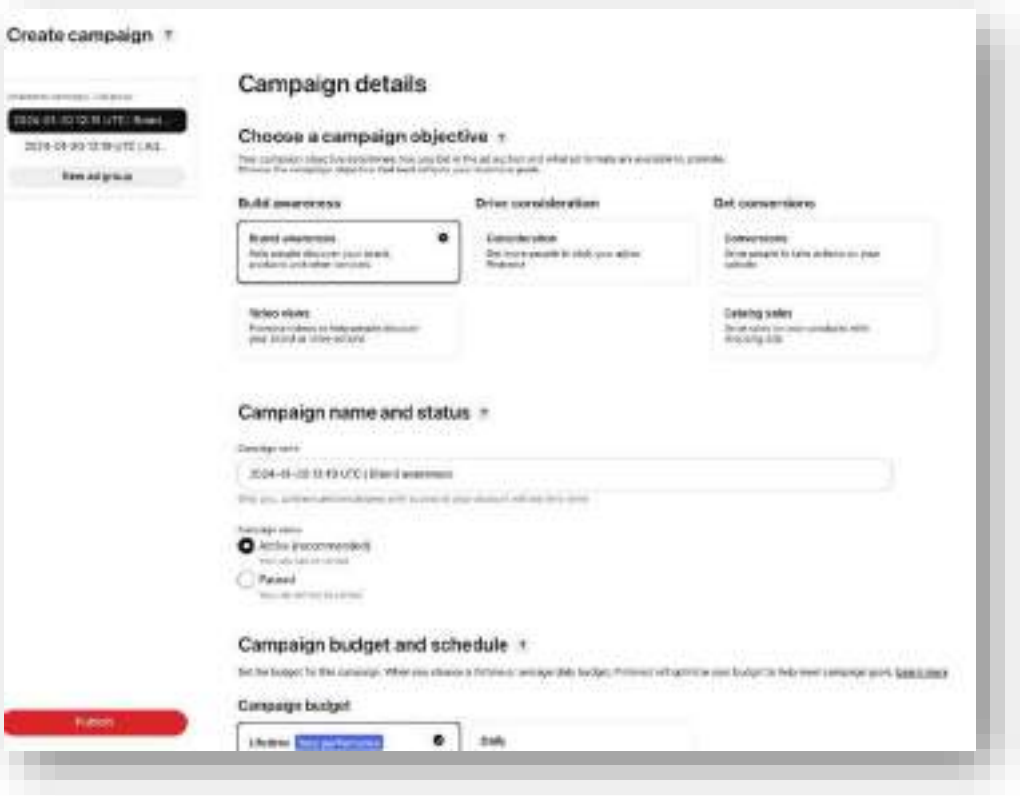

Step-by-step setup

Step 1: Open Pinterest Ads

Log in to your Pinterest business account. Open the Ads section and select the option to create a campaign, if advertising is available for your account and region.

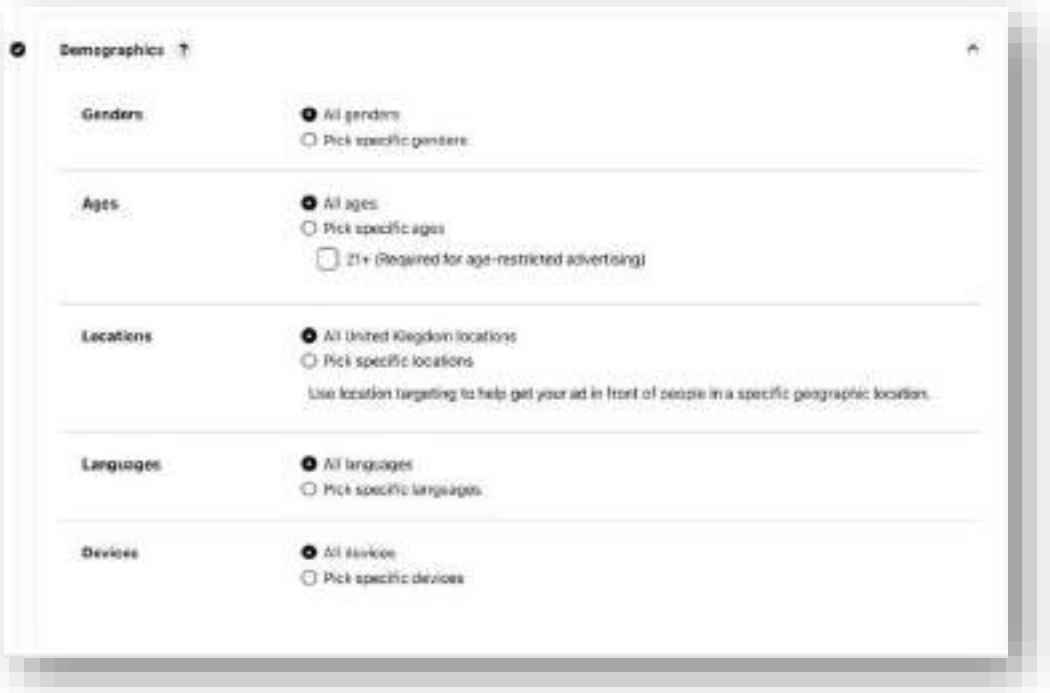

Screenshot 1: Ads dashboard or campaign creation screen.

Step 2: Select the campaign objective

Choose Consideration or the available Traffic objective to encourage users to visit the DIY project webpage.

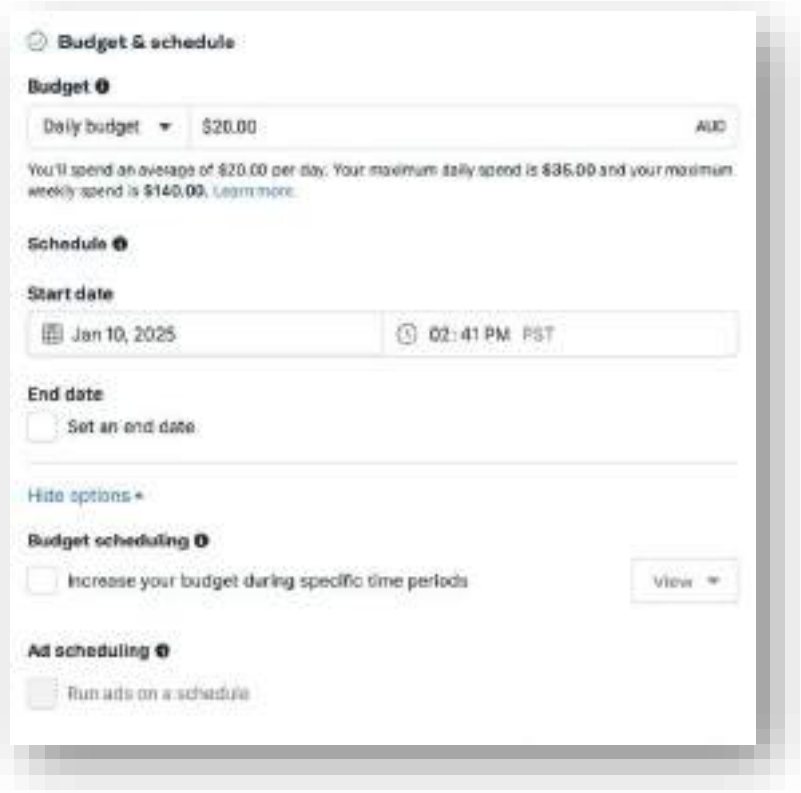

Screenshot 2: Selected campaign objective.

Step 3: Set audience targeting

Select India as the location, where supported, and target relevant interests such as DIY crafts, home décor, handmade projects, and interior design. Add relevant keywords if the campaign format supports keyword targeting.

Screenshot 3: Audience and targeting settings.

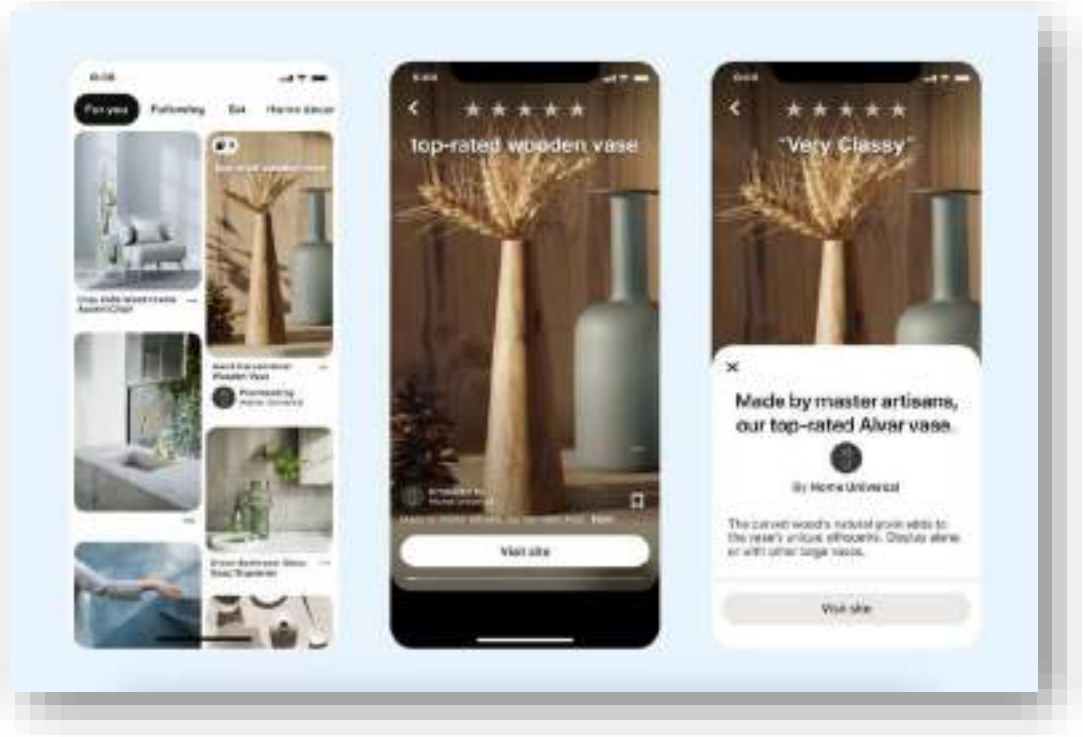

Step 4: Set the budget and schedule

Enter a sample daily budget of ₹300 and select a seven-day schedule, if these options are available.

Total planned budget: ₹300 × 7 = ₹2,100.

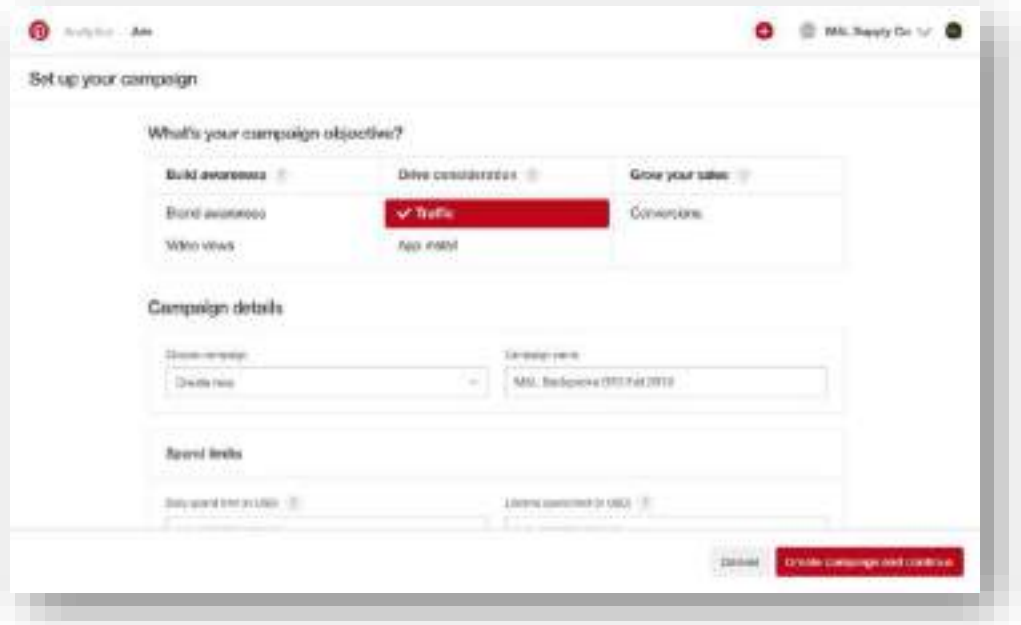

Screenshot 4: Budget and schedule settings.

Step 5: Select the Pin and destination

Choose the DIY project Pin, enter a clear title and description, and add the relevant project webpage URL.

Screenshot 5: Promoted Pin preview and destination link.

Step 6: Review the campaign

Check the objective, audience, budget, creative, and destination URL. Capture the final review screen. Publish only if you intend to run a real ad; otherwise, leave the campaign as a draft.

Screenshot 6: Campaign review or saved draft.

Sample ad creative

Pin title: Easy DIY Fairy Light Jar for Your Home

Description:

Create beautiful home décor with this simple DIY fairy light jar project! Follow our easy step-by-step guide and add a creative touch to your room.

Call to action: Visit the website to see the full tutorial.

Target keywords: DIY home décor, handmade crafts, fairy light jar, easy DIY projects, room decoration ideas.

Expected results: The campaign aims to increase website visits, attract people interested in DIY projects, and encourage users to explore more craft tutorials.

Season-16

Q-1.

Pick any two social media platforms you use (like Instagram and Twitter) and list three content types that perform best on each, explaining why you think they work well.

Ans:

Platform 1: Instagram

1. Reels: Short videos, trending audio, and creative content attract attention and help reach new audiences.
2. Carousels: Multiple images or slides educate users and encourage them to save and share posts.
3. Stories: Polls, quizzes, and questions encourage interaction and help build relationships with followers.

Platform 2: X (Twitter)

1. Text Posts: Short, interesting opinions and updates encourage replies and discussions.
2. Images and Videos: Visual content attracts attention and makes information easier to understand.
3. Threads: A series of connected posts explains topics in detail and encourages users to engage in conversations.

Q-2.

Perform a SWOT analysis for a new food review page you want to launch on Instagram—list one Strength, one Weakness, one Opportunity, and one Threat specific to this idea.

Ans:

SWOT Factor	Analysis
Strength	Honest food reviews, attractive food photos, and local restaurant recommendations can build audience trust.
Weakness	A new page has few followers and limited brand recognition.
Opportunity	Collaborations with local restaurants and food bloggers can increase reach and attract new followers.
Threat	Competition from established food influencers and changing Instagram algorithms may reduce reach.

Q-3.

Write a short content strategy (3-5 lines) for growing organic reach on a Flipkart-style deals page on Facebook, mentioning what types of posts, stories, or videos you would use and why.

Ans:

- I will post daily discount offers, product deals, and price comparisons to attract bargain hunters.
- I will use Facebook Stories to share limited-time offers and create urgency among buyers.
- I will publish short videos and Reels showcasing trending products, their features, and savings.
- I will encourage followers to comment, share deals, and tag friends to increase organic reach.
- I will maintain a consistent posting schedule and use relevant hashtags to improve content discovery.

Q-4.

Optimize the bio and call-to-action (CTA) of a fictional music playlist page on Instagram to maximize organic lead generation—write the bio text and suggest a CTA that encourages users to DM or click a link.

Ans:

Page Name: VibeBeats Playlists

Instagram Bio:

🎧 VibeBeats Playlists 🎶

✨ Your daily dose of music vibes

🎵 Bollywood | Lo-fi | Romantic | Party Hits

💖 Find the perfect playlist for every mood

👇 DM “PLAYLIST” to get your music picks!

🔗 Listen to our latest playlists below

Suggested Call-to-Action (CTA): “DM us ‘PLAYLIST’ to get your perfect music playlist, or click the link in our bio to explore more!”

Why it works: The bio clearly explains the page's purpose, includes relevant music keywords, and gives users a simple action to take. This can generate organic leads through direct messages and link clicks.

Q-5.

**Redesign a Facebook page for a local cricket fan club to improve organic reach—list three specific changes you would make to the page (such as updating profile/cover photo, pinning a post, or adding a WhatsApp contact button) and explain how each helps attract more followers.

Hint: Think about what makes you follow or interact with a new page.**

Ans:

1. Update the Profile Picture and Cover Photo

Use a clear cricket-themed logo as the profile picture and a high-quality cover image featuring cricket players, the team name, and upcoming match information. This makes the page look professional and recognizable.

2. Pin an Engaging Welcome Post

Pin a post introducing the fan club, explaining what followers will receive, and asking them to support their favourite team. This helps new visitors understand the page and encourages them to follow and comment.

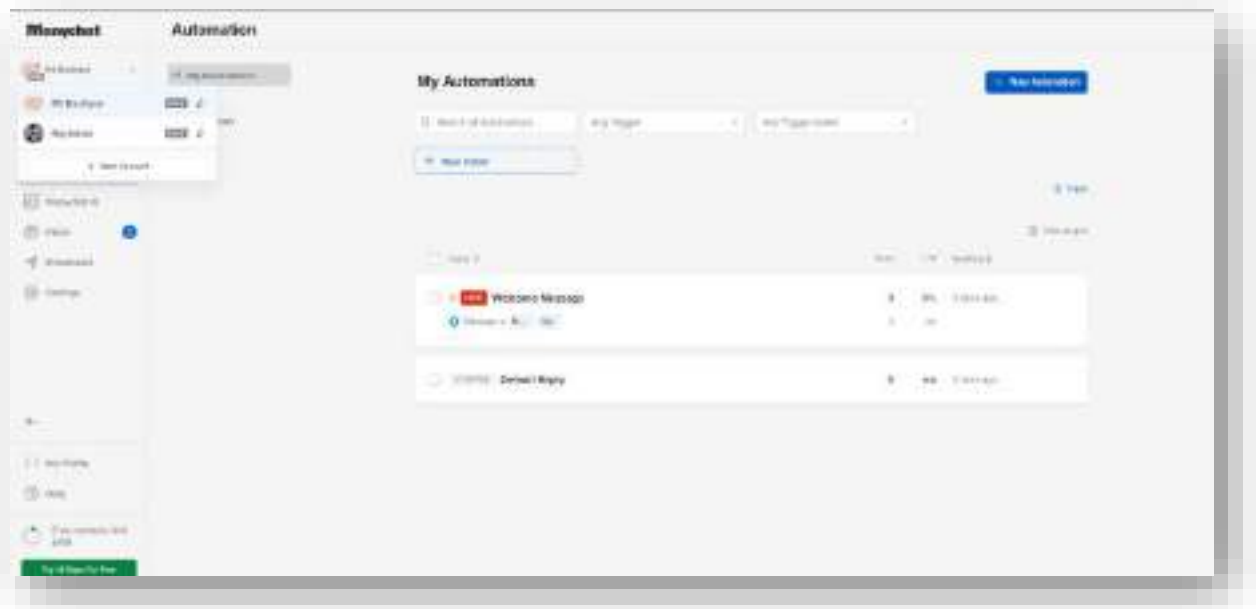

3. Add a WhatsApp Contact Button and Regular Interactive Content

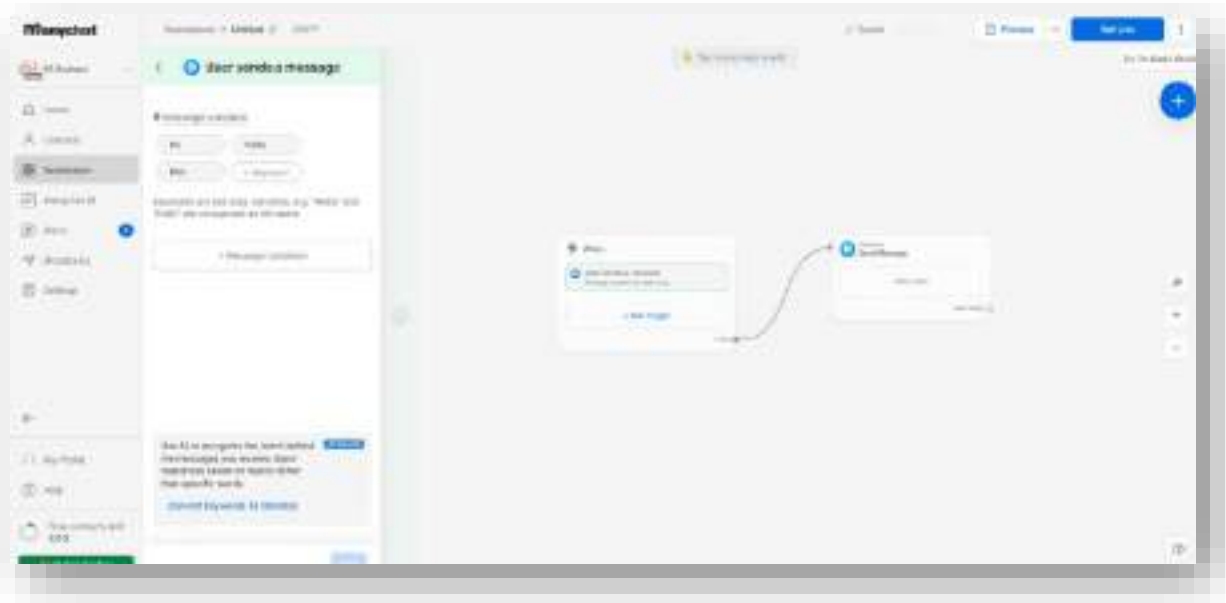

Add a WhatsApp contact button and share match predictions, polls, score updates, and short cricket videos. Easy contact and interactive posts encourage participation, sharing, and repeat visits.

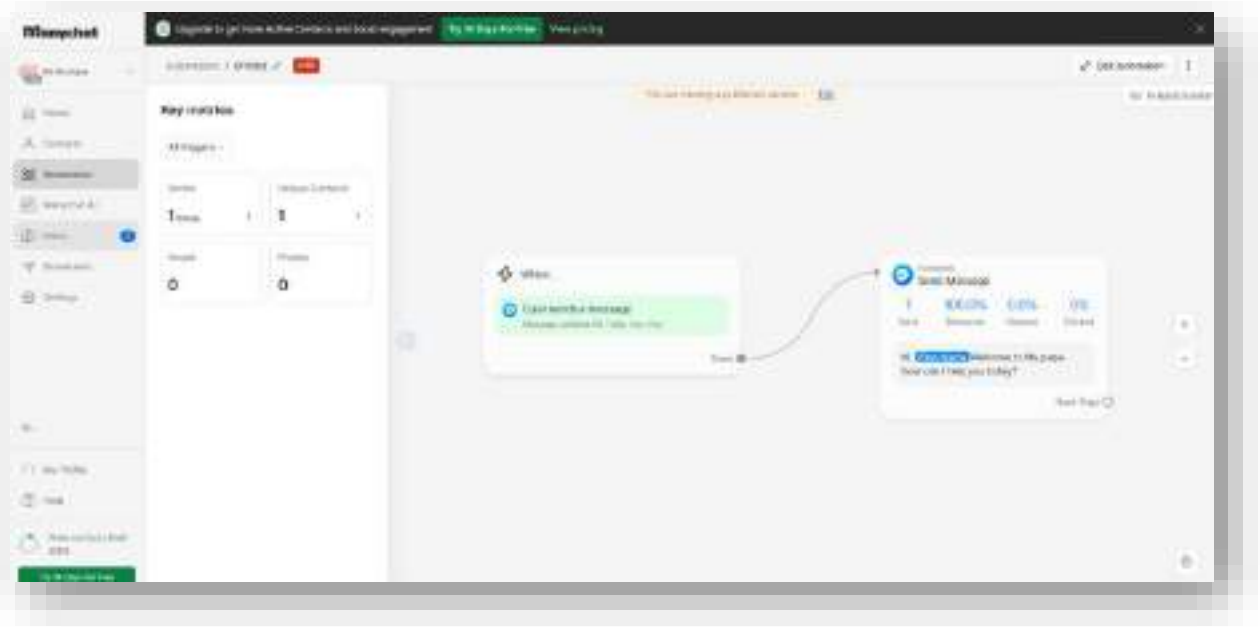

Season-17

Q-1.
Pick any two social media platforms you use (like Instagram and Twitter) and list three content types that perform best on each, explaining why you think they work well.

Ans:

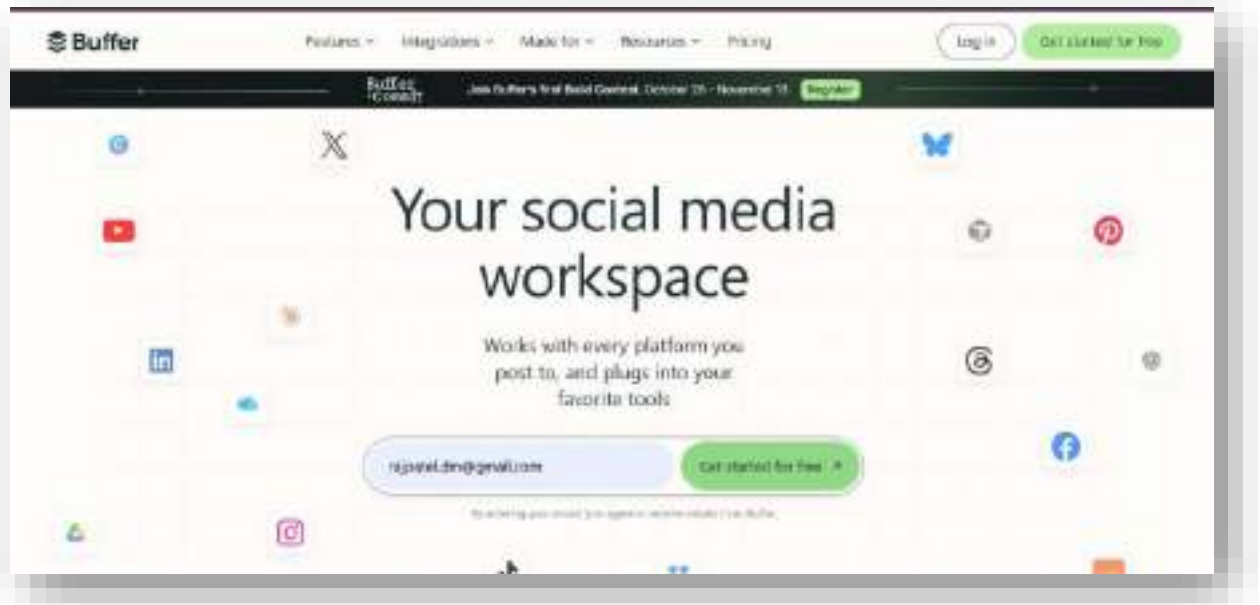

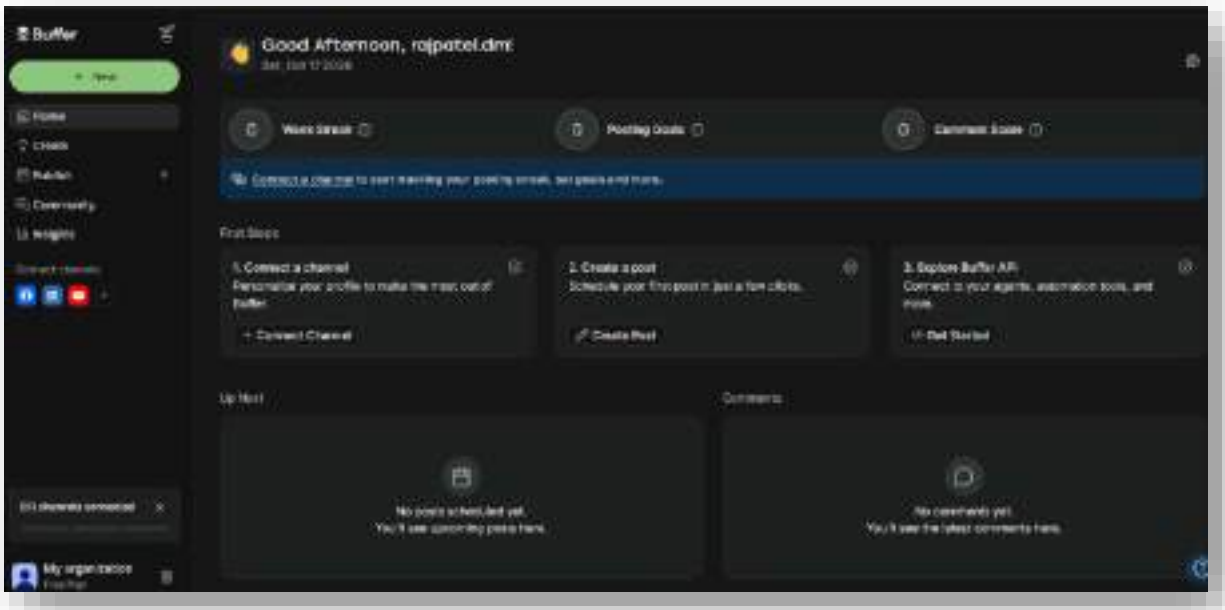

Q-2.

Use the free version of Buffer or Hootsuite to schedule two Instagram posts for the next week, each with a different caption and image.

Ans:

Post-2:

Q-3.

**Design a one-week social media content calendar for a fictional food delivery app (like Zomato), including post topics, platforms, and suggested posting times in a table format.

Hint: Include at least one post each for Instagram, Facebook, and Twitter, and vary the content type (image, story, offer, meme, etc.).**

Ans:

Day	Platform	Content type	Post topic	Suggested time (IST)
Mon	Instagram	Image	Hero shot of the “Dish of the Week” with a “Order now” CTA	12:30 PM
Mon	Twitter/X	Text + poll	“Biryani vs Pizza: which one wins your Monday?”	6:00 PM
Tue	Facebook	Offer	“Tasty Tuesday”: 30% off your first order with code ZIPPY30	1:00 PM
Wed	Instagram	Story	Behind the scenes: a partner restaurant kitchen, with a “Swipe up to order” sticker	7:30 PM

Wed	Twitter/X	Meme	Relatable meme: “Me deciding what to order for 45 minutes”	9:00 PM
Thu	Instagram	Reel	15-second “Order to doorstep” speed-run	8:00 PM
Thu	Facebook	Poll/engagement	“Which cuisine should we add next? Vote below”	5:30 PM
Fri	Twitter/X	Offer	Flash deal: free delivery from 7 to 10 PM tonight	5:00 PM
Fri	Instagram	Carousel	“5 comfort foods for a rainy evening”	6:30 PM
Sat	Facebook	Video	Customer testimonials compilation	11:00 AM
Sat	Instagram	Story	“Weekend binge” quiz/poll sticker: “Snacks or full meal?”	8:30 PM
Sun	Instagram	Image	“Sunday family feast” bundle offer graphic	12:00 PM
Sun	Twitter/X	Text	Weekly thank-you plus a teaser for next week’s surprise	7:00 PM

Q-5.

Use ChatGPT to generate five creative post ideas for a small business (choose any, like a local café or clothing store) and list how each idea could be visualized using Canva or CapCut.

Ans:

Business selected: Local café — Coffee Corner

No.	Post idea	Content concept	How to visualize using Canva or CapCut
1	New Menu Launch	Promote a new cold coffee or dessert.	Canva: Use a food promotion template, product photo, price, and “Try Now” text.
2	Customer Review	Share positive customer feedback.	Canva: Create a testimonial graphic with a short review and star icons.
3	Behind the Scenes	Show how coffee is prepared by the barista.	CapCut: Edit short clips with transitions, music, and text overlays.

4	Weekend Special Offer	Promote a limited-time discount, such as 20% off coffee.	Canva: Design a colourful offer poster with the discount and expiry date.
5	Fun Engagement Post	Ask customers, “Coffee or Tea?”	Canva: Create a two-option poll graphic, or CapCut: Make a short video comparing both drinks.

Seasson-18

Q-1.

Pick any two social media platforms you use (such as Instagram and YouTube) and write a short comparison of how their content algorithms decide what appears on your feed or homepage. Include at least two factors that influence ranking for each platform.

Ans:

Instagram and YouTube use algorithms to show users content that matches their interests and encourages them to watch, interact, and return to the platforms.

Ranking factor	Instagram	YouTube
User interests	Shows Reels and posts related to content a user likes, saves, or shares.	Recommends videos based on watch history and topics the user enjoys.
Engagement	Likes, comments, shares, and saves can influence content ranking.	Watch time, audience retention, likes, and other engagement signals can influence recommendations.
User activity	Considers accounts and content the user frequently interacts with.	Considers channels and videos the user watches or searches for.

Q-2.

Create a one-week content calendar for a new food delivery app's Instagram account, specifying the posting days, times, and short descriptions of each post. Make sure your schedule follows the rule of consistency and explains your chosen cadence.

Ans:

Brand name: Foodie Express

Posting frequency: One post per day, at 7:00 PM IST.

Day	Time	Content type	Post description
Monday	7:00 PM	Reel	Show a delicious pizza with the caption “Start your week with your favourite food!”
Tuesday	7:00 PM	Carousel	Share five popular dishes available on Foodie Express.
Wednesday	7:00 PM	Story	Run a poll: “What would you order today — Pizza or Burger?”
Thursday	7:00 PM	Reel	Show a short behind-the-scenes video of food packing and delivery.
Friday	7:00 PM	Promotional post	Promote a fictional weekend offer: “Get 20% off your favourite meal.”
Saturday	7:00 PM	Customer review	Share a customer testimonial and food photo.
Sunday	7:00 PM	Reel	Create a “Sunday Feast” video featuring biryani, burgers, and desserts.

Consistency and cadence: Posting once daily at the same time creates a predictable schedule and provides regular opportunities to engage with followers. The mix of Reels, carousels, Stories, promotions, and customer reviews keeps the content varied. After one or two weeks, Instagram Insights can help identify the best posting times and content types.

Q-3.

Use ChatGPT or Perplexity to generate 10 fresh content ideas for a new music playlist sharing feature in a Spotify-style app. List the prompts you used and the top 5 ideas you found most relevant.

Hint: Try prompts like 'Trending social media content ideas for music apps in 2024.'

Ans:

Prompts to use:

1. “Trending social media content ideas for music apps in 2026.”
2. “Give me 10 Instagram Reel ideas to launch a collaborative playlist-sharing feature for a Spotify-style app.”
3. “What content formats are Gen Z music listeners in India sharing most on Instagram and YouTube Shorts?”

10 ideas:

1. “Playlist swap” challenge: two friends trade playlists and react to each other’s taste
2. “Guess whose playlist” quiz Stories
3. Playlist-of-the-week spotlight from a real user
4. Reel series: “Songs for [mood/time/city]” (e.g. “Ahmedabad monsoon drive”)
5. Couples/friends “blend” playlist reveal
6. Artist-curated playlists with a behind-the-scenes clip
7. Shareable “year in playlists” visual cards
8. Live “build a playlist together” session on Instagram
9. Short cringe-or-fire reaction videos to people’s guilty-pleasure songs
10. Wedding/trip/road-trip collaborative playlist templates

Top 5 (most relevant):

1. **Playlist swap challenge:** it’s inherently shareable, drives sign-ups for the feature and works well as Reels.
2. **Blend playlist reveal:** personal and emotional, and it encourages sending to a friend.
3. **Shareable visual cards:** it creates free distribution through Stories.
4. **Mood/city playlist Reels:** these are discoverable via search and local hashtags.
5. **Collaborative trip/wedding templates:** they show a clear use case beyond casual listening.

Q-4.

Imagine you are launching a new sneaker drop for a Myntra-style app. Find one real micro-influencer on Instagram (less than 100K followers) who could promote it. Write a short influencer brief (max 5 lines) and describe one way you would track the ROI of this campaign.

Ans:

Influencer: According to a Modash creator listing, **Girish Ahuja | Fashion & Essentials** (Indore) has about 32.3K followers, an 8.01% engagement rate and an audience that is mostly male and based in India. He’s a good fit for a sneaker drop. The same listing also shows a fake-follower rate of about 17%, which is normal but worth checking. These are third-party snapshot figures, so confirm the current follower count and engagement on his Instagram profile before you submit. modash

Influencer brief (5 lines):

1. **Goal:** Build excitement for our exclusive sneaker drop and drive app installs and pre-orders.
2. **Deliverables:** 1 Reel (unboxing plus 3 outfit styles) and 3 Story frames with the app's link sticker.
3. **Key message:** "Limited drop, early access in the app."
4. **Tone:** Authentic, casual and in his own style, with no scripted hard sell.
5. **Timeline:** Content goes live 48 hours before the drop, with a reminder Story on drop day. Add #ad as required.

ROI tracking: Give him a **unique promo code and a UTM-tagged link** (e.g. GIRISH10). Track installs, orders and revenue attributed to that code and link in the app analytics.

ROI = (revenue from code/link − campaign cost) ÷ campaign cost × 100.
For example, ₹60,000 revenue on a ₹15,000 fee gives (60,000 − 15,000) ÷ 15,000 = **300% ROI**.

Q-5.

Draft a simple SMO client report (max 1 page) for a Zomato-style restaurant account, summarizing weekly performance: include metrics like follower growth, engagement rate, top-performing post, and one actionable recommendation for next week.

Hint: Use made-up but realistic numbers if you don't have real data.

Ans:

Client: Spice Route Kitchen | **Period:** 10–16 Oct 2026 | **Prepared by:** [Your name]

(Figures below are illustrative.)

Metric	**Last week**	**This week**	**Change**
Followers	48,200	49,350	**+1,150 (+2.4%)**
Total reach	112,000	138,500	**+23.7%**
Total interactions (likes, comments, shares, saves)	1,980	2,350	+18.7%
Engagement rate (interactions ÷ followers)	4.1%	**4.8%**	+0.7 pts
Posts published	6	7	+1

Top-performing post: the Reel **“Biryani cheese-pull”** (Sat, 7:30 PM) got 48.2K views, 1,120 interactions and 210 shares. Close-up food shots with sound drove the highest saves and shares of the week.

What underperformed: the static menu graphic (Tue) got only 95 interactions.

Actionable recommendation for next week: Shift two of the static posts to short Reels with close-up “cheese-pull” or sizzle shots, posted at 7:30 PM on Friday and Saturday. Add a clear call to action (“Tag who you’d share this with”). **Target: engagement rate of 5.2% and +1,300 followers.**

Session-19

Q-1.

Use ChatGPT to generate 5 catchy Instagram captions for a new menu item launch at a popular café, making sure each caption includes a trending hashtag relevant to foodies.

Ans:

Menu item: Salted Caramel Cold Brew

1. Meet your new obsession. Salted caramel meets slow-steeped cold brew. One sip and Monday is forgiven 🧋🍮 #FoodieFinds
2. Plot twist: your coffee just got a glow-up. Our Salted Caramel Cold Brew is officially on the menu 🔥 #Foodstagram
3. Sweet. Salty. Smooth. Tag the friend who's buying you one 👀 #CafeHopping
4. Some drinks are just drinks. This one is a mood. New on the menu, now pouring ✨ #FoodLovers
5. We spent weeks perfecting it so you can finish it in minutes. Come say hi #InstaFoodie

Q-2.

**Create a one-week content calendar for a fashion brand's Instagram using ChatGPT, specifying the post type (image, reel, story), suggested caption, and hashtags for each day.

Hint: Ask ChatGPT to suggest post ideas, then organize them in a table format.**

Ans:

Day	Post type	Idea	Suggested caption	Hashtags
Mon	Image	New-week outfit flat lay	Start the week sharp. Your Monday uniform, sorted.	#OOTD #FashionDaily #StyleInspo
Tue	Reel	3 ways to style one blazer	One piece, three looks. Which one's you?	#StyleHacks #FashionReels #WardrobeEssentials

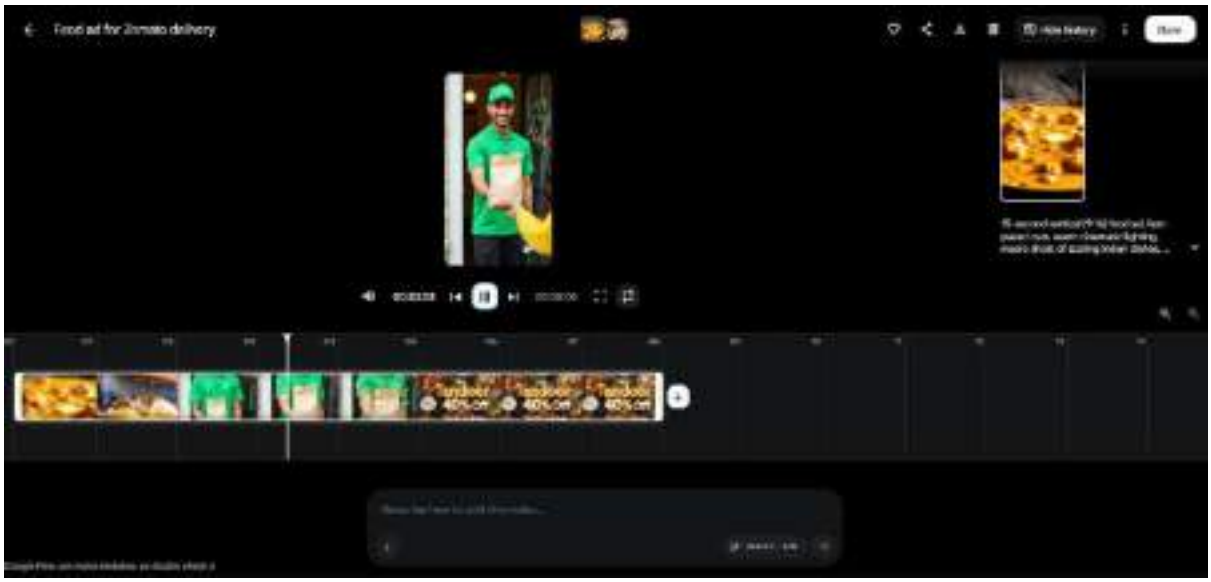

Wed	Story	Poll: “Denim or tailored trousers?”	You decide what we restock. Vote now 👇	#YouPick #FashionPoll
Thu	Image	Carousel of new-arrival close-ups	Details that make the difference.	#NewArrivals #FashionLovers #DesignDetails
Fri	Reel	Behind the scenes of a photoshoot	Friday on set. Here’s how the magic happens.	#BehindTheScenes #FashionBrand #BTS
Sat	Image	Customer wearing the brand (UGC)	Our favourite kind of feature: you.	#CustomerLove #StyleInspo #OOTD
Sun	Story	Weekend offer countdown	Last chance this weekend. Tap to shop.	#WeekendSale #ShopNow #FashionDeals

Q-3.

**Use Google Veo 3 to generate a 15-second short-form video ad for a new Zomato restaurant partner, focusing on quick visuals and a strong call-to-action.

Constraint: Your video script must mention a limited-time offer.**

Ans:

Food_ad_for_Zomato_delivery_2026101718

Q-4.

**Set up an n8n workflow that automatically posts a daily motivational quote to your Telegram channel at 9 AM, using a quotes API as the source.

Hint: Use the HTTP Request node to fetch a quote, and the Telegram node to send the message.**

Ans:

Objective: Automatically send one motivational quote to a Telegram channel every day at 9:00 AM using a quotes API.

Step-by-step setup

1. Create an account on n8n and open a new workflow.
2. Add a Schedule Trigger node and set it to run every day at 9:00 AM. Set the workflow timezone to Asia/Kolkata.
3. Add an HTTP Request node:

- Method: GET
- URL: https://api.quotable.io/random
- The API returns quote data in JSON format when the endpoint is available.

4. Add a Telegram node and connect your Telegram bot credentials. Create a bot using BotFather and add it to your channel with permission to post messages.
5. Configure the Telegram node to send a message using the quote and author fields returned by the API, for example:

✨ Daily Motivation

"{{ $json.content }}"

— {{ $json.author }}

Keep learning. Keep

growing. 💪

1. If your API returns a different JSON structure, adjust the field mapping accordingly.
2. Test each node, activate the workflow, and verify that a message reaches your Telegram channel.

Expected result: A motivational quote is automatically posted to the Telegram channel every morning at 9:00 AM.

Q-5.

Use ChatGPT to brainstorm 10 hook ideas for a short video ad promoting a new feature in a payments app like PhonePe, then pick the best one and explain why it would grab attention.

Ans:

Feature: Split bills with friends in one tap

1. “Your friend ‘forgot’ to pay you back again? Not anymore.”
2. “This one tap just saved my friendship.”
3. “Stop doing maths at the restaurant table.”
4. “₹4,800 dinner. 6 friends. Settled in 5 seconds.”
5. “POV: you’re the friend who always pays first.”
6. “Never type ‘bro, send my share’ again.”
7. “Group trip expenses used to ruin my weekends. Watch this.”

8. “I tracked who owes me money for a month. It was ₹12,000.”
9. “Bill came. Everyone went silent. Then I tapped once.”
10. “There’s a button that sends the awkward reminder for you.”

Best pick: #9, “Bill came. Everyone went silent. Then I tapped once.”

It works for four reasons:

- **It’s instantly relatable.** Almost every Indian viewer has lived the awkward silence when the bill arrives, so they recognise themselves in the first second.
- **It’s a mini story.** “Then I tapped once” opens a curiosity gap, so people keep watching to see what happens.
- **It shows the feature instead of explaining it.** The payoff is the one-tap split, which is the product’s benefit.
- **It suits muted autoplay.** The visuals (silent table, phone tap) carry the hook, with captions as backup.

Session-20

Q-1.

Create a mock Click-to-WhatsApp ad for a local food delivery service, including the ad copy and the WhatsApp message template a user would see after clicking the ad.

Ans:

Business Name: Tasty Bites Food Delivery

Ad Objective: Get customers to start a conversation on WhatsApp and place food orders.

Ad Copy:

🍕 **Hungry? Your Favourite Food Is Just a WhatsApp Message Away!**

Craving pizza, burgers, biryani, or Chinese food? 😋 Order your favourite meals from Tasty Bites and enjoy delicious food delivered to your doorstep.

🔥 Special Offer: Get 10% OFF on your first order!

📲 Click the WhatsApp button to view our menu and order now.

#FoodDelivery #FoodLovers #AhmedabadFoodies

Call-to-Action (CTA): Send WhatsApp Message

WhatsApp Message Template After Clicking the Ad:

Hi Tasty Bites! 👏

I saw your advertisement and would like to order food.

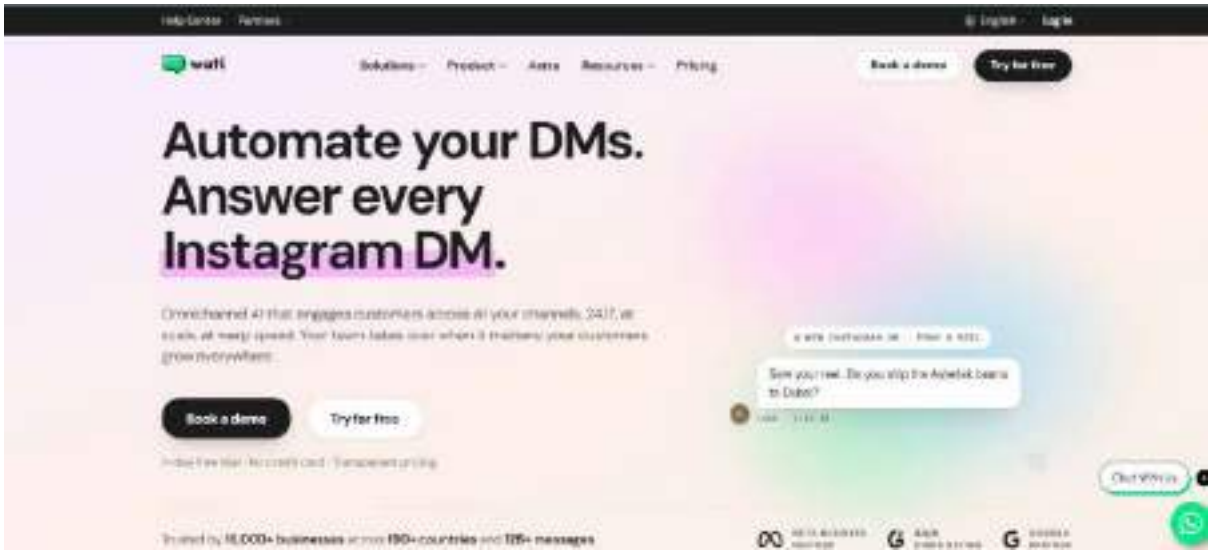

Please share your menu and today's special offers. 🍕🍔

Q-2.

**Sign up for a free trial account on either WATI or AiSensy and set up a basic automated WhatsApp reply flow that greets users and asks for their preferred product category (e.g., electronics, clothing, food).

Hint: Use the platform's drag-and-drop or template tools to design the flow, and take screenshots of your setup.**

Ans:

1. Sign up for the free trial and connect or request a WhatsApp Business number.
2. Open the chatbot or flow builder and create a new flow triggered by "any first message".
3. **Message node:** "Hi 👋 Welcome to {Brand}! Which category are you interested in?"
4. **Buttons or list node:** Electronics, Clothing, Food.
5. Add one branch per option, each with a reply such as "Great choice! Here's our {category} catalogue: [link]".
6. Add a fallback branch for unrecognised text that says "Sorry, please pick one of the options" and re-sends the buttons.
7. Test it from your own phone, then screenshot the flow canvas and the test chat for your submission.

Q-3.

Research the Meta AI Business Assistant (MABA) and list three ways it can help a small business automate customer support on WhatsApp, with a one-line example for each use case.

Ans:

I couldn't find "MABA" as an official name. Meta's customer-support AI for WhatsApp Business is now known as Meta Business Agent, so I've used that. Three ways it helps with support:

1. **Answers questions 24/7 in the brand's voice.** It is designed to let businesses run customer service around the clock without large support teams, and it supports the customer's local language and uses the business's tone. Example: at 11 pm a customer asks "Do you deliver to Satellite area?" and gets an instant, on-brand answer.
2. **Handles sales tasks, not just FAQs.** Meta said it can recommend products, book appointments and qualify sales leads. *Example: a salon's bot books a Saturday 4 pm haircut slot without staff involvement.*
3. **Hands over to a human when needed.** Businesses can decide when a support team should step in. It is designed to work alongside existing support teams rather than replace them. *Example: a refund dispute is routed to a human agent along with the chat history.*

Q-5.

Imagine you are running a social media agency in 2026. Write a short plan (5-7 lines) describing how you would use AI and automation tools to manage campaigns for multiple clients across WhatsApp, Instagram, and Facebook.

Ans:

1. Build one central content and brief hub per client, with brand voice, offers and approved assets, so AI drafting stays on-brand across all channels.
2. Use AI to generate several distinct creative concepts (formats, angles, personas) per client weekly, with humans approving before anything goes live.
3. Run Instagram and Facebook ads that send people into WhatsApp, with a Meta Business Agent or flow-builder bot handling first replies, FAQs and lead qualification.
4. Route hot leads to a human, and sync all leads into one CRM or shared sheet with tags by client and campaign.

5. Schedule posts through a single dashboard and automate daily or weekly performance reports per client.
6. Use AI to analyse results, retire weak creatives and propose the next test, so strategy time goes to the clients' goals and not to reporting.
7. Keep opt-in, template-approval and data-privacy checks as a mandatory step for every campaign.

Session-26

Q-1.

Pick any one app you use daily (Instagram, Zomato, Myntra, Spotify, etc.) and outline a social media campaign objective for it — specify the goal (e.g., increase app downloads, boost engagement, promote a new feature) and define your target audience in 2-3 lines.

Ans:

Chosen App: Zomato

Campaign Name: Your Cravings, Delivered

Goal: The main objective is to increase Zomato app orders and social media engagement by promoting food options, restaurant discoveries, and available offers.

Target Audience: Young adults aged 18–30 in Ahmedabad, including college students and young professionals. They use Instagram and Facebook, enjoy trying different foods, and look for convenient food delivery and affordable offers.

Q-2.

**Create a content calendar for your chosen app's campaign covering 7 days — include the platform (Instagram, Facebook, Twitter, etc.), post type (image, reel, story, poll, etc.), posting time, and a one-line description of each post.

Hint: Use a simple table format to organize your calendar.**

Ans:

Day	Platform	Post type	Posting time	Content description
Monday	Instagram	Reel	12:30 PM	Show popular lunch options and ask viewers what they are craving.
Tuesday	Instagram, Facebook	Carousel	6:30 PM	Share five budget-friendly meal ideas.

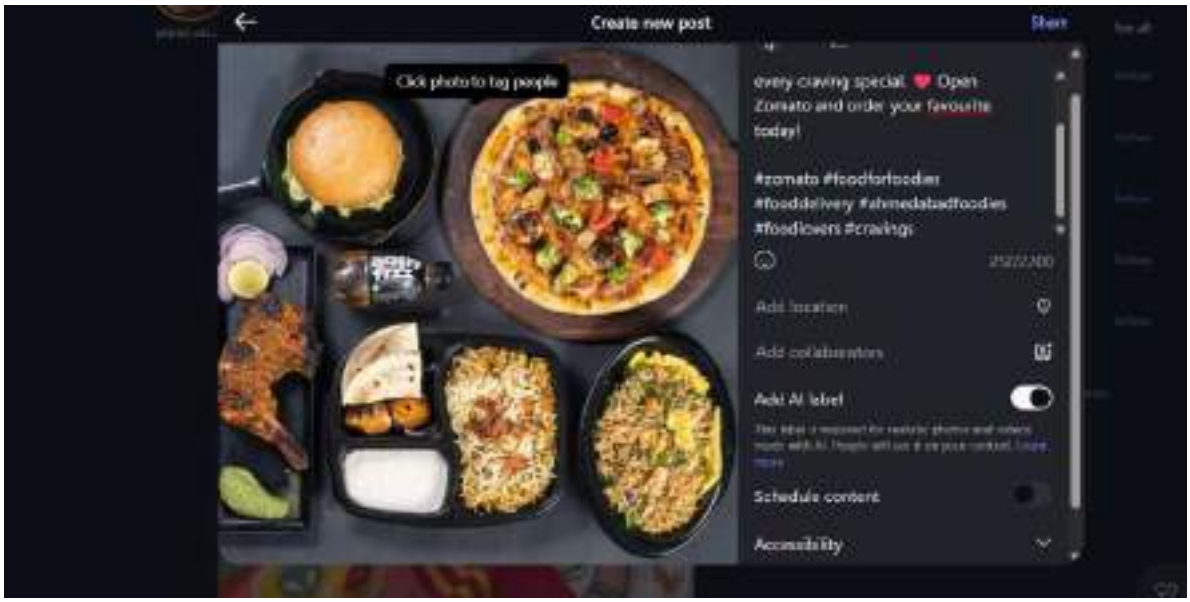

Wednesday	Instagram	Story poll	1:00 PM	Ask followers to choose between pizza and biryani.
Thursday	X (Twitter)	Text + image	7:00 PM	Ask followers to share their favourite comfort food.
Friday	Instagram	Reel	7:30 PM	Show delicious weekend food options with an order-now CTA.
Saturday	Facebook, Instagram	Offer graphic	12:00 PM	Highlight an available in-app food offer.
Sunday	Instagram	Story Q&A	6:00 PM	Ask followers to recommend restaurants or food items.

Q-3.

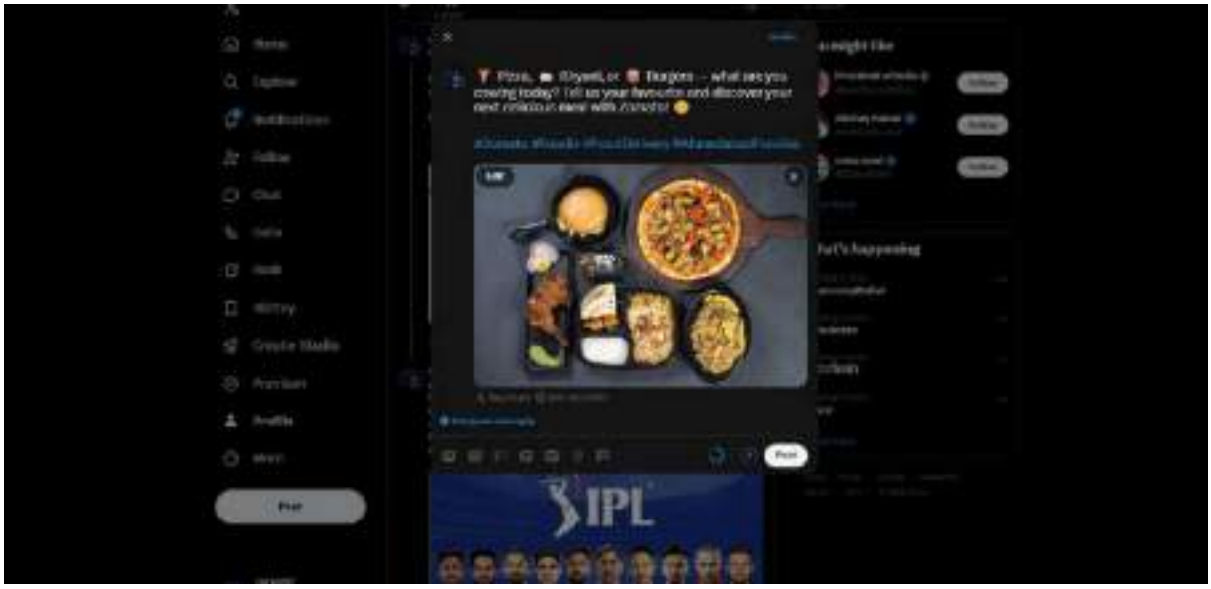

Write 2 sample social media posts (caption + hashtag set) for your campaign — one for Instagram and one for Twitter — that match your campaign objective and audience.

Ans:

A. Instagram post:

B. X (Twitter) post:

Q-4.

List 3 key metrics you would track to measure the success of your campaign (e.g., reach, click-through rate, installs, shares) and explain in one line how each metric helps you evaluate your strategy.

Ans:

Metric	**How it measures success**
Reach and engagement	Measures how many people see, like, comment on, share, or save the content.
Click-through rate (CTR)	Shows how effectively posts encourage people to click through to the app.
App orders/conversions	Measures how many orders result from the campaign, where tracking is available.

Q-5.

**Prepare 3 slides (using PowerPoint, Google Slides, or Canva) summarizing your campaign strategy: Slide 1 — Objective & Audience, Slide 2 — Content Plan, Slide 3 — Success Metrics. Export as PDF and submit the file.

Hint: Keep each slide focused, use visuals or icons if possible.**

Ans:

Zomato_Social_Media
_Campaign.pdf

Slide 1 — Objective & Audience

Campaign goal, target audience, and key message.

Slide 2 — Content Plan

Seven-day posting schedule, platforms, post types, and times.

Slide 3 — Success Metrics

Reach, CTR, conversions, and campaign evaluation.
